	PAGE
Introduction - - - - -	1
Preliminary Demonstrations	
PART I	
Preliminary Exercise - - - - -	31
Assignment of Tables and Permanent Apparatus - - - - -	31
Experiment I:	
Ether (Action on the Central Nervous System—Cerebrum) - - - - -	47
Chloroform (Action on the Central Nervous System—Optic Lobes) - - - - -	48
Ether, Ethyl Chloride, Chloroform, Ethyl Bromide (Irritability and Conductivity of Nerve) - - - - -	49
Ethyl Chloride (Local Anesthesia) - - - - -	55
Experiment II:	
Ether (Action on the Heart—Dissection for the Vagus Nerve in Frog) - - - - -	56
Chloroform (Action on the Frog's Heart) - - - - -	61
Chloroform (Action on Lymph Hearts) - - - - -	61
Experiment III:	
Turtle: Vagus Dissection (Action of Ether on the Heart) - - - - -	62
Chloroform (Action on the Turtle's Heart) - - - - -	65
Experiment IV:	
Ether, Chloroform, Ethyl Bromide (Dog: Respiration, Blood Pressure, Cervical Vagi, and Sympathetics) - - - - -	65
Experiment V:	
Ether, Adrenalin, Acetylcholine Bromide, Barium Chloride, Chloroform (Dog: Stomach Contractions, Blood Pressure, Respiration, Pupil) - - - - -	89
Experiment VI:	
Ether, Adrenalin, Carbon Dioxide, Ephedrine (Dog: Nasal Sinuses, Jugular Veins, Blood Pressure, Respiration) - - - - -	94
Experiment VII:	
Ether, Chloroform, Ethyl Bromide (Dog: Motor Areas, Blood Pressure, Blood, Heart) - - - - -	104
Experiment VIII:	
Nitrous Oxide, Carbon Dioxide, Oxygen (Frog: Central Nervous System) - - - - -	114
Experiment IX:	
Nitrous Oxide, Ethylene, Acetylene, Cyclopropane, Ethyl Chloride, Ethyl Bromide, Carbon Dioxide, Increased Atmospheric Pressure (Decreased Atmospheric Pressure) (Frog, Guinea Pig, Rat, Kitten, or Pup) - - - - -	117
Experiment X:	
The Closed Method of Anesthesia for Ether, Chloroform, Ethyl Chloride, Ethyl Bromide (Nitrous Oxide, Acetylene, Ethylene, Cyclopropane, etc.), Somnoform, etc., with Oxygen. Student Method. (Dogs or Cats) - - - - -	121

	PAGE
Experiment XI:	
Intratracheal Insufflation . . . . .	126
Experiment XII:	
Ethylene, Acetylene, Cyclopropane, Adrenalin, Sodium Citrate (Dog: Anesthesia, Blood Pressure, Respiration, Stomach Contractions) . . . . .	129
Experiment XIII:	
Trichlorethylene (Rat, Mouse, Guinea Pig, Pigeon or Frog: General Symptoms and Anesthesia) . . . . .	136
Experiment XIV:	
Vinethene (Divinyl Ether) (Rat, Mouse, Guinea Pig, Pigeon, or Frog: General Symptoms and Anesthesia) . . . . .	137
Experiment XV:	
Vinethene, Trichlorethylene (Man: Odor, Mild Effects of the Drugs) . . . . .	138
Experiment XVI:	
Ether, Chloroform, Adrenalin, Glucose (Dog: Blood Pressure, Respiration, Cervical Vagi and Sympathetic, Intratracheal Injection of Adrenalin, Asphyxia of Heart, Etc.) . . . . .	139
Experiment XVII:	
Ether, Sodium Citrate, Chloroform, Ethyl Bromide, Eserine (Dog: Motor Areas, Blood Pressure, Respiration, Stomach Contractions) . . . . .	145
Experiment XVIII:	
Alcohol (Frog: Central Nervous System, Heart and Vagosympathetic Nerve) . . . . .	153
Experiment XIX:	
Alcohol (Turtle: Heart and Vagus Nerve) . . . . .	154
Experiment XX:	
Ethyl Alcohol, Brandy, Whiskey, Wine, Methyl Alcohol, Amyl Alcohol (Dog: Blood Pressure, Respiration, Esophagus) . . . . .	155
Experiment XXI:	
Whiskey or Brandy (Reaction Time) . . . . .	160
Experiment XXII:	
Alcohol, Whiskey, Brandy, Wine (Dog or Cat: Myocardiographic Tracings, Cardiac Sympathetic Nerves) . . . . .	163
Experiment XXIII:	
Antiseptic Action of Alcohol . . . . .	171
Experiment XXIV:	
Alcohol, Brandy, Urethane, Chloral (Dog: Blood Pressure, Respiration, Cerebro- spinal Fluid, Kidney, or Spleen) . . . . .	171
Experiment XXV:	
Chloral Hydrate, Urethane, Paraldehyde, Chloretone, Pentothal, Evipal (Frogs: Central Nervous System) . . . . .	178
Experiment XXVI:	
Chloral Hydrate (Action on the Frog's Heart) . . . . .	179
Experiment XXVII:	
Chloral Hydrate (Frog: Retinal Circulation With the Ophthalmoscope) . . . . .	179

