

## CONTENTS

Section I. Introduction	
1. Importance of the Symposium to the Dairy Industry	1
Section II. Methodology	
2. Studies on Milk Fat and Milk Fat Fractions	4
3. The Preparation, Characterization, and Chemical Analysis of Milk Fat Fractions	15
4. Triglyceride Composition of Milk Fats	28
5. Analysis of Milk Lipids	99
Section III. Animal Studies	
6. The Influence of the Major Fatty Acids in Milk Fat on Serum Cholesterol Levels	116
7. Interrelated Effects of Nutritional Factors on Serum Lipids and Atherosclerosis	135
8. Influence of Fatty Acid Composition of Infant Formulas on the Development of Arteriosclerosis and on the Lipid Composition of Blood and Tissues	149
Section IV. Human Studies	
9. Effects of Specific Fatty Acids on Serum Cholesterol in Man: Studies with Semisynthetic Materials	161
10. Effects of Milk and Milk Components upon Serum Lipid and Lipoprotein Levels in Man	176
11. Effect of Dairy Fat and Dairy Fat Fractions on Serum Lipids and Cholesterol Metabolism in Man	196
12. Comparison of Effects of Milk and Its Lipid and Carbohydrate Constituents with Those of Other Dietary Fats and Carbohydrates on Serum Lipid Concentrations in Man	209
13. Importance of the Symposium to the Scientific Community	227
Index	229
