

CONTENTS

PART I

THE OCCURRENCE OF MERCURY IN THE ENVIRONMENT AND MAN

| | |
|--|----|
| Sources of Mercury in the Environment | 5 |
| Some Estimates of Natural Levels of Mercury in the Environment | 25 |
| The Mercury Pollution Problem in Michigan | 29 |
| Mercury in Fish in the Great Lakes | 31 |
| Survey of Mercury Concentrations in Fishes | 38 |
| Mercury in Wild Animals | 46 |
| Mercury levels in Wisconsin fish | 58 |
| Investigation of Mercury Contamination in the Tennessee Valley Region | 76 |
| Distribution of Mercury in the Environment of Minamata Bay and the Inland Ariake Sea | 79 |
| Mercury Levels in a Sample of Michigan Residents | 82 |
| Mercury in Humans in the Great Lakes Region | 86 |
| The Occurrence of Mercury in the Environment and Man | 90 |

PART II

METHODS OF ANALYSIS

| | |
|---|-----|
| Methods of Analysis for Mercury and Its Compounds: A Review | 97 |
| Preparation of Biological Samples for Neutron Activation Analysis of Mercury | 137 |
| Mercury Content of Canadian Foods and Cereals Determined by Different Methods | 141 |
| A Simple, Rapid Method for the Determination of Trace Mercury in Fish via Neutron Activation Analysis | 146 |
| Determination of Mercury by Non-Destructive Neutron Activation Analysis | 151 |
| Determination of Mercury in Biological Tissues | 153 |
| The Determination of Ethylmercury in Blood | 155 |
| The determination of Mono and Diethylmercury Compounds by Gas Chromatography | 157 |
| Analytical methodology for Mercury | 161 |

PART IV

BIOLOGICAL EFFECTS OF MERCURY COMPOUNDS

| | |
|--|-----|
| Dose-Response Relationship Associated with Known Mercury Absorption at Low Dose Levels of Inorganic Mercury | 207 |
| Surface Electromyography in Chronic Inorganic Mercury Intoxication | 222 |
| Biotransformation of Organo-Mercurials in Mammals | 229 |
| The Binding of Inorganic and Organic Mercury Compounds (^{203}Hg) to Constituents of Normal Human Blood | 239 |
| Biological Reactions and Pathological Changes in Mercury Contamination | 247 |
| The Dose-Response Relationship Resulting From Exposure to Alkyl Mercury Compounds | 290 |

| | |
|---|-----|
| The Relationship Between Mercury Concentration in hair and the Onset of Minamata Disease | 302 |
| Organic Mercury Poisoning in Alamogordo New Mexico | 304 |
| Survival and Reproduction of ring-necked Pheasants Consuming Two Mercurial Fungicides | 306 |
| Dose-Response Relationships After Exposure of Swine to Organo-Mercurial Compounds | 318 |
| Detection and Appraisal of Subclinical Intoxications | 319 |
| Approaches to the Detection of Subclinical Mercury Intoxications: Experience in Minamata, Japan | 325 |
| Mercury Concentrations in Human Tissues Among Heavy Fish Eaters | 329 |
| Epidemiological Approaches to the Study of Subclinical Effects of Mercury Intoxication | 331 |
| Biological Effects of Mercury Compounds | 341 |
| Index | 347 |
