<i>Preface to the Technical Series</i>	xiii
<i>Preface</i>	xv
<i>List of Contributors</i>	xvii
<b>1 The Health Benefits of Bioactive Compounds from Milk and Dairy Products</b>	<b>1</b>
A. Kanekanian	
1.1 The importance of milk and dairy products	1
1.2 Dairy products: Concerns and challenges	2
1.3 Dairy products and public health	3
1.3.1 Heart disease	4
1.4 Major nutrients in milk	5
1.4.1 Proteins	5
1.4.2 Milk fat	6
1.4.3 Lactose and its derivatives	7
1.4.4 Vitamins and minerals	8
1.5 Dairy products as functional foods	8
1.6 Bioactive compounds from milk	11
1.6.1 Bioactive peptides	12
1.6.2 Other bioactivities	16
1.7 Probiotics and dairy products	17
1.8 Summary and future trends	18
References	18
<b>2 Bioactive Peptides from Casein and Whey Proteins</b>	<b>23</b>
R. McCarthy, S. Mills, R.P. Ross, G.F. Fitzgerald and C. Stanton	
2.1 Introduction	23
2.2 Direct effects of casein and whey peptides on host immunity	25
2.2.1 Immunomodulatory peptides derived from casein	25
2.2.2 Immunomodulatory peptides derived from whey proteins	30
2.2.3 Indirect effects of casein and whey peptides on host immunity	32
2.3 Antimicrobial peptides	33

2.3.1	Antimicrobial peptides derived from casein	33
2.3.2	Antimicrobial peptides derived from whey proteins	40
2.4	Peptides that stimulate the gut microbiota	42
2.5	Peptides that regulate gut homeostasis	44
2.6	Potential for peptide bioactivities <i>in vivo</i> and outlook for the future	45
	References	46
<b>3</b>	<b>Colostrum: Its Health Benefits</b>	<b>55</b>
	T. Marchbank and R.J. Playford	
3.1	Introduction	55
3.2	Bioactive constituents of colostrums	57
3.2.1	Peptide growth factors	57
3.2.2	Non-peptide growth factors	62
3.2.3	Immunological factors	63
3.3	Bovine colostrum use in human health	67
3.3.1	Gastrointestinal diseases	67
3.3.2	Non-gastrointestinal diseases	74
3.3.3	Colostrum and athletic performance	76
3.4	Considerations	79
3.5	Conclusion	81
	References	81
<b>4</b>	<b>Casein and Whey Proteins in Human Health</b>	<b>94</b>
	K. Petrotos, E. Tsakali, P. Goulas and A.G. D'Alessandro	
4.1	Introduction	94
4.2	Casein-derived proteins and their effect in human health	95
4.2.1	The cardiovascular system	97
4.2.2	The nervous system	100
4.2.3	The immune system	103
4.2.4	The nutrition system	106
4.3	Whey proteins and their direct and indirect effects on human health	108
4.3.1	$\beta$ -lactoglobulin	109
4.3.2	$\alpha$ -lactalbumin	112
4.3.3	Immunoglobulins	115
4.3.4	Bovine serum albumin	116
4.3.5	Lactoferrin	116
4.3.6	Lysozyme	118
4.3.7	Lactoperoxidase	119
4.3.8	Casein macropeptides	119
4.3.9	Other enzymes contained in the whey	120
4.4	The effect of processing on the bioactivity of casein and whey proteins	120
4.4.1	The effect of heat treatment	120
4.4.2	The effect of ultra-high-pressure processing	121
4.4.3	The effect of protein hydrolysis	121

