

## CONTENTS

I. Evolution of the Vitamin Theory	1
II. Compilation of Vitamin Activities and Nomenclature	10
III. Thiamine and Cocarboxylase	17
IV. Riboflavine, Flavine Mononucleotide, and Flavine-Adenine Dinucleotide	46
V. Nicotinic Acid and nicotinamide, Diphosphopyridene Nucleotide, and Triphosphopyridine Nucleotide	72
VI. Pantothenic Acid and Coenzyme A	93
VII. Pteroylmonoglutamic Acid and the Folic Acid Coenzymes	113
VIII. Biotin, Biocytin, and N-Carboxybiotin	138
IX. Pyridoxine and Codecarboxylase	160
X. Canocobalamin and the Cobamide Coenzymes	194
XI. Lipoic Acid	244
XII. Choline and Cytidinediphosphocholine	364
XIII. Meso-Inositol	272
XIV. p-Aminobenzoic Acid	278
XV. The Vitamin A Group	280
XVI. L-Ascorbic Acid	308
XVII. The Vitamin D Group	330
XVIII. The Vitamin E Group	363
XIX. The Essential Fatty Acid Group	389
XX. The Vitamin K Group	407
XXI. The Coenzyme Q or Ubiquinone Group	435
Author Index	469
Subject Index	489
