

CONTENTS

1. The Pathogenesis of Deficiency Disease	1
2. The Clinical Signs	28
3. Protein Deficiency	88
4. Caloric Deficiency and Starvation	122
5. Carbohydrate Metabolism, Including Diabetes mellitus and Myperinsulinism	137
6. Essential Fatty Acids	206
7. Choline Malnutrition	227
8. The Role of the Skeleton in Calcium and Phosphorus Metabolism	261
9. Iron Malnutrition	319
10. The Essential Trace Elements	344
11. Iodine Malnutrition	373
12. Sodium, Potassium, and Chloride Malnutrition, Including Water Balance and Shock	398
13. Vitamin A Malnutrition	475
14. Vitamin D and Rickets	506
15. Vitamin K Malnutrition	565
16. Thiamine Malnutrition	580
17. Riboflavin Malnutrition	604
18. Niacinamide Malnutrition and Pellagra	622
19. The Pteroylglutamates and Vitamin B12 in Nutrition	635
20. Vitamin C Malnutrition and Scurvy	656
21. Vitamin B6 (Pyridoxine)	691
22. Vitamin of Undetermined Clinical Importance	705
23. Principles of Nutrition Therapy	722
24. Diet and Ischemic Heart Disease	743
25. Dietary Prevention and Treatment of Hypercholesterolemia	787
26. Obesity	820
Appendix A	893
Appendix B	895
Appendix C	932
Appendix D	936
Appendix E	960
Index	989
