

## CONTENTS

<b>Part I Food</b>	
1 Food Constituents	3
<b>Part II Metabolism</b>	
2 Metabolic Maps	99
3 Tables of Clinical Significance	121
<b>Part III Comparative Nutrition</b>	
4 Animal Needs and Uses (Comparative Nutrition)	163
<b>Part IV Human Nutrient Needs in the Life Cycle</b>	
5 Nutrition During Pregnancy and Lactation	175
6 Feeding the Premature Infant	203
7 Feeding the Term Infant	219
8 Nutrition for Healthy Children and Adolescents Ages 2 to 18 Years	241
9 The Health-Promoting Diet throughout Life: Adults	299
10 Nutrition in the Later Years	319
<b>Part V Human Nutritional Status Assessment</b>	
11 Dietary Guidelines, Food Guidance, and Diet Quality	339
12 Dietary Guidelines in Three Regions of the World	353
13 Healthy People-Goals and Interpretations	373
14 Food Labeling: Foods and Dietary Supplements	393
15 Nutrition Monitoring in the United States	407
16 Clinical Nutrition Studies: Unique Applications	435
17 Nutrition Monitoring and Research Studies: Observational Studies	453
18 Nutrition Monitoring and Research Studies: Nutrition Screening Initiative	463
19 Dietary Intake Assessment: Methods for Adults	477
20 Validity and Reliability of Dietary Assessment in School-Age	495
21 Methods and Tools for Dietary Intake Assessment in Individuals vs. Groups	523
22 The Use of Food Frequency Questionnaires in Minority Populations	539
23 Computerized Nutrient Analysis Systems	559
24 Nutrient Data Analysis Techniques and Strategies	567
25 Medical Nutritional Evaluation	581
26 Assessment of Lipids and Lipoproteins	591
27 Genetics of Energy and Nutrient Intake	603
28 Documentation to Improve Medical Assessment Assess and Reimbursement	621
29 Body Composition Assessment	633
30 The How and Why of Body Composition Assessment	637
31 Frame Size, Circumferences, and Skinfolts	657
32 Height, Weight, and Body Mass Index (BMI) in Childhood	673
33 Anthropometric Assessment: Height, Weight, Body Mass Index (BMI)(Adults)	695
34 Glossary of Terms used in Energy Assessment	709
35 Metabolic Assessment of the Overweighth Patient	713
36 Energy Assessment: Physical Activity	737
37 Thermogenesis	757
38 Environmental Challenges and Assessment	773
39 Psychological Tests	787
<b>Part VI Modified Diets</b>	
40 Vegetarian Diets in Health Promotion and Disease Prevention	801
41 Allergic Disorders	833
42 Enteral Nutrition	851
43 Parenteral Nutrition	875
44 Sports-Elite Athletes	895

<b>Part VII</b>	
45 Alcohol: Its Metabolism and Interaction with Nutrients	915
46 Anemias	941
47 Nutritional Treatment of Blood Pressure: Nonpharmacologic Therapy	961
48 Nutritional Treatment of Blood Pressure: Major Nonpharmacologic Trials of Prevention or Treatment of Hypertension	999
49 Chemoprevention of Cancer in Humans by Dietary Means	1011
50 Nutrition and Cancer Treatment	1029
51 Cardiovascular Disease Risk-Prevention by Diet	1045
52 Hyperlipidemias and Nutrient-Gene Interactions	1061
53 Nutrition in Diabetes Mellitus	1077
54 Nutrition and Oral Medicine	1113
55 Foodborne Infections and Infestations	1135
56 Nutrition and the Hollow Organs of the Upper Gastrointestinal	1163
57 Nutrition and the Hollow Organs of the Lower Gastrointestinal	1185
58 Nutrient Metabolism and Support in the Normal and Diseased Liver	1219
59 Nutrition and the pancreas: Physiology and Interventional Strategies	1239
60 Renal Nutrition	1255
61 Disorders of the Skeleton and Kidney Stones	1275
62 Nutrients and Eye Disease	1291
63 Protein-Energy Malnutrition	1297
64 Vitamin Deficiencies	1313
65 Rationale for Use of Vitamin and Mineral Supplements	1333
66 Nutrition in Critical Illness	1363
67 Nutritional Therapies for Neurological and Psychiatric Disorders	1381
68 Eating Disorders (Anorexia Nervosa, Bulimia Nervosa, Binge Eating Disorder)	1407
69 Adult Obesity	1429
70 Childhood Obesity and Exercise	1449
71 Trace Mineral Deficiencies	1463
72 Questionable Practices in Foods and Nutrition: Definitions and Descriptions	1489
 Index	 1509
