## VII Preface

### 1 Genetic Variation: Nutritional Implications

Simopoulos, A.P. (Washington, D.C.)

### 29 Gene:Environment Interactions and Coronary Heart Disease Risk

Talmud, P.J.; Humphries, S.E. (London)

### 41 Genes, Diet and Plasma Lipids: The Evidence from Observational Studies

Ordovas, J.M. (Boston, Mass.); Corella, D. (Boston, Mass./Valencia)

### 77 Dynamic Relationships between the Genome and Exposures to Environments as Causes of Common Human Diseases

Sing, C.F. (Ann Arbor, Mich.); Stengård, J.H. (Ann Arbor, Mich./Helsinki);  
Kardia, S.L.R. (Ann Arbor, Mich.)

### 92 Achieving Balance in the Omega-6/Omega-3 Ratio through Nutrigenomics. *Fat-1* Transgenic Mice Convert Omega-6 to

Omega-3 Fatty Acids

Kang, J.X. (Boston, Mass.)

### 99 Nutrients and Gene Expression

De Caterina, R. (Chieti/Pisa); Madonna, R. (Chieti)

### 134 Nutrigenomics in Efficacy and Safety Evaluation of Food Components

van Ommen, B.; Groten, J.P. (Zeist)

- 153 Genetic Variation and Nutritional Requirements**  
Molloy, A.M. (Dublin)
- 164 Vitamin Metabolism, Genetics and the Environment**  
Velázquez, A.; Fernández-Mejía, C. (México)
- 188 Gene-Nutrient Interactions in Type 1 Diabetes**  
Muntoni, S.; Muntoni, S. (Cagliari)
- 210 Cancer Nutrigenomics**  
Junien, C.; Gallou, C. (Paris)
- 270 Genetic Variation and Physical Performance**  
Payne, J.; Montgomery, H. (London)
- 303 Appendix I. Glossary of Genetic Terms**
- 312 Appendix II. Recommendations**
- 317 Author Index**
- 318 Subject Index**