CONTENTS

PAGE

Experiment XXVIII:	18
Chloral Hydrate, Adrenalin (Turtle's Heart) - - - - -	18
Experiment XXIX:	
Chloral Hydrate and Alkalies - - - - -	18
Experiment XXX:	
Evipal, Pentothal (Dog: Intravenous Anesthesia, General Symptoms) - - - - -	18
Experiment XXXI:	
Barbiturates, Avertin, Carbon Monoxide, Calcium Chloride (Dog: Blood Pressure, Respiration, Heart, Intravenous Anesthesia, Blood Spectrum) - - - - -	185
Experiment XXXII:	
Morphine (Frog: Central Nervous System) - - - - -	19
Experiment XXXIII:	
Thebaine, Codeine (Frog: Central Nervous System) - - - - -	19
Experiment XXXIV:	
Morphine (Chemical Test for Morphine) - - - - -	19
Experiment XXXV:	
Morphine (Dog: Respiration, Excretion, Pupils, Central Nervous System, General Symptoms) - - - - -	193
Experiment XXXVI:	
Fehling's Test for Reducing Bodies - - - - -	194
Experiment XXXVII:	
Morphine (Cat: General Symptoms, Central Nervous System) - - - - -	196
Experiment XXXVIII:	
Morphine, Codeine (Dog: Respiration, Blood Pressure, Oxygen Consumption, Urine) - - - - -	196
Experiment XXXIX:	
Morphine, Codeine, Pantopon, Heroine, Peronine, Dionine, Narcotine or Thebaine (Spinal Dog: Bronchioles) - - - - -	207
Experiment XL:	
Heroine or Codeine (Spinal Dog: Blood Pressure, Lung Volume and Bladder Contractions) - - - - -	216
Experiment XLI:	
Morphine, Codeine, Heroine, Dilaudid, Dionine (Mouse: General Symptoms and Detection of Drug) - - - - -	225
Experiment XLII:	
Strychnine (Frog: Action on the Cord) - - - - -	226
Experiment XLIII:	
Strychnine (Frog: Heart and Vagosympathetic Nerve) - - - - -	229
Experiment XLIV:	
Strychnine (Turtle: Heart and Vagus Nerve) - - - - -	229
Experiment XLV:	
Strychnine (Dog: Blood Pressure, Respiration, and Kidney, Spleen or Intestinal Loop) - - - - -	220

