

# CONTENTS

Preface . . . . .	xi
-------------------	----

## ASSESSMENT OF THE AVAILABLE TECHNIQUES AND PROGRESS IN THE FIELD

1. <b>Quantum Pharmacology: Recent Progress and Current Status . . . . .</b>	<b>3</b>
R. E. Christoffersen	
2. <b>Parameters and Methods in Quantitative Structure–Activity Relationships . . . . .</b>	<b>21</b>
R. Osman, H. Weinstein, and J. P. Green	
3. <b>Molecular Mechanics and Crystal Structure Analysis in Drug Design . . . . .</b>	<b>79</b>
D. J. Duchamp	
4. <b>Studies of Chemical Structure–Biological Activity Relations Using Pattern Recognition . . . . .</b>	<b>103</b>
P. C. Jurs, J. T. Chou, and M. Yuan	
5. <b>Chance Factors in QSAR Studies . . . . .</b>	<b>131</b>
J. G. Topliss and R. P. Edwards	

## DRUG–RECEPTOR MODELING

6. <b>The Design of Transition State Analogs . . . . .</b>	<b>140</b>
P. R. Andrews	
7. <b>The Molecular Basis of Structure–Activity Relationships: Quantum Chemical Recognition Mechanisms in Drug–Receptor Interactions . . . . .</b>	<b>161</b>
H. Weinstein, R. Osman, and J. P. Green	
8. <b>Modeling Receptor and Substrate Interactions . . . . .</b>	<b>189</b>
G. M. Cole, E. F. Meyer, Jr., S. M. Swanson, and W. G. White	
9. <b>The Conformational Parameter in Drug Design: The Active Analog Approach . . . . .</b>	<b>205</b>
G. R. Marshall, C. D. Barry, H. E. Bosshard, R. A. Dammkoehler, and D. A. Dunn	
10. <b>Mapping the Dopamine Receptor: Some Primary and Accessory Binding Sites . . . . .</b>	<b>227</b>
L. G. Humber, A. H. Philipp, F. T. Bruderlein, M. Götz, and K. Voith	
11. <b>Interaction of Model Opiate Anionic Receptor Sites with Characteristic N-Substituents of Rigid Opiates: PCILO and Empirical Potential Energy Calculations . . . . .</b>	<b>243</b>
G. Loew, S. Burt, P. Nomura, and R. Macelroy	

12. <b>Functional Receptor Mapping for Modified Cardenolides: Use of the PROPHET System</b> .....	259
D. C. Rohrer, D. S. Fullerton, K. Yoshioka, A. H. L. From, and K. Ahmed	
13. <b>Thyroid Hormones-Receptor Interactions: Binding Models from Molecular Conformation and Binding Affinity Data</b> .....	281
V. Cody	
14. <b>Theoretical Modeling of Enzymic Hydrolysis of Acetylcholine Compared to Acetylthiocholine</b> .....	301
J. H. Corrington	

#### APPROACHES FOR QSAR AND EXAMPLES OF TECHNIQUES

15. <b>A New Approach to Bioactive Synthesis</b> .....	319
P. S. Magee	
16. <b>Syntheses of Drugs Proposed by a Computer Program</b> .....	341
M. Bersohn	
17. <b>CAMSEQ/M: A Microprocessor-Based Conformational Analysis System</b> .....	353
H. J. R. Weintraub	
18. <b>Beyond the 2-D Chemical Structure</b> .....	371
N. C. Cohen	
19. <b>Conformational Analysis: A Module in a Program for the Design of Biologically Active Compounds</b> .....	383
A. J. Stuper, T. M. Dyott, and G. S. Zander	
20. <b>New Optimal Strategies for Ab-Initio Quantum Chemical Calculations on Large Drugs, Carcinogens, Teratogens, and Biomolecules</b> .....	415
J. J. Kaufman, H. E. Popkie, and P. C. Hariharan	

#### APPLICATIONS OF COMPUTER-ASSISTED DRUG DESIGN

21. <b>Application of CNDO/2 Calculations and X-Ray Crystallographic Analysis to the Design of Conformationally Defined Analogs of Methamphetamine</b> .....	439
G. L. Grunewald, M. W. Creese, and D. E. Walters	
22. <b>Configurational Analysis, Inversion, and Reduction of Some Pyridine Carbaldoximes</b> .....	489
R. Pearlman and N. Bodor	
23. <b>The Analysis of Electronic Factors in Quantitative Structure-Activity Relationships Using Distribution Coefficients</b> ..	507
R. A. Scherrer and S. M. Howard	
24. <b>Computer-Assisted Synthetic Analysis: The Merck Experience</b> ....	527
P. Gund, E. J. J. Grabowski, G. M. Smith, J. D. Andose, J. B. Rhodes, and W. T. Wipke	

<b>25. A Hierarchal QSAR Molecular Structure Calculator Applied to a Carcinogenic Nitrosamine Data Base .....</b>	<b>553</b>
B. Petit, R. Potenzzone, Jr., A. J. Hopfinger, G. Klopman, and M. Shapiro	
<b>26. Computer-Aided Selection of Novel Antitumor Drugs for Animal Screening .....</b>	<b>583</b>
L. Hodes	
<b>Index .....</b>	<b>605</b>
