

CONTENTS

1 Introduction	1
2 Manganese in the Ecosystem	3
3 manganese and Plants	51
4 Input and disposition Manganese in Man	77
5 Biochemistry and Metabolic Role of Manganese	83
6 Manganese Toxicity and Catecholamines	92
7 Epidemiology of Manganese Intoxication	101
8 Permissible Air Concentrations of Manganese	114
9 Neurobehavioral Effects of manganese Deficiency and Toxicity	116
10 Manganese Tricarbonyl Compounds	126
11 Conclusions	132
12 recommendations for Future Research	137
Appendix: Environmental Sampling and Analysis of Manganese	141
References	149
Index	181