	PAGE
Experiment XLVI:	
Strychnine (Ether, Morphine, Chloral Hydrate, Evipal, Pentothal) (Dog: Blood Pressure, Respiration, Oxygen Consumption, Air Embolism) - - - - -	233
Experiment XLVII:	
Strychnine (Student: Reaction Time) - - - - -	236
Experiment XLVIII:	
Picrotoxin (Frog: Action on Medulla and Cord) - - - - -	236
Experiment XLIX:	
Picrotoxin, Chloretone (Dog: Blood Pressure, Respiration and Kidney, Spleen or Intestinal Loop Volume) - - - - -	238
Experiment L:	
Metrazol (Dog: General Symptoms as Produced in Treatment of Schizophrenia) (Coramine, Picrotoxin) - - - - -	241
Experiment LI:	
Coramine, Metrazol, Camphortetrazol, Evipal, Pentothal (Dog: Blood Pressure, Respiration, General Action) - - - - -	245
Experiment LII:	
Pentothal, Camphortetrazol, Metrazol, Bulbocapnine, Picrotoxin (Dog: Blood Pressure, Respiration, General Symptoms) - - - - -	250
Experiment LIII:	
Hydrastine (Frog: Spinal Cord) - - - - -	255
Experiment LIV:	
Hydrastine (Frog: Heart and Vagus Nerve) - - - - -	256
Experiment LV:	
Hydrastine (Turtle: Heart and Vagus Nerve) - - - - -	258
Experiment LVI:	
Caffeine (Frog: Central Nervous System, Muscles) - - - - -	258
Experiment LVII:	
Caffeine (Frog: Muscle and Nerve) - - - - -	260
Experiment LVIII:	
Caffeine (Frog: Heart and Vagus Nerve) - - - - -	260
Experiment LIX:	
Caffeine (Turtle: Heart and Vagus Nerve) - - - - -	260
Experiment LX:	
Caffeine (Man: Reaction Time) - - - - -	260
Experiment LXI:	
Caffeine (Frog: Muscular Work) - - - - -	261
Experiment LXII:	
Caffeine (Rabbit: Diuresis, Cervical Nerves, Depressor) - - - - -	262
Experiment LXIII:	
Caffeine, Sodium Sulfate (Dog: Blood Pressure, Diuresis, Respiration, Sciatic Nerve) - - - - -	264

	PAGE
Experiment LXIV:	
Diuretin (Sodium-theobromine-salicylate), Agurin (Sodium-theobromine-acetate) (Rabbit: Diuresis and Respiration) - - - - -	268
Experiment LXV:	
Urea, S. A. Matthews' Solution, or Saline Diuretics (Rabbit or Cat: Diuresis) -	268
Experiment LXVI:	
Curara (Frog: General Action, Claude Bernard's Experiment) - - - - -	269
Experiment LXVII:	
Curara (Frog: Heart and Vagosympathetic Nerve) - - - - -	270
Experiment LXVIII:	
Curara (Turtle: Heart and Vagus Nerve) - - - - -	270
Experiment LXIX:	
Curara, Strychnine (Dog or Cat: Blood Pressure, Respiration, Urine, Sciatic Nerve. Dog: Salivary Ducts and Nerves) - - - - -	270
Experiment LXX:	
Coniine (Frog: Heart and Vagus Nerve) - - - - -	274
Experiment LXXI:	
Coniine (Turtle: Heart and Vagus Nerve, Lungs and Sympathetic Nerves) - -	274
Experiment LXXII:	
Coniine (Dog: Blood Pressure, Respiration, Salivary Glands and Kidney, Spleen or Intestinal Loop) - - - - -	277
Experiment LXXIII:	
Atropine (Frog: Heart and Vagus Nerve) - - - - -	281
Experiment LXXIV:	
Atropine (Frog: Muscle and Nerve) - - - - -	281
Experiment LXXV:	
Atropine (Turtle: Heart and Vagus Nerve) - - - - -	
Experiment LXXVI:	
Atropine (Cat, Guinea Pig, Rat, Dog, Pigeon, or Chicken: Pupil) - - - - -	
Experiment LXXVII:	
Atropine (Dog, Cat, or Rabbit: Blood Pressure, Respiration, Heart and Vagus Nerve. Dog: Salivary Secretion and Chorda Tympani, Sweat Nerves, Pan- creatic Secretion) - - - - -	282
Experiment LXXVIII:	
Scopolamine (Frog: General Symptoms) - - - - -	285
Experiment LXXIX:	
Pilocarpine, Atropine (Frog: Heart and Vagus Nerve) - - - - -	286
Experiment LXXX:	
Acetylcholine, Pilocarpine or Arecoline and Atropine (Frog: Retinal Circulation)	286
Experiment LXXXI:	
Pilocarpine or Arecoline and Atropine (Dog, Cat, Rabbit, and Pigeon or Chicken: Pupil) - - - - -	287