4.4.4	The role of processing in the production of allergenic or bitter-tasting peptides	122
4.5	Bioactive peptides production from milk and whey proteins	123
4.5.1	Enzymatic hydrolysis	123
4.5.2	Microbial fermentation	123
4.5.3	Proteolysis	125
4.6	Fractionation and enrichment of bioactive peptides	127
4.7	Commercial applications and future outlook	128
4.8	Conclusion	130
	References	131
<b>5</b>	<b>Sports Nutrition and Dairy Products</b>	<b>147</b>
	G. Davison	
5.1	Introduction	147
5.2	Energy balance	149
5.3	Carbohydrates	149
5.3.1	Total dietary carbohydrate requirement	149
5.3.2	Dietary carbohydrate, exercise, immune function and infection risk in athletes	151
5.3.3	Dairy products as a source of dietary carbohydrate	151
5.3.4	Timing and composition of carbohydrate intake	152
5.3.5	Carbohydrate before and during exercise	152
5.3.6	Dairy products and carbohydrate intake before and during exercise	153
5.3.7	Carbohydrate intake after exercise	154
5.3.8	Dairy products and carbohydrate intake after exercise	154
5.4	Protein	155
5.4.1	Total dietary protein intake	155
5.4.2	Timing of protein intake and protein composition	156
5.4.3	Dairy products and dietary protein intake	156
5.5	Fluid and hydration	157
5.5.1	Fluid intake before exercise	158
5.5.2	Dairy products and total fluid intake	158
5.5.3	Fluid intake during exercise	159
5.5.4	Dairy products and fluid intake acutely before and during exercise	159
5.5.5	Fluid intake after exercise	160
5.5.6	Dairy products and post-exercise rehydration	160
5.6	Micronutrients	161
5.7	Bovine colostrum	163
5.7.1	Body composition and strength	163
5.7.2	Endurance performance	164
5.7.3	High-intensity exercise (i.e. sprint and repeated sprint) performance	165

5.7.4	Gastrointestinal integrity/health	166
5.7.5	Immunity	166
5.8	Probiotics	167
5.9	Summary	168
	Recommended further reading	169
	References	169
<b>6</b>	<b>Dairy Fat: Perceptions and Realities</b>	<b>174</b>
	A.L. Lock, D.I. Givens and D.E. Bauman	
6.1	Introduction	174
6.2	The dairy cow dimension	175
6.2.1	Rumen lipid metabolism	175
6.2.2	Milk fat synthesis	177
6.3	Saturated fatty acids	178
6.4	<i>Trans</i> fatty acids	180
6.5	Unsaturated fatty acids	183
6.5.1	Oleic acid	184
6.5.2	Omega-3 fatty acids	184
6.5.3	Conjugated linoleic acids	186
6.6	Dairy-derived fats in foods and human health	189
	References	192
<b>7</b>	<b>Milk Ingredients as Functional Foods</b>	<b>198</b>
	A.S. Kvistgaard, J.B. Schroder, E. Jensen, A. Setarehnejad and A. Kanekanian	
7.1	Infant nutrition	198
7.1.1	Milk ingredients and intestinal protection and maturation	198
7.1.2	Brain development and cognitive function in infant nutrition	201
7.2	Clinical nutrition	203
7.2.1	Immobility-caused muscle loss	203
7.2.2	Diabetes	205
7.2.3	Inflammatory bowel disease	207
7.3	Milk ingredients in sports nutrition	210
7.3.1	Muscle synthesis	211
7.3.2	Muscle strength	212
7.3.3	Endurance	212
7.3.4	Recovery	212
7.3.5	Body composition	213
7.3.6	Immunity	213
7.4	Milk ingredients in functional foods	213
7.4.1	Whey proteins and milk calcium for weight management	213
7.4.2	Milk phospholipids for cognitive performance in adults	214
7.4.3	Milk ingredients for natural defence	216

