Series Preface .....	xix
Preface .....	xxi
The Author .....	xxiii

## **Section I Introduction**

<b>Introduction</b> .....	<b>1</b>
Guidelines and Interpretation of Data .....	6
Quality Assurance and Quality Control.....	7
References .....	7

## **Section II Vitamins**

### **Water-Soluble Vitamins**

<b>Vitamin C (Ascorbic Acid)</b> .....	<b>11</b>
History of Vitamin C and Scurvy .....	11
Vitamin C Deficiency .....	12
Occurrence of Vitamin C Deficiency.....	12
Dietary Sources of Vitamin C.....	13
Vitamin C Functions and Metabolism .....	13
Proline and Hydroxyproline and Vitamin C Deficiency .....	14
Potential Pharmacological Benefits of Vitamin C .....	15
Vitamin C Interactions .....	15
Determination of Vitamin C in Biological Specimens .....	16
Assessment of Vitamin C Status .....	20
Vitamin C Concentrations in Whole Blood, Red Cells and Leucocytes and Plasma .....	22
Urinary Excretion of Vitamin C .....	26
Potential New Assessment Methods .....	27
Vitamin C Toxicity and Safety .....	27
Summary .....	27
References .....	28
<b>Vitamin B-1 (Thiamin)</b> .....	<b>37</b>
History of Thiamin .....	37
Sources of Thiamin .....	38
Function of Thiamin .....	38

Thiamin Deficiency .....	38
Alcohol and Thiamin Status.....	38
Assessment of Thiamin Nutritional Status .....	39
Erythrocyte Transketolase Assay .....	42
Sample Preparation and Storage .....	43
Guides for Interpretation of Erythrocyte Transketolase Activity .....	44
Blood Thiamin Measurements .....	45
Urinary Excretion of Thiamin .....	45
Toxicity .....	47
Summary .....	47
References .....	47
<b>Vitamin B-2 (Riboflavin)</b> .....	<b>55</b>
History of Riboflavin.....	55
Riboflavin Functions .....	55
Riboflavin Metabolism .....	56
Riboflavin Deficiency .....	56
Riboflavin Nutritional Assessment.....	57
Riboflavin Analytical Methods .....	57
Erythrocyte Glutathione Reductase Assays .....	60
Riboflavin Toxicity.....	64
Summary.....	64
References .....	65
<b>Vitamin B-6 (Pyridoxine)</b> .....	<b>71</b>
Introduction .....	71
Bioavailability and Source of Vitamin B-6 .....	72
Clinical Vitamin B-6 Deficiency .....	72
Vitamin B-6 Metabolism and Utilization.....	73
Assessment of Vitamin B-6 Nutritional Status .....	74
Human Studies on Vitamin B-6 Nutritional Assessment Methods.....	74
Pyridoxal 5'-yhosyha te and Vitamin B-6 Assessment.....	78
Determination of Plasma Moniocysteine.....	79
Determination of Transaminase Activities.....	80
Tryptophan Load and Xanthurenic Acid Excretion .....	82
Merthionine Load Test .....	82
Urinary Excretion of 4-Pyridoxic Acid .....	83
Urinary Excretion of Vitamin B-6 .....	83
Vitamin B-6 Status .....	84
Toxicity .....	90
Summary .....	90
References .....	91
<b>Folate (Folic Acid, Pteroylmonoglutamic Acid, Folacin)</b> .....	<b>103</b>
Introduction .....	104
History of Folate .....	104
Food Sources of Folate .....	104
Folate Metabolism and Functions.....	105
Occurrence of Folate Deficiency .....	107
Folate Nutritional Status.....	108
Factors Influencing Folate Status.....	109

