

CONTENTS

Preface

PART I

Chapter 1 Fundamentals of Gas-Liquid Chromatography	3
I. Chromatographic Processes	3
II. General Theory and Principles of Gas-Liquid Chromatography	6
III. Theories of Linear Chromatography	9
IV. Column Efficiency	13
V. Separating Power	30
VI. Resolution	32
References	32
Chapter 2 Detectors—Operating Principles and Theory	35
I. Thermal Conductivity Detector	35
II. Hydrogen Flame Ionization Detector	44
III. Argon Ionization Detector	56
IV. Electron Affinity Detector	59
V. Coulometric Detector	66
VI. Detector Sensitivity	69
References	72
Chapter 3 Qualitative and Quantitative Methods of Analysis	75
I. Qualitative Methods for Molecular Structure Determination	75
II. Quantitative Methods of Analysis	164
References	174

PART II

Chapter 4	Phenothiazine Drugs and Barbiturates	183
	I. Phenothiazine Drugs	183
	II. Barbiturates	226
	References	252
Chapter 5	Phenylethylamine-Type and Tryptamine-Indole Base Alkaloids	255
	I. Phenylethylamine-Type Alkaloids	258
	II. Tryptamine-Related Indole Bases	277
	References	286
Chapter 6	Morphine-, Nicotine-, and Pyrrolizidine-Related Alkaloids and Marihuana Cannabinols	287
	I. Morphine Alkaloids and Related Compounds	287
	II. Nicotine Alkaloids and Related Pyridine Bases	301
	III. Pyrrolizidine Alkaloids and Basic Derivatives	314
	IV. Marihuana Cannabinol Components	317
	References	326
Chapter 7	Antihistamines, High-Boiling Amine Anesthetics, and Vitamins	329
	I. Antihistamines	329
	II. High-Boiling Amine Anesthetics	346
	III. Vitamins	354
	References	370
Chapter 8	Miscellaneous Drugs and Pharmaceuticals	373
	I. Coumarins	373
	II. Chloramphenicols	379
	III. Acetylsalicylic Acid, Acetophenetidin, Acetanilid, and <i>p</i> -Chloroacetanilid	384
	IV. Camphor, Menthone-Menthol Stereoisomers, and Thymol Isomers	388
	V. Thalidomide	392
	VI. Digitoxigenin, Digoxigenin, and Sapogenins	393
	VII. Acetylenic Drugs	396
	VIII. Pentylenetetrazol	396
	IX. Diazepam (Valium)	398
	References	405

Chapter Pesticides, Herbicides, and Related Compounds 407

Introduction and Scope

II. Gas Chromatographic Separation of Pesticides, Herbicide
Materials

4

II. Correlation of Molecular Structure and Electron-Capturing Ability

V. Pesticide Extraction and Cleanup Procedures Suitable for EAD Analysis

537

References

558
