# Contents

Preface to the Second Edition.....	xv
Preface to the First Edition.....	xvii
Author.....	xix

## **Part I** **The Theory**

<b>Chapter 1</b> Proteins and Amino Acids.....	3
Introduction.....	3
Amino Acids.....	4
<b>Peptide</b> Linkage.....	4
Free Amino Acid Pool.....	5
Protein Synthesis.....	6
Regulation of Protein Synthesis.....	7
Factors Affecting Protein Synthesis and Catabolism.....	9
Cellular Hydration and Protein Synthesis.....	11
Cellular Hydration and Amino Acids.....	12
Nutrients and <b>Protein</b> Synthesis.....	13
Protein Catabolism.....	14
Adaptive Response to Exercise.....	15
Exercise-Induced Amino Acid Flux.....	17
References.....	17
<b>Chapter 2</b> Exercise and Protein Metabolism.....	23
Introduction.....	23
Effects of Exercise on Protein Synthesis and Degradation.....	24
Effects of Protein and Amino Acids on Exercise Performance.....	24
Hormonal Response to Exercise.....	24
Hormones.....	26
<b>Growth</b> Hormone.....	27
Growth Hormone and Athletic Performance.....	28
Problems with Exogenous Growth Hormone.....	30
Effects of Growth Hormone on Body Composition and Athletic Performance.....	30
GH, IGF-1, Insulin, and Amino Acids Synergism.....	31
Nutrient and Hormone Delivery to Muscle.....	32
Growth Hormone and Exercise.....	32
Growth Hormone and Endurance Athletes.....	33
Effects of GH on Core Temperature and Performance.....	33
Effects of GH on Intramyocellular Triacylglycerol/Triglyceride Content.....	33
Regenerative and Cognitive Effects of GH and IGF-1.....	34
Effects of GH on Aging.....	34
Growth Hormone Synthesis and Secretion.....	34

Myostatin .....	35
GH and Myostatin.....	36
Insulin-Like Growth Factor 1 .....	37
GH and IGF-1 Synergism.....	40
Mechano Growth Factor .....	42
Insulin.....	43
Insulin's Controversial Effects on Protein Synthesis and Degradation.....	45
Insulin and Nutrient Delivery .....	46
Insulin, GH, and IGF-1 Synergism.....	47
Thyroid Hormones.....	48
Thyroid Hormones and Protein Metabolism .....	50
Thyroid Hormone and Other Hormones.....	51
Testosterone.....	52
Stress and Testosterone Levels .....	53
Exercise and Testosterone Levels.....	53
Catabolic Hormones.....	55
Effect of the Catabolic Hormones on Skeletal Muscle Catabolism.....	55
Catecholamines .....	56
Effects of Catecholamines on Protein Metabolism .....	57
Glucagon.....	58
Glucagon and Insulin.....	59
Cortisol.....	60
Cortisol, Amino Acids, and Other Hormones .....	61
Testosterone to Cortisol Ratio .....	61
Testosterone to Cortisol Ratio and Exercise.....	62
Effect of Dietary Nutrients on Testosterone and the Testosterone to Cortisol Ratio.....	63
Cytokines and Muscle Protein Synthesis.....	64
Eicosanoids and Muscle Protein Synthesis.....	66
Hormonal Effects of Amino Acids.....	69
References.....	70
<b>Chapter 3</b> Energy Metabolism.....	107
Introduction.....	107
Energy Sensing .....	108
Metabolic Pathways Producing ATP.....	108
Anaerobic Energy Production.....	108
Cytoplasmic Anaerobic Substrate-Level Phosphorylation .....	108
Anaerobic Mitochondrial Phosphorylation.....	109
Aerobic Energy Production.....	109
TCA Cycle.....	110
Role of Protein and Amino Acids in Energy Metabolism .....	111
Fate of Dietary Protein.....	112
Protein Contribution to Energy Metabolism.....	113
Amino Acid Catabolism .....	113
Oxidation of Amino Acids .....	113
Gluconeogenesis .....	115
Amino Acids and Gluconeogenesis.....	116
Hormonal Control of Gluconeogenesis .....	117
Effects of Amino Acids on Hepatic Glucose Metabolism .....	118