	PAGE
Experiment LXXXII:	
Pilocarpine, Atropine (Dog: Blood Pressure, Respiration, Salivary and Pancreatic Secretions) - - - - -	287
Experiment LXXXIII:	
Pilocarpine, Arecoline, Adrenalin, Atropine, and Barium (Dog: Bladder, Intestine, Respiration, Blood Pressure) - - - - -	289
Experiment LXXXIV:	
Methylene Blue, Propadrine, Synephrin, Neosynephrin, Histamine (Dog: Blood Pressure, Respiration, Bladder and Stomach Contractions, Nasal Records) -	293
Experiment LXXXV:	
Pilocarpine, Adrenalin, Arecoline, Atropine, Barium (Spinal Dog: Blood Pressure and Bronchioles) - - - - -	301
Experiment LXXXVI:	
Sodium Amytal, Pentothal Sodium, Nicotine, Eserine, Prostigmin, Adrenalin (Dog: Respiration, Blood Pressure, Bronchioles, Respirator) - - - - -	311
Experiment LXXXVII:	
Sodium Amytal or Other Barbiturate, Ether, Arecoline, Atropine, Narcotine, Benzdrine (Dog: Blood Pressure, Bronchioles, Respirator, Lung Movements, Pulmonary Blood Pressure) - - - - -	318
Experiment LXXXVIII:	
Nicotine (Frog: General Symptoms) - - - - -	323
Experiment LXXXIX:	
Nicotine (Frog: Heart and Vagus Nerve) - - - - -	323
Experiment XC:	
Nicotine (Turtle: Heart and Vagus Nerve) - - - - -	324
Experiment XCI:	
Nicotine (Turtle: Lungs) - - - - -	324
Experiment XCII:	
Nicotine, Arecoline, Atropine (Dog: Blood Pressure, Respiration, Limb Volume, Intestinal Contraction) - - - - -	326
Experiment XCIII:	
Nicotine, Adrenalin, Pilocarpine, Atropine (Dog: Blood Pressure, Intraocular Pressure, Respiration and Kidney, Spleen or Intestinal Loop Volume) -	330
Experiment XCIV:	
Nicotine, Adrenalin, Barium (Dog: Pulmonary Blood Pressure, Carotid Pressure)	334
Experiment XCV:	
Nicotine, Pilocarpine, Atropine (Dog: Intraocular Nerves, Salivary Glands, Oxygen Consumption, Blood Pressure and Respiration) - - - - -	346
Experiment XCVI:	
Action of Heart Valves—Heart of Beef, Horse, or Hog - - - - -	351
Experiment XCVII:	
Lobeline (Frog or Turtle: Heart and Inhibitory Nerves) - - - - -	354
Experiment XCVIII:	
Lobeline, Pilocarpine (Turtle: Lung Tracing) - - - - -	355

Experiment XCIX:		
Acetylcholine, Prostigmin, b-Phenylethylamine Hydrochloride, Methoxy-trimethylpropenyl Ammonium Bromide (Ed. 362) (Turtle: Lung Tracings)	-	356
Experiment C:		
Lobeline, Adrenalin, Pilocarpine, Tetramethylammonium Chloride (Dog: Bladder Contraction, Blood Pressure, Respiration, Pupil)	- - - - -	357
Experiment CI:		
Lobeline, Nicotine, Pilocarpine (Guinea Pig, Cat, Dog, or Rabbit: Uterine Strip)		363
Experiment CII:		
Carbon Dioxide, Acetylcholine, Methoxytrimethylpropenyl Ammonium Bromide (Ed. 362), Prostigmin, Atropine, Neosynephrin (Dog: Blood Pressure, Heart, Intestinal Contractions)	- - - - -	366
Experiment CIII:		
Acetylcholine, Benzedrine, Oetin, Arecoline (Frog or Turtle: Heart or Muscle Electric Currents, Capillary Electrometer)	- - - - -	374
Experiment CIV:		
Adrenalin, Lobeline, Nicotine, Pilocarpine, Atropine (Guinea Pig, Rabbit, Dog, Cat, Frog: Intestinal Segment)	- - - - -	379
Experiment CV:		
Muscarine, Atropine (Turtle: Lung Tracings)	- - - - -	380
Experiment CVI:		
Eserine, Adrenalin, Mecholyl, Atropine, Benzedrine Sulfate (Amphetamine Sulfate) (Bullfrog: Stomach Reactions—Patterson's Experiment)	- - - - -	380
Experiment CVII:		
Physostigmine (Frog: Heart Tracing)	- - - - -	382
Experiment CVIII:		
Physostigmine, Atropine (Sodium Nitrite) (Frog: Stomach Ring)	- - - - -	382
Experiment CIX:		
Physostigmine (Turtle: Heart Tracing)	- - - - -	383
Experiment CX:		
Physostigmine (Adrenalin, Atropine) (Turtle: Lung Tracing)	- - - - -	383
Experiment CXI:		
Physostigmine, Hyoscine, Adrenalin (Trimethylamine) (Dog: Respiration, Blood Pressure, Intestinal Contractions)	- - - - -	384
Experiment CXII:		
Oetin, Neosynephrin, Ephedrine, Propadrine, Mecholyl (Dog: Stomach Contractions, Blood Pressure, Respiration, Pupils, Nose)	- - - - -	386
Experiment CXIII:		
Adrenalin, Sodium Nitrite, Barium Chloride (Dog, Cat or Rabbit: Perfusion of Kidney)	- - - - -	392
Experiment CXIV:		
Lycopodium Spores, Prostigmin, Adrenalin, Glucose (Dog: Pulmonary Blood Pressure, Carotid Blood Pressure)	- - - - -	394