Evaluation of Folate Nutritional Status .....	111
Determination of Plasma and Erythrocyte of Folate Concentrations.....	115
Folate Status and Homocysteine Metabolism .....	116
Hypersegmentation of Neutrophils.....	120
Deoxyuridine Suppression Test (dUST).....	120
Forminoglutamic Acid Excretion (FIGLU Test).....	121
Urinary Excretion of Folate.....	122
Folate Safety and Toxicity .....	122
Summary .....	123
References .....	124
<b>Vitamin 8-12 (Cyanocobalamin, Corrinoids).....</b>	<b>135</b>
History of Vitamin B-12.....	135
Function of Vitamin B-12 (Cobalamin).....	136
Sources of Vitamin B-12 .....	137
Vitamin 8-12 Deficiency .....	137
Occurrence of Vitamin B-12 Deficiency .....	138
Vegetarians/Vegans.....	139
Nitrous Oxide and Vitamin B-12 .....	139
Laboratory Methods for Assessment of Vitamin B-12 Status.....	340
Factors Influencing Vitamin 8-12 Status .....	136
Interpretation of Vitamin B-12 and Folate Assessment Results.....	147
Toxicity .....	147
Summary .....	148
References .....	149
<b>Niacin (Nicotinic Acid, Nicotinamide).....</b>	<b>161</b>
History of Niacin .....	161
Sources of Niacin .....	163
Niacin Deficiency (Pellagra) .....	163
Functions.....	163
Methods for the Assessment of Niacin Status .....	164
Microbiological Methods .....	164
Chemical Methods .....	164
High-Performance Liquid Chromatography Procedures (HPLC).....	165
Measurement of N'-Methyl-4-Pyridone-5-Carboxamide .....	165
Assessment of Niacin Status .....	166
Plasma Metabolites and Niacin Status .....	168
Pyridine Nucleotides and Niacin Status .....	168
Children (10 to 13 Years).....	168
Pregnancy.....	169
Toxicity (Niacin).....	169
Summary .....	170
References .....	170
<b>Pantothenic Acid .....</b>	<b>175</b>
General.....	175
Pantothenic Acid Deficiency .....	175
Functions.....	176
Methods for the Determination of Pantothenic Acid .....	177
Assessment of Pantothenic Acid Status .....	178

Pantothenic Acid Status in Population Groups .....	179
Toxicity .....	180
Summary .....	180
References .....	181
<b>Biotin.....</b>	<b>185</b>
Introduction .....	185
Biotin Deficiency.....	185
Function of Biotin.....	186
Biotin Determination.....	187
Biotin Assessment.....	188
Experimental Biotin Deficiency in the Human .....	188
Toxicity .....	190
Summary .....	191
References .....	191

## **Fat-Soluble Vitamins**

<b>Retinol (Vitamin A).....</b>	<b>195</b>
Background /History/Function .....	195
Vitamin A Sources.....	197
Carotenoids: Nutrition and Measurement.....	197
Vitamin A Deficiency .....	198
Vitamin A Status .....	199
Interactions of Vitamin A .....	201
Assessment of Vitamin A Nutritional Status .....	203
Biochemical Methods for the Assessment of Vitamin A Status.....	207
Methods for the Measurement of Vitamin A in Plasma or Serum .....	211
Toxicity of Vitamin A.....	212
Relationship of Plasma Retinol Levels to Vitamin A Status.....	212
Summary/Comments.....	215
References .....	216
<b>Vitamin D .....</b>	<b>233</b>
Introduction .....	234
Vitamin D Metabolism .....	234
Vitamin D Deficiency.....	235
Vitamin D and the Elderly .....	236
Assessment of Vitamin D Status.....	236
Measurement of 25-Hydroxyvitamin D and 1.25-Dihydroxyvitamin D .....	237
Alkaline Phosphatase .....	238
Osteocalcin and Vitamin D .....	239
Vitamin D Absorption Test.....	239
Vitamin D in Saliva.....	239
Vitamin D: Drug Interaction and Toxicity.....	239
Assay Guidelines .....	240
Summary .....	240
Suggested Guidelines for Evaluating Vitamin D Status.....	242
References .....	242