Use of Amino Acids for <b>Energy</b> —Catabolic Effects of Exercise.....	118
Amino Acid Metabolism in Muscle .....	119
Pathways of Amino Acid Metabolism in Muscle .....	119
Skeletal Muscle Catabolism.....	119
Oxidation of Amino Acids .....	120
Glucogenic and Ketogenic Amino Acids.....	122
Glucogenic Amino Acids.....	123
Metabolized to AKG. <b>Pyruvate</b> , Oxaloacetate. Fumarate. or Succinyl-CoA.....	123
Ketogenic Amino Acids.....	124
Metabolized to Acetyl-CoA or Acetoacetate.....	124
<b>Alanine</b> and <b>Glutamine</b> .....	124
Interorgan Exchange of Amino Acids.....	125
Protein Metabolism and Ammonia.....	126
Metabolism of Ammonia.....	126
Urea Formation by the Liver.....	128
High Levels of Protein Intake and Ammonia.....	129
<b>Low-Carbohydrate</b> , High-Protein Diets and Energy Metabolism.....	130
Metabolic Advantage of a <b>High-Protein</b> , Low-Carbohydrate Diet .....	130
Dietary Calories from Macronutrients.....	130
Low-Carbohydrate Controversy.....	131
Conclusions and Recommendations.....	132
References.....	133
Chapter 4 Dietary Protein and <b>Amino</b> Acids.....	139
Effects of Protein on Dietary Intake and Appetite .....	139
Classification of Proteins .....	139
Simple Proteins.....	139
Conjugated Proteins.....	140
Functions of Proteins.....	141
Growth.....	141
Maintenance.....	141
Regulatory.....	141
Energy.....	142
Coagulation and Denaturation.....	142
Protein Digestion, Absorption, and Metabolism.....	142
Requirement for Dietary Protein—Amino Acid Needs.....	144
Quality of Proteins.....	144
Slow and Fast Dietary Proteins.....	145
<b>Effects</b> of Dietary Protein on Protein Metabolism.....	147
Protein Quality—Amino Acid Requirements.....	147
Vegetarian Diets.....	149
Types of Vegetarians.....	150
Nutritional Quality of Vegetarian Diets.....	150
Vegetarian Food Guide—Basic Four Food Groups.....	151
Supplying Required Nutrients .....	152
Nutritional Considerations of Vegetarians.....	152
Special Nutrient Needs of Vegetarians.....	152
Vegetarian Athletes.....	153

Common Vitamin and Mineral Deficiencies.....	153
Specific Nutritional Needs of Vegetarians.....	154
Protein.....	154
Ensuring Adequate and High-Quality Protein.....	154
Complementary Proteins.....	154
Nutritional Responses to Combining Two Dietary Proteins.....	156
Nutritional Supplements and the Vegetarian Athlete.....	157
Creatine.....	158
Food Processing.....	158
Measuring Protein Quality.....	158
Protein Efficiency Ratio.....	158
Biological Value.....	159
Protein Digestibility Corrected Amino Acid Score.....	160
Dietary Protein Requirements.....	161
How Was the RDA Established?.....	163
Recommended Daily Intakes for Athletes.....	164
Historical Overview.....	164
Effects of Exercise on Dietary Protein Requirements.....	165
Protein (Nitrogen) Balance.....	168
Effect of Dietary Protein on Protein Metabolism.....	170
Amino Acid Metabolism.....	171
The Dietary Protein Paradox—The Probable Need for Protein and Amino Acid Supplements Even in Diets High in Dietary Protein.....	172
Protein Needs in Calorie-Restricted Diets.....	174
References.....	174
<b>Chapter 5 Protein Foods versus Protein and Amino Acid Supplements.....</b>	<b>185</b>
<b>Hydrolysates—Comparison to Whole Protein and Intact Whole-Protein Supplements.....</b>	<b>186</b>
Whey Protein Hydrolysates and the Athlete.....	187
BV of Whey Hydrolysates.....	188
Whey Protein and the Immune System.....	188
Effects of Whey Protein on Glutathione Levels.....	188
Whey and Casein and Antigenicity—Advantages of Hydrolysates.....	189
Whey <b>Protein—Conclusions</b> .....	190
Free-Form Amino Acids versus Di- and Tripeptides.....	190
Practical Guide to Commercial Amino Acid Preparations.....	191
Free-Form Amino Acid Mixtures.....	192
Peptide-Bonded <b>Aminos</b> .....	192
Factors Affecting Amino Acid Bioavailability.....	192
Role of Amino Acid Supplementation in Muscle Hypertrophy and Strength.....	193
References.....	194
<b>Chapter 6 Physiological and Pharmacological Actions of Amino Acids.....</b>	<b>197</b>
Introduction.....	197
Central Nervous System Effects of Amino Acids.....	199
Effects of Amino Acids on Growth Hormone Release.....	200
Hepatoprotectant and Cytoprotective Effects of Amino Acids.....	201
References.....	201

