Preface	xi
1 Oxidation in aquatic foods and analysis methods	1
<i>Magnea G. Karlsdottir, Holly T. Petty, and Hordur G. Kristinsson</i>	
1.1 Introduction	1
1.2 Analysis of lipid oxidation	2
1.3 Conclusions	16
References	16
2 Protein oxidation in aquatic foods	23
<i>Caroline P. Baron</i>	
2.1 Introduction	23
2.2 Mechanisms involved in protein oxidation	24
2.3 Impact of protein oxidation on aquatic food	30
2.4 Case studies	33
2.5 Conclusions and perspectives	38
References	38
3 Influence of processing on lipids and lipid oxidation in aquatic foods	43
<i>Sivakumar Raghavan and Hordur G. Kristinsson</i>	
3.1 Effect of freezing on lipid oxidation	43
3.2 Effect of salting and drying on lipid oxidation	49
3.3 Effect of fermentation on lipid oxidation	53
3.4 Effect of smoking on lipid oxidation	55
3.5 Effect of high-pressure processing on lipid oxidation	58
3.6 Effect of irradiation on lipid oxidation	61
3.7 Effect of microwave processing on lipid oxidation	63
3.8 Effect of modified atmosphere on lipid oxidation	65

3.9	Effect of pH shift extraction method on lipid oxidation	67
3.10	Effect of canning on lipid oxidation	70
	References	73
4	Strategies to minimize lipid oxidation of aquatic food products post harvest	95
	<i>Huynh Nguyen Duy Bao and Toshiaki Ohshima</i>	
4.1	Introduction	95
4.2	Lipid oxidation and quality deterioration in post-harvest aquatic food products	96
4.3	Post-harvest control of oxidative deterioration in aquatic food products	106
4.4	Conclusions and prospects	117
	References	118
5	Antioxidative strategies to minimize oxidation in formulated food systems containing fish oils and omega-3 fatty acids	127
	<i>Charlotte Jacobsen, Anna Frisenfeldt Horn, Ann-Dorit Moltke Sørensen, K. H. Sabeena Farvin, and Nina Skall Nielsen</i>	
5.1	Introduction	127
5.2	The lipid oxidation process	128
5.3	Factors affecting lipid oxidation in omega-3-enriched foods	129
5.4	Introduction to antioxidants	131
5.5	Antioxidant effects in different omega-3-enriched food products	132
5.6	Other strategies to protect omega-3 products against oxidation	145
5.7	Conclusions	145
	References	146
6	Methods for assessing the antioxidative activity of aquatic food compounds	151
	<i>Holmfridur Sveinsdottir, Patricia Y. Hamaguchi, Hilma Eidsdottir Bakken, and Hordur G. Kristinsson</i>	
6.1	Background	151
6.2	Oxidation and antioxidants	153
6.3	Methods for determining antioxidant activity	157
	References	169
7	Influence of fish consumption and some of its individual constituents on oxidative stress in cells, animals, and humans	175
	<i>Britt Gabrielsson, Niklas Andersson, and Ingrid Undeland</i>	
7.1	Introduction	175
7.2	What is oxidative stress?	176
7.3	Why is oxidative stress of importance and how does it link to diet?	177
7.4	How is oxidative stress measured?	178
7.5	Do components in fish affect oxidative stress?	182

7.6	Effects of fish intake on biomarkers used to evaluate oxidative stress	195
7.7	Methodological considerations	200
7.8	Conclusion and need for future studies	202
	References	204
8	Marine antioxidants: polyphenols and carotenoids from algae	219
	<i>Kazuo Miyashita</i>	
8.1	Introduction	219
8.2	Chain-breaking antioxidants	220
8.3	Antioxidants and their beneficial health effects	221
8.4	Seaweeds as a rich source of antioxidants	222
8.5	Algal polyphenols	222
8.6	Marine carotenoids	224
8.7	Antioxidant activity of carotenoids	225
8.8	Astaxanthin and fucoxanthin	226
8.9	Conclusions	228
	References	229
9	Fish protein hydrolysates: production, bioactivities, and applications	237
	<i>Soottawat Benjakul, Suthasinee Yarnpakdee, Theeraphol Senphan, Sigrun M. Halldorsdottir, and Hordur G. Kristinsson</i>	
9.1	Introduction	237
9.2	Source of fish protein hydrolysates	238
9.3	Production of fish protein hydrolysate	241
9.4	Properties of hydrolysate	255
9.5	Applications of fish protein hydrolysates	263
	References	266
10	Antioxidant properties of marine macroalgae	283
	<i>Tao Wang, Rosa Jonsdottir, Gudrun Olafsdottir, and Hordur G. Kristinsson</i>	
10.1	Introduction	283
10.2	Antioxidant properties of algal polyphenols	284
10.3	Antioxidant activity of algal sulfated polysaccharides	298
10.4	Antioxidant activities of fucoxanthin	302
10.5	Antioxidant activities of sterols from marine algae	304
10.6	Antioxidant activities of peptides derived from marine algae	306
10.7	Antioxidant activity of mycosporine-like amino acids	307
10.8	Concluding remarks	310
	References	311
	Index	319
