# Table of Contents

## **PART I    *Supercritical Fluid Extraction Technology***

### **Chapter 1**

Supercritical Fluid Technology for Extraction of Bioactive Components.....3

*John Shi, Lamin S. Kassama, and Yukio Kakuda*

### **Chapter 2**

Solubility of Food Components and Product Recovery in the  
Supercritical Fluid Separation Process.....45

*John Shi and Xiaoqin Zhou*

### **Chapter 3**

Modeling of Supercritical Fluid Extraction of Bioactives from  
Plant Materials.....7.5

*Helena Sovova'*

### **Chapter 4**

Biochemical Reactions in Supercritical Fluids..... 111

*Željko Knez, Chiara G. Laudani, Maja Habulin, Mateja Primožič*

## **PART II    *Pressurized Low Polarity Water Extraction, Membrane Separation, Distillation, and Dehydration Technologies***

### **Chapter 5**

Pressurized Low Polarity Water Extraction of Biologically Active  
Compounds from Plant Products ..... 135

*Juan Eduardo Cacace and Giuseppe Mazza*

### **Chapter 6**

Purification of Orange Peel Oil and Oil Phase by Vacuum Distillation..... 157

*Mércia de Fa'tima M. Bettini*

**Chapter 7**  
Dehydration Technologies to Retain Bioactive Components ..... 173  
*Valérie Orsat and G. S. Vijaya Raghavan*

**Chapter 8**  
Membrane Separation Technology in Processing Bioactive Components ..... 193  
*Ashwani Kumar*

### ***PART III    Bioprocessing Technology***

**Chapter 9**  
Bioprocessing Technology for Production of Nutraceutical Compounds ..... 211  
*Terry H. Walker; Caye M. Drapcho, and Feng Chen*

**Chapter 10**  
Microbial Modeling as Basis for Bioreactor Design for  
Nutraceutical Production ..... 237  
*Caye M. Drapcho*

### ***PART IV    Preservation and Packaging Technologies***

**Chapter 11**  
Food Pasteurization and Sterilization with High Pressure ..... 269  
*Alberto Bertucco and Sara Spilimbergo*

**Chapter 12**  
Microencapsulation and Delivery of Omega-3 Fatty Acids ..... 297  
*Luz Sanguansri and Mary Ann Augustin*

**Chapter 13**  
Packaging Technologies of Functional Foods ..... 329  
*Louise Deschênes*

### ***PART V    Antioxidant Properties and Material***

**Chapter 14**  
Biological Antioxidation Mechanisms: Quenching of Peroxynitrite ..... 341  
*Aditya Kulkarni and Hideo Etoh*

**Chapter 15**

Stability of Lycopene During Food Processing .....353

*John Shi, Yukio Kakuda, Yueming Jiang, and Gauri S. Mittal*

**Chapter 16**

Fruits with High Antioxidant Activity as Functional Foods .....371

*Shiow Y. Wang*

**Index**..... 4 15