Experiment CXV:		
Lobeline, Cyanide, Sodium Sulfide, Carbon Dioxide (Dog: Carotid Sinus, Inter-carotid Body, Aortic Nerve, Aortic Body, Blood Pressure, Respiration)	-	400
Experiment CXVI:		
Carotid Sinus Reactions in Man (Student)	- - - - -	409
Experiment CXVII:		
Lobeline, Nicotine, Cyanide, Caffeine, Strychnine, Ephedrine (Dog: Carotid Sinus and Carotid Body, Aortic Nerve and Aortic Body, Blood Pressure, Respiration, Superior Laryngeal Nerve)	- - - - -	411
Experiment CXVIII:		
Acetylcholine Bromide, Prostigmin, Atropine, Barium Chloride (Dog: Blood Pressure, Respiration, Vagus Endings)	- - - - -	419
Experiment CXIX:		
Benzedrine (Amphetamine), Epinephrine, Ephedrine, Neosynephrin, Propadrine (Frog: Ciliary Movement and Toxicity)	- - - - -	424
Experiment CXX:		
Ether, Novocaine, Butyn, Diothane (Dog: Tracheal Intubation, Local Anesthetization)	- - - - -	426
Experiment CXXI:		
Acetylcholine, Adrenalin (Dog: Heart, Parasympathetic and Sympathetic Actions)		430
Experiment CXXII:		
Morphine, Dico did, Nembutal, Eserine, Metrazol, Coramine, Camphortetrazol, Propadrine, Ether (Dog: Cheyne-Stokes Respiration, Blood Pressure, Intracranial Pressure, Stomach Contractions, Resuscitation)	- - - - -	435
Experiment CXXIII:		
Bulbocapnine, Benzedrine, Cocaine (Rabbit or Guinea Pig: Central Nervous System, Narcosis, Stimulation)	- - - - -	445
Experiment CXXIV:		
Bulbocapnine, Benzedrine, Cocaine (Dog: Blood Pressure, Respiration, Central Nervous System, Intraesophageal Pressure)	- - - - -	446
Experiment CXXV:		
Trichlorethylene, Ether, Octin, Adrenalin (Dog: Respiration, Blood Pressure, Esophagus, Foreleg Movements, Auricular Fibrillation, Vagus Inhibition, Ventricular Fibrillation, Resuscitation)	- - - - -	452
Experiment CXXVI:		
Physostigmine, Atropine (Heroine), Adrenalin (Spinal Dog or Cat: Bronchioles, Blood Pressure, and Bladder Contractions)	- - - - -	460
Experiment CXXVII:		
Cocaine (Frog: Central Nervous System)	- - - - -	463
Experiment CXXVIII:		
Cocaine, Physostigmine (Rabbit, Cat, Dog, Pigeon, Sparrow, Chicken, Rat: Action on Pupil)	- - - - -	463
Experiment CXXIX:		
Cocaine. Novocaine (Local Anesthetic Action)	- - - - -	463