7.5	Milk protein and dental health	217
7.5.1	Dental erosion	218
7.5.2	Assessment of dental erosion	218
7.5.3	The protective effect of peptides	220
7.5.4	Assessment of dental protection	222
7.5.5	Summary	225
7.6	Conclusion	225
	References	226
<b>8</b>	<b>Milk-derived Bioactive Components from Fermentation</b>	<b>237</b>
	O.A. Alhaj and A. Kanekanian	
8.1	Introduction	237
8.2	Bioactive components in milk fat	238
8.2.1	Conjugated linoleic acid (CLA) as a bioactive component	238
8.3	Oligosaccharides as bioactive components in milk	239
8.4	Milk proteins as a source of bioactive peptides	240
8.4.1	Health benefits of milk proteins and their derived bioactive peptides	241
8.4.2	Peptide synthesis	242
8.4.3	Milk protein hydrolysate	242
8.5	Production and purification of bioactive peptides	250
8.6	Probiotic as bioactive component in milk	252
8.6.1	What are probiotics?	253
8.6.2	Probiotics concept	254
8.6.3	Characteristics of probiotics	254
8.6.4	Health benefits associated with fermented milk product consumption	259
8.6.5	Factors stimulating the growth and survival of <i>Bifidobacterium</i> spp.	260
8.6.6	The direct health benefits of probiotics: Mechanisms of action	262
8.6.7	Indirect health benefits of probiotics: Biogenic effect	264
8.7	Conclusion	268
	References	268
<b>9</b>	<b>Minerals and Vitamins in Milk and Dairy Products</b>	<b>289</b>
	I. Gordon	
9.1	Introduction	289
9.1.1	Mineral and vitamin needs	289
9.1.2	Bioavailability	290
9.1.3	Differences between minerals and vitamins	290
9.1.4	Caveat	290
9.2	Minerals in dairy products	291
9.2.1	Introduction	291
9.2.2	Milks	293

9.2.3	Fermented milks	296
9.2.4	Cheeses	297
9.2.5	Whey products	299
9.2.6	Butter fat	302
9.2.7	Commercial mineral concentrates	302
9.2.8	Applications	303
9.2.9	Summary	303
9.3	Vitamins in dairy products	303
9.3.1	Introduction	303
9.3.2	Cow milks	305
9.3.3	Fermented milks	307
9.3.4	Vitamin fortification of cow milks	308
9.3.5	Cheeses	308
9.3.6	Whey products	310
9.3.7	Butter fat	310
9.3.8	Summary	312
	References	312
<b>10</b>	<b>Legislations and Relevant Regulations</b>	<b>314</b>
	M. Hickey	
10.1	Background and introduction	314
10.2	The Japanese approach	315
10.2.1	Subsystems of FOSHU	317
10.2.2	Broad headings for approved FOSHU	317
10.2.3	Disease reduction risk FOSHU	317
10.2.4	Foods with nutrient function claims (FNCF)	318
10.2.5	Essential elements for obtaining FOSHU approval	318
10.3	The legislative situation in the European Union (EU)	324
10.3.1	Relevant EU food safety legislation	324
10.3.2	Claims and food labelling provisions	327
10.3.3	Nutrition and health claims	327
10.3.4	Types of health claims	328
10.3.5	Nutrient profiles	334
10.4	The US legislative situation regarding health claims and functional foods	335
10.4.1	Background to US federal legislation	335
10.4.2	Evolution and development of the FDA	337
10.4.3	Functional food and claims on food in the US	337
10.5	The Canadian legislative situation regarding health claims and functional foods	342
10.5.1	Introduction and background to Canadian federal legislation	342
10.5.2	Health claims on foods in Canada	342

10.6	Health claims for foods in Australia and New Zealand	348
10.6.1	The evolution of health and related claims in Australia and New Zealand	348
10.6.2	The Australia and New Zealand nutrient profiling model	351
10.6.3	Enforcement of the health claim proposals in Australia and New Zealand	354
10.7	Health foods and functional foods in China	354
10.7.1	Background	354
10.7.2	Chinese legislative structures	354
10.7.3	The healthy (functional) foods sector in China and its regulation	355
10.8	Codex Alimentarius	358
10.8.1	Background, structure, operation and role	358
10.8.2	Codex standards, their international relevance and their role in the WTO	359
10.8.3	Codex and the issue of health and nutrition claims	361
10.8.4	The Codex Standard for Fermented Milks	363
10.9	Other international developments	364
10.10	Summary and conclusions	365
	References	366
