

CONTENTS

Part 1: Nutrition and Diet for a Healthy Lifestyle	1
1 Nutrition and Diet for Healthy Lifestyles in Europe	3
2 dietary Advice in North America: the Good, the Bad and the Unheeded	13
Part 2: Chemistry, Structure and Rheology	23
3 Light Microscopic Investigations on Dietary Fibre	25
4 Assembly and Rheology of Non-starch Polysaccharides	30
5 The Structures and Architectures of Plant Cell Walls Define Dictary Fibre Composition and the Textrures of Foods	42
Part 3: Measurement of Dietary Fibre and Dietary Fibre Components	61
6 What is Dietary Fibre? A New Look at the Definition	63
7 Development of Dietary Fibre Methodology	77
8 Measurement of dietary Fibre Components: the Importance of Enzyme Purity, Activity and Specificity	89
9 In-vivo and In-vitro Methods for Resistant Starch Measurement	106
Part 4: Regulatory Issues	121
10 Analytical Issues Regarding the Regulatory Aspects of Dietary Fibre Nutrition Labelling	123
11 Regulatory Issues Relating to Dietary Fibre in the European Context	139
Part 5: Health Benefits of Dietary Fibre	147
12 Dietary Fibre in Health and Disease	149
13 Dietary Fibre Carbohydrate Metabolism and Chronic Disease	162
14 Dietary Fibre and Gastrointestinal Function	168
15 Dietary Fibres and Dietary Lipids	177
16 Food Polysaccharides, Glucose Absorption and Insulin Sensitivity	186
17 Fermentation of Oligosaccharides and Influences of Fermentation Products	197
18 Cholesterol-lowering Properties of Cereal Fibres and fractions	206
19 Effects of Psyllium on Serum Cholesterol Levels	221
20 Non-digestible Carbohydrates and Gut Function: Implications for Carcinogenesis	226
21. Cereal Fibre and Heart Disease	232
Part 6: Technological Aspects	237
22 Developing Fibre-rich Foods in the Twenty-first Century	239
23 Technological Aspects of Dietary Fibre	248
24 Oatrim and NutrimX: Tecnolokgical Development and Nutritional Properties	270
25 Effect of Processing on the Properties of Dietary Fibre	277
26 Fibres and Fibre Blends for Individual Needs: a Physiological and Technological Approach	283
Part 7: Cereal Cell-Wall Polysaccharides	299

27 Cereal Arabinoxylan: Occurrence, Structure and Properties	301
28 Cereal β -Glucans: Structure, Properties and Health Claims	315
Part 8: Legume-seed Polysaccharides	329
29 Novel Galactomannans and Galacto-manno-oligosaccharides from Guar	331
30 Physiological and Technological Functions of Partially Hydrolysed Guar Gum (Modified Galactomannans)	345
31 Dietary Fibres of Lupins and Other Grain Legumes	361
Part 9: Pectins	367
32 Pectins, their Origin, Structure and Functions	369
33 Chemistry and Enzymology of Pectins	379
Part 10: Resistant Starch	399
34 Resistant Starch: Plant breeding, Applications Development and commercial Use	401
35 In-vivo and In-vitro Digestion of Resistant Starch	413
36 Resistant Starch: Health Aspects and Food Uses	424
37 Structural Features of resistant Starch	430
Part 11: Other Polysaccharides	441
38 Nutritional Benefits of Larch Arabinogalactan	443
Part 12: Oligosaccharides	453
39 Non-digestible Oligosaccharides and polysaccharides: Their Physiological Effects and Health Implications	455
40 Development and Beneficial Effects of Fructo-oligosaccharides (Neosugar)	471
41 Fructo-Oligosaccharides and Other Fructans: Chemistry, Structure and nutritional Effects	480
42 Galacto-oligosaccharides: Properties and Health Aspects	494
43 Polydextrose: Analysis and Physiological Benefits	503
44 Fibersol-2: a Soluble, Non-digestible, Starch-derived Dietary Fibre	509
Index	525