Experiment CXXX:	
Cocaine (Frog or Turtle: Heart Tracing) - - - - -	464
Experiment CXXXI:	
Cocaine (Frog: Action on Muscular Work) - - - - -	465
Experiment CXXXII:	
Cocaine, Novocaine, Barium, Adrenalin (Dog or Cat: Respiration, Blood Pressure, Intraocular Pressure, Local Vascular Action and Intestinal Contractions) - - - - -	465
Experiment CXXXIII:	
Novocaine (Dog: Spinal Anesthesia) - - - - -	467
Experiment CXXXIV:	
Strychnine, Digitalis, Cantharidin, Phenolphthalein, Elaterin, Morphine, Benzadrine, Brucine, Vitamin E (Daphnia Magna: Circulation, Central Nervous System, Locomotion, Digestion, Respiration, Reproduction, Gall Bladder, etc.)	473
Experiment CXXXV:	
Histamine, Acetylcholine, Acids, Alkalies, Piperidine, Neosynephrin, Benzadrine, Prostigmin (Decerebrate Pigeon: Crop and Gizzard Contractions, Hunger Contractions) - - - - -	479
Experiment CXXXVI:	
Blood Vessel Anastomosis With Payr Cannulas and Without Anticoagulant, in Acute Experiments - - - - -	485
Experiment CXXXVII:	
Ether, Apomorphine, Eserine, Prostigmin, Atropine, Neosynephrin (Dog: Vagus Innervation of the Esophagus and Stomach, Vomiting, Heart and Circulation)	489
Experiment CXXXVIII:	
Ergot, Ergotoxine, Ergonovine (Rooster: Action on Comb) - - - - -	499
Experiment CXXXIX:	
Ergot, Ergotoxine, Ergotamine, Ergonovine (Frog: Capillary Circulation) - - - - -	500
Experiment CXL:	
Tyramine (Frog: Capillary Circulation) - - - - -	502
Experiment CXLI:	
Ergamine (Turtle: Lung Tracing) - - - - -	502
Experiment CXLII:	
Ergotoxine, Ergonovine, Ergamine, Adrenalin, Barium (Dog or Cat: Blood Pressure, Respiration, Uterine Contractions—Barbour's Method) - - - - -	502
Experiment CXLIII:	
Ergamine, Adrenalin, Tyramine (Codeine or Heroine) (Dog: Blood Pressure, Pulmonary Blood Pressure, Respiration) - - - - -	507
Experiment CXLIV:	
Ergamine, Adrenalin (or Hordenine), Atropine (Spinal Dog, or Cat: Bronchioles)	511
Experiment CXLV:	
Ergotoxine, Ergonovine, Ergamine (Cat, Guinea Pig, Dog, Rabbit: Uterine Strip)	516
Experiment CXLVI:	
Ergot (Cat: Action on Uterus) - - - - -	518

	PAGE
Experiment CXLVII:	
Pituitrin, Ergamine, Adrenalin (Dog, Cat, or Rabbit: Uterine Contractions, Blood Pressure) - - - - -	518
Experiment CXLVIII:	
Pituitrin, Ergamine, Levulose, Adrenalin (Dog: Thoracic Duct, Blood Pressure, Bladder Contractions, Respiration) - - - - -	520
Experiment CXLIX:	
Ergonovine, Ergometrine, Ergotrate, Ergotocin, Ergobasine, Ergostetrine, Ergoklonin, Pitocin, Pitressin, Pituitrin, Clavitol (Gravitol) (Dog: Uterus, Blood Pressure, Respiration, Heart, Asphyxia) - - - - -	522
Experiment CL:	
Pituitrin, Pitressin (Frog: Capillary Circulation) - - - - -	529
Experiment CLI:	
Pituitrin, Pitressin (Frog or Turtle: Heart Tracing) - - - - -	529
Experiment CLII:	
Pituitrin, Pitocin, Ergonovine, Acetylcholine (Turtle: Lung Tracing) - - - - -	529
Experiment CLIII:	
Pituitrin, Ergonovine, Clavitol, Pitocin (Guinea Pig, Cat, Dog, Rabbit: Uterine Strip) - - - - -	530
Experiment CLIV:	
Pitocin, Pitressin, Pituitary Extract, Adrenalin, Atropine, Barium (Dog: Bronchial Contraction) - - - - -	531
Experiment CLV:	
Pituitrin, Adrenalin, Aconitine (Dog: Urine Secretion, Intestinal Contractions, Blood Pressure, and Respiration) - - - - -	534
Experiment CLVI:	
Pituitrin, Pitressin, Gravitol (Clavitol), Barium, Atropine (Dog: Heart, Blood Pressure, Nasal Sinuses, Electrocardiogram) - - - - -	536
Experiment CLVII:	
Pitressin, Pituitrin, Adrenalin, Vanadium (Dog: Pulmonary Blood Pressure) - - - - -	545
Experiment CLVIII:	
Dissection of the Eye—Its Anatomy and Pharmacology - - - - -	545
Experiment CLIX:	
Amyl Nitrite (Student: Plethysmographic Record, General Action) - - - - -	547
Experiment CLX:	
Amyl Nitrite (Student: Pulse Tracing) - - - - -	548
Experiment CLXI:	
Amyl Nitrite, (Student: Corpuscles in Retinal Vessels) - - - - -	549
Experiment CLXII:	
Amyl Nitrite (Student: Retinal Blood Vessels) - - - - -	550
Experiment CLXIII:	
Amyl Nitrite (Student: Effect on Vision) - - - - -	553