<b>Chapter 7</b> Essential Amino Acids .....	207
Use of Essential Amino Acids after Training Increases 24 h Protein Balance.....	207
Branched-Chain Amino Acids: Isoleucine, <b>Leucine</b> , and Valine.....	208
<b>BCAAs</b> and Muscle Hypertrophy.....	212
<b>BCAAs</b> and Hypoxia.....	213
Regulation of Muscle Protein Synthesis by <b>Leucine</b> .....	213
<b>Leucine</b> and Body Composition.....	214
Branched-Chain Keto Acids .....	215
$\alpha$ -Ketoisocaproic Acid.....	215
$\beta$ -Hydroxy- $\beta$ -Methylbutyrate.....	216
Lysine.....	218
<b>L-Carnitine</b> .....	218
L-Carnitine Metabolism.....	219
L-Carnitine Functions .....	220
LCAR Effects on Body Composition and Exercise Performance.....	221
<b>L-Carnitine</b> and Choline.....	224
Acetyl-L-Carnitine.....	224
Cognitive and Antiaging Effects of <b>ALCAR</b> .....	226
<b>Methionine</b> .....	227
S-Adenosyl-L-Methionine .....	229
<b>Creatine</b> .....	229
Creatine Supplementation.....	230
Creatine Supplementation Combined with Other Ingredients.....	232
Creatine and Caffeine.....	232
<b>Phenylalanine</b> .....	233
<b>Threonine</b> .....	233
Tryptophan.....	233
References.....	235
<b>Chapter 8</b> Conditionally Essential Amino Acids .....	253
<b>L-Arginine</b> .....	253
<b>L-Arginine</b> and Nitric Oxide.....	255
L-Arginine and the Athlete.....	256
Thiamin, <b>Arginine</b> , Caffeine, and Citric Acid Combination.....	258
Recovery and Athletic Injuries.....	258
Possible Ergolytic Effects of Nitric Oxide .....	258
<b>L-Arginine</b> and Caffeine.....	258
<b>L-Citrulline</b> .....	259
<b>Citrulline Malate</b> .....	260
<b>L-Cysteine</b> .....	260
N-Acetylcysteine.....	261
<b>L-Glutamine</b> .....	262
Glutamine Metabolism.....	263
Anabolic and Anticatabolic Effects of <b>Glutamine</b> .....	263
Glutamine and Cortisol.....	264
Anabolic Effects of <b>Glutamine</b> .....	266
<b>Glutamine</b> and Athletic Performance.....	267
Glutamine and Overtraining .....	269
Oral <b>Glutamine</b> Supplementation.....	270

Glutamine in Supplements.....	2	1
Summary.....		271
a-Ketoglutarate.....		272
Histidine.....		272
L-Carnosine.....		273
Buffering Effects of Carnosine.....		274
Tyrosine.....		275
Proline and Hydroxyproline.....		276
References.....		277

**Chapter 9** Nonessential or Dispensable Amino Acids.....297

<b>Alanine</b> .....		<b>297</b>
Glucose–Alanine Cycle.....		297
Alanine Needs and Exercise.....		<b>300</b>
<b>β-Alanine</b> .....		301
Asparagine and <b>Aspartic Acid</b> .....		302
Malate–Aspartate Shuttle.....		304
D-Aspartic Acid.....		305
Citrulline.....		305
<b>Citrulline Malate</b> .....		306
Glutamic Acid.....		306
Ornithine.....		306
Ornithine a-Ketoglutarate.....		307
<b>Serine</b> .....		308
Phosphatidylserine.....		309
Glycine.....	3	10
Taurine.....	3	1
Levodopa (L-Dopa).....		313
Analogues and Derivatives of Amino Acids.....		314
Protein and Amino Acids and Muscle Hypertrophy.....		314
References.....		<b>315</b>

**Chapter 10** Summary and Conclusions.....327

**Part II**

**Naturally Anabolic**

**Chapter 11** Artificial Enhancement.....331

Introduction.....		331
Drugs in Sports.....		331
Nutritional Supplements.....		331
Gene Therapy and Sports.....		331
The Easy, but Dangerous Way Out.....		333
References.....		334

**Chapter 12** Getting It Together.....335

Hormonal Manipulation.....		335
Maximizing Lean Body Mass and Athletic Performance without Drugs.....		336

