

## CONTENTS

I. The Glands of the Brain with Especial Reference to the Pituitary Gland	3
II. The Vascular Supply of the Hypophysis Cerebri of the Rhesus Monkey And Man.	48
III. The Cytology of the Pituitary Gland.	69
IV. The Proportions of the Various Subdivisions of the Normal Adult Human Hypophysis Cerebri And the Relative Number of the Different Types of Cells in Pars Distalis with Biometric Evaluation of Age and Sex Differences and Special Consideration of basophilic Invasion Into the Infundibular Process	118
V. Paths of Secretion from the Hypophysis	151
SECTION II	
VI. The Hypophyseal Growth Hormone Its Separation from the Hormones Stimulating the Thyroid Gonads Adrenal Cortex and Mammary Glands	175
VII. Relation of the Anterior Pituitary Growth Hormone to Protein Metabolism	193
VIII. The Influence of the Anterior Pituitary on Cranial Form and Structure; and the Significance Of Cranial Dysplasia in Clinical Diagnosis	222
IX. The Thyrotropic and Adrenotropic Hormones	239
X. The Pituitary Gonadotropic Hormones	247
XI. The Anterior Pituitary and the Metabolism of Acetone Bodies David Landsborough Thomson	257
XII. Anti-hormones	268
XIII. The Relation of the Anterior Pituitary to Carbohydrate Metabolism	276
XIV. Prolactin. Oscar Riddle and Robert	287
XV. The Relation of the Anterior Pituitary Gland to Problems of Puberty and of Menstruation	298
XVI. The Relation of the Pituitary Gland to Pregnancy and Labor.	321
XVII. The Menopause.	340
XVIII. Biologic Differences between Anterior Pituitary Sex Hormones and Gonadotropic Substances from Pregnant Women	350
XIX. The Influence of Light upon Pituitary Activity	361
XX. The Function of the Pars Tuberalis	377
XXI. The Pituitary Gland in Relation to Water Exchange	392
XXII. The Hypothalamico-hypophyscal Mechanism in Diabetes Insipidus	410
XXIV. The Posterior Lobe of the Pituitary Gland of the Whale; and Pituitrin and Its Fractions Pitressin and Pitocin	437
XXV. Studies on the Hypophysis Cerebri by Means of Tissue Cultures	463

XXVI. The Influence of the Anterior Lobe of the Pituitary on the Growth of Sarcoma and Carcinoma	466
XXVII. The Hypophysis and Resistance	471

### SECTION III

#### GENERAL CONSIDERATIONS

XXVIII. Distribution of Pituitary Syndromes in the United States	499
XXIX. The Influence of the Anterior Pituitary Gland upon Brain Body Relations	505
XXX. Relation of the Anterior Lobe to the Specific Dynamic Action of Protein	536
XXXI. Pituitary Disturbances in Relation to Personality	547
XXXII. Behavior Changes Produced in the Rat by Hypophysectomy	561
XXXIV. Pituitary Basophilism of Cushing-Syndrome of the Basophilic Adenoma	590
XXXV. The Clinical Features of Hypophyseal Cachexia (Simmonds Disease).	609
XXXVI. Constitutional and Genetic Reactions Associated with Modifications in the Pituitary Gland.	616+
XXXVII. Dystrophia Adiposogenitalis (Frohlich's Syndrome)	634
XXXVIII. Roentgen Therapy of Pituitary Tumors	651
XXXIX. The Surgical Treatment of Pituitary Tumors	665
XL Pituitary Dwarfism	683
XLI The Role of the Pituitary Gland in Compensatory Syndromes	688
XLII. Acromegaly	714
INDEX	725
LIST OF MEMBERS	755