Experiment CLXIV:		
	Amyl Nitrite, Nitroglycerin, Sodium Nitrite (Dog: Stomach, Blood Pressure, Respiration, Spleen or Intestinal Loop Volume, Blood) - - - - -	555
Experiment CLXV:		
	Nitrites, Pilocarpine, Adrenalin (Dog: Bronchial Action) - - - - -	557
Experiment CLXVI:		
	Digitoxin (Frog: General Action) - - - - -	559
Experiment CLXVII:		
	Digitoxin (Frog: Heart Tracing) - - - - -	560
Experiment CLXVIII:		
	Digitoxin (Turtle: Heart Tracing) - - - - -	560
Experiment CLXIX:		
	Digitoxin, Digoxin (Dog or Cat: Blood Pressure and Respiration) - - - - -	560
Experiment CLXX:		
	Digitoxin, Strophanthin, Nitroglycerin (Dog: Pulmonary Blood Pressure, Carotid Pressure) - - - - -	565
Experiment CLXXI:		
	Digoxin, Digitoxin (Dog: Heart Tracings, Carotid Pressure) - - - - -	567
Experiment CLXXII:		
	Digoxin, Thevetin, Digitoxin, Strophanthin (Dog: Diuresis, Spleen Volume, Leg Volume, Blood Pressure, and Respiration) - - - - -	571
Experiment CLXXIII:		
	Adrenalin, Potassium Chloride, Digitoxin, Strophanthin (Cat, Rabbit, Dog: Heart Perfusion—Langendorff Method) - - - - -	576
Experiment CLXXIV:		
	Aconitine (Frog: General Action) - - - - -	580
Experiment CLXXV:		
	Aconitine (Frog: Heart Tracing) - - - - -	581
Experiment CLXXVI:		
	Aconitine (Turtle: Heart Tracing) - - - - -	581
Experiment CLXXVII:		
	Aconitine (Dog: Blood Pressure, Respiration, Temperature) - - - - -	581
Experiment CLXXVIII:		
	Aconitine (Dog: Heart Tracings, Blood Pressure) - - - - -	584
Experiment CLXXIX:		
	Aconitine (Student: Local Action) - - - - -	584
Experiment CLXXX:		
	Veratrine (Frog: General Action) - - - - -	585
Experiment CLXXXI:		
	Veratrine (Frog or Turtle: Heart and Inhibitory Apparatus) - - - - -	586
Experiment CLXXXII:		
	Veratrine (Frog: Skeletal Muscle) - - - - -	586