Genetics.....	336
Usual Suspects—Lifestyle, Training, Diet, and Nutritional Supplements.....	337
Performance and Body Composition Enhancement Pipeline.....	337
Factors That Maximize the Pipeline.....	338
Step Number One—Lifestyle.....	338
Step Number Two—Training without Overtraining.....	338
Recovery Phase—Protein Synthesis after Exercise.....	340
Hormonal Changes with Exercise.....	340
Maximizing the Anabolic and Minimizing the Catabolic Effects of Exercise.....	342
Step Number Three—Maximizing Diet and Nutrition.....	343
Weight Loss and Body Composition.....	345
Effective Fat Loss.....	346
Phase Shift Diets.....	346
Evolution of My Phase Shift Diets.....	346
Man's Survival: The History of Food.....	347
Recipe for Disaster.....	348
Control of Weight and Body Composition.....	348
Unstructured Phase Shift Diets.....	350
Structured Phase Shift Diets.....	351
Metabolic Diet.....	351
Cultural Carbohydrates.....	353
Carbohydrate Dilemma.....	353
Higher-Carbohydrate Phase.....	353
Low-Carbohydrate Phase.....	353
Scientific Validation.....	354
Glucose Metabolism at the Start of the Low-Carbohydrate Phase of the Metabolic Diet.....	355
Postexercise Carbohydrates are Counterproductive.....	356
<b>Low-Carbohydrate</b> , High-Protein Diets, and Energy Metabolism.....	358
Metabolic Advantage of a <b>High-Protein</b> , Low-Carbohydrate Diet.....	358
Dietary Calories from Macronutrients.....	358
Low-Carbohydrate Controversy.....	359
Step Number Four—Nutritional Supplements.....	360
Why, When, and How to Take Them and How Much to Take.....	360
Why Use Nutritional Supplements?.....	361
Sports Performance.....	362
Cycling of Supplements.....	362
Stage One: Detraining or Rest Phase.....	362
Stage Two: Beginning Training Phase.....	363
Stage Three: Precompetition and Competition Phase.....	363
Current Nutritional Supplement Use.....	363
Benefits of Nutritional Supplements.....	366
Vitamins and Minerals.....	366
Antioxidants.....	368
Vitamin C.....	368
Coenzyme Q10 (Ubiquinone-10).....	369
Zinc.....	369
Magnesium.....	369
Calcium.....	369
Chromium.....	370
Chromium and Conjugated Linoleic Acid (CLA).....	370

Potassium.....	370
Alpha Lipoic Acid.....	371
Glucosamine Sulfate.....	371
Green Tea Extract.....	372
Hydroxycitrate.....	372
<i>Citrus aurantium</i> .....	373
<b>Yohimbe</b> .....	374
Dhea.....	374
Essential Fatty Acids.....	375
Omega3 Fatty Acids.....	375
<b>EFA</b> s and Body Composition and Exercise Performance.....	376
Gamma Linolenic Acid.....	377
Conjugated Linolenic Acid.....	377
Glycerol.....	378
<b>Pyruvate</b> .....	378
Caffeine and Ephedrine.....	378
Anticortisol Supplements.....	379
Amino Acid and Protein Supplementation.....	379
Timing of Nutrient and Protein Intake in Relation to Exercise.....	380
Postexercise Carbohydrates May Be Counterproductive.....	381
References.....	382
Chapter 13 Examples of Useful Nutritional Supplement Formulations.....	397
Example of a Weight and Fat Loss. and Body Composition Supplement.....	397
Thiamin. <b>Arginine</b> , Caffeine. and Citric Acid Combination.....	397
<b>Yohimbe</b> .....	397
<i>Citrus aurantium</i> .....	398
<b>Evodiamine</b> .....	398
Cayenne Pepper.....	399
Green Tea Extract.....	399
Phenylalanine.....	399
<b>Tyrosine</b> .....	399
Tyrosine. <b>Capsaicin</b> , Catechins. Calcium. and Caffeine Combo.....	399
Conjugated Linoleic Acid.....	400
Guarana.....	400
Conjugated Linoleic Acid and Guarana Combo.....	400
Chromium.....	400
Chromium and CLA.....	401
Yerba Matt.....	401
Niacin.....	401
Dandelion.....	401
Amino Acids.....	402
Histidine.....	402
Taurine.....	402
Calcium.....	402
Other Ingredients.....	403
Boosting Endogenous Growth Hormone.....	403
Postexercise Amino Acid Formulation.....	406