<b>Vitamin E (Tocopherols)</b> .....	249
Introduction .....	249
Sources of Vitamin E .....	250
Vitamin E Deficiency .....	250
Infants and Children .....	251
Assessment of Vitamin E Status .....	252
Vitamin E Status: Functional Procedures .....	257
Handling of Blood Specimens.....	258
Vitamin E Toxicity .....	258
Summary .....	258
References .....	259
<b>Vitamin K</b> .....	267
Introduction .....	267
Sources of Vitamin K .....	268
Vitamin K Deficiency.....	269
Blood Clotting Process .....	270
Vitamin K and Anticoagulants.....	270
Vitamin K-Dependent Carboxylase .....	271
Vitamin K and Bone Formation .....	271
Methods for the Assessment of Vitamin K Status.....	272
Determination of Vitamin K.....	273
Studies on the Assessment of Vitamin K Status .....	274
Vitamin K Toxicity .....	275
Summary .....	275
References .....	275
 <b>Semi- or Quasi-Vitamins</b>	
<b>Carnitine</b> .....	281
Neonates and Infants.....	281
Carnitine Assays .....	282
Toxicity .....	282
Summary .....	282
References .....	284
<b>Choline</b> .....	287
Determination of Choline.....	287
Choline Requirements and Assessment .....	288
Choline Toxicity.....	289
Summary .....	289
References .....	290
<b>Inositol (Myo-Inositol)</b> .....	293
References .....	294
<b>Taurine</b> .....	295
Assessment of Taurine Status .....	296
Measurement of Taurine .....	296
Summary .....	297
References .....	297

## Trace Elements

<b>Iron</b> .....	343
History of Iron Deficiency .....	343
Dietary Sources of Iron.....	343
Iron Deficiency and Metabolism .....	344
Laboratory Procedures for the Assessment of Iron Status .....	344
Factors Influencing the Interpretation of Hematological Data .....	350
Iron Deficiency in Population Groups.....	352
Iron Deficiency in the Elderly .....	353
Iron Status in Volunteer Blood Donors .....	353
Iron Assessment of Populations .....	353
National Health and Nutrition Examination Surveys.....	354
Iron Overload /Iron Toxicity .....	354
Summary .....	361
References .....	361
<b>Iodine</b> .....	371
Introduction .....	371
Iodine Deficiency .....	371
Laboratory Procedures .....	372
Assessment of Iodine Nutritional Status .....	375
Iodine Excretion Guidelines.....	375
Surveys.....	375
Pregnancy.....	377
Goitrogens.....	377
Toxicity.....	377
Summary .....	378
References .....	378
<b>Zinc</b> .....	383
History of Zinc Essentiality .....	383
Occurrence of Zinc Deficiency .....	383
Zinc Essentiality and Functions.....	385
Diet and Zinc Sources and Intakes.....	385
Zinc Nutritional Assessment .....	386
Toxicity .....	390
Summary .....	390
References .....	390
<b>Copper</b> .....	397
Metabolism.....	397
Assessment of Copper Nutritional Status.....	398
Other Measures.....	400
Wilson's Disease .....	400
Copper Toxicity .....	401
Summary .....	401
References .....	405
<b>Selenium</b> .....	409
Introduction .....	409
Dietary Sources of Selenium .....	409

Determination of Selenium .....	410
Glutathione Peroxidase .....	411
Platelet Glutathione Peroxidase.....	413
Assessment of Selenium Status.....	413
Infants and Children .....	415
Elderly .....	415
Adults .....	415
Toxicity .....	416
Summary .....	416
References .....	420
Manganese .....	427
Determination of Manganese.....	428
Toxicity of Manganese.....	428
Summary .....	430
References .....	430
Chromium.....	433
Determination of Chromium .....	434
Toxicity of Chromium .....	434
Sumniary .....	435
References .....	435
Molybdenum .....	437
Determination of Molybdenum .....	437
Molybdenum Cofactor Deficiency.....	438
Toxicity .....	439
Summary .....	439
References .....	439

## **Ultratrace Elements**

Arsenic. Boron. Fluorine. Nickel. Silicon. <b>Tin</b> , Vanadium. and Sulfur.....	441
Arsenic .....	441
Boron .....	441
Fluorine .....	441
Nickel .....	442
Silicon.....	442
Tin.....	442
Vanadium .....	442
Sulfur .....	442
References .....	443

## **Section IV Protein-Energy Malnutrition**

Protein-Energy Malnutrition .....	447
Introduction .....	447
Clinical Protein-Energy Malnutrition.....	448
Anthropometric Parameters.....	448