	PAGE
Experiment CLXXXIII:	
Veratrine (Turtle: Lung Tracing) - - - - -	587
Experiment CLXXXIV:	
Veratrine, Adrenalin (Dog: Blood Pressure, Respiration, Intestinal Contraction)	589
Experiment CLXXXV:	
Veratrine (Dog: Heart Tracings, Blood Pressure) - - - - -	589
Experiment CLXXXVI:	
Apomorphine (Dog: Vomiting Center) - - - - -	590
Experiment CLXXXVII:	
Ipecac (Dog: Emesis) - - - - -	590
Experiment CLXXXVIII:	
Sodium Cyanide (Hydrocyanic Acid), Sodium Sulfide, Hydrogen Peroxide (Dog: Respiration, Blood Pressure, Oxygen Consumption, Blood, Glycosuria) - -	590
Experiment CLXXXIX:	
Quinine (Frog: General Symptoms) - - - - -	595
Experiment CXC:	
Quinine (Frog or Turtle: Heart Tracing) - - - - -	595
Experiment CXCI:	
Quinine, Aminoquin (Plasmochin), Chinacrin (Atabrine) (Frog: Action on White Corpuscles—Binz's Experiment, Avian Malaria) - - - - -	595
Experiment CXCII:	
Quinidine, Aconitine (Dog: Blood Pressure, Heart, Spleen, Kidney, or Leg Vol- ume, Intraesophageal Stimulation, Auricular Fibrillation) - - - - -	596
Experiment CXCIII:	
Antipyrine (Frog: General Action) - - - - -	600
Experiment CXCIV:	
Antipyrine, $\beta$ -tetrahydronaphthylamine Hydrochloride (Dog: Respiration, Blood Pressure, Leg Volume) - - - - -	600
Experiment CXCV:	
Antipyrine, Peptone (Two Rabbits: Temperature Regulation) - - - - -	602
Experiment CXCVI:	
Quinine, Peptone (Two Rabbits: Temperature Regulation) - - - - -	602
Experiment CXCVII:	
Phenacetin, Aectanilid or Aspirin (Acetylsalicylic Acid) (Fevered Animal: Tem- perature) - - - - -	602
Experiment CXCVIII:	
Acetylsalicylic Acid (Aspirin) (Student: Headache) - - - - -	602
Experiment CXCVIX:	
Phenyl Salicylate (Sulol) (Student: Excretion, Absorption) - - - - -	603
Experiment CC:	
$\beta$ -tetrahydronaphthylamine Hydrochloride, Pilocarpine (Dog: Oxygen Consump- tion, Blood Pressure, Respiration) - - - - -	605

Experiment CCI:	
Carbolic Acid (Phenol) (Frog: General Action)	604
Experiment CCII:	
Carbolic Acid, Sodium Sulfate (Dog: Local Action, Respiration, Blood Pressure, Spleen Volume, Antidote)	604
Experiment CCIII:	
Phlorhizin, Adrenalin (Rabbit: Glycosuria)	606
Experiment CCIV:	
Potassium Iodide (Student: Absorption, Excretion)	607
Experiment CCV:	
Alkalies, Acids, Sodium Nitrite, Adrenalin (Frog: Perfusion of Vessels)	607
Experiment CCVI:	
Magnesium, Calcium (Rabbit: Anesthesia, Antagonism—Meltzer and Auer)	609
Experiment CCVII:	
Arsenic (Dog or Rabbit: Respiration, Blood Pressure, Peristalsis, Renal Action, Blood)	609
Experiment CCVIII:	
Arsphenamine (Salvarsan), Silver Arsphenamine, Sulfarsphenamine, Mapharsen, Nearsphenamine, Adrenalin (Dog: Blood Pressure, Pulmonary Circulation)	611
Experiment CCIX:	
Silver Arsphenamine, Arsphenamine, Adrenalin, Neosynephrin, Propadrine (Dog: Blood Pressure and Pulmonary Blood Pressure)	616
Experiment CCX:	
Arsphenamine, Benzedrine (Amphetamine) (Dog: Carotid Blood Pressure, Pulmonary Blood Pressure, Liver Capillaries)	618
Experiment CCXI:	
Silver Arsphenamine (Dog: Blood Pressure, Respiration, Electrocardiogram)	620
Experiment CCXII:	
Tryparsamide (Dog: Blood Pressure, Pulmonary Blood Pressure, Respiration, Heart; Rat: Trypanosomiasis)	624
Experiment CCXIII:	
Antimony (Tartar Emetic) (Dog: Emesis)	626
Experiment CCXIV:	
Vanadium, Sodium Hydroxide, Ammonia, Adrenalin (Dog: Blood Pressure, Respiration, Spleen Volume, Reflex and Local Actions, Intestinal or Bladder Contractions)	626
Experiment CCXV:	
Organic Mercury Compounds [Mersalyl (Salyrgan), Merbaphenum (Novasurol)], Adrenalin (Dog: Blood Pressure, Respiration, Kidney or Spleen Volume, Heart, Nasal Record)	629
Experiment CCXVI:	
Acid, Alkali—Rhubarb, Croton Oil, Magnesium Sulfate (Dog: Antagonism of Acids and Alkalies, Absorption and Excretion of Rhubarb, Local Action of Croton Oil and Magnesium Sulfate—Moreau's Experiment)	633

## Experiment CCXVII:

Dinitrophenol, Camphortetrazol (Dog: Blood Pressure, Respiration, Oxygen Consumption, Temperature, Glycosuria) - - - - -	635
