
Table of Contents

Preface	v
Editors	vii
Contributors	ix
Chapter 1 Combinatorial Chemistry and Combinatorial Technologies: Principles and Applications <i>Giorgio Fassina and Stanislav Miertus</i>	1
Chapter 2 Combinatorial Chemistry: From Split-Mix to Discrete <i>Árpád Furka</i>	7
Chapter 3 Glycopeptide Libraries <i>Daniela Palomba and Giorgio Fassina</i>	33
Chapter 4 Design of Protease Inhibitors by Computer-Assisted Combinatorial Chemistry <i>Vladimir Frecer, Enrico Burello and Stanislav Miertus</i>	55
Chapter 5 Solid-Phase Synthesis of Organic Libraries <i>Eduard R. Felder and Daniela G. Berta</i>	75
Chapter 6 Resins, Linkers and Reactions for Solid-Phase Synthesis of Organic Libraries <i>Eduard R. Felder and Daniela G. Berta</i>	89
Chapter 7 Solution Phase Combinatorial Libraries of Small Organic Molecules <i>Rafael Ferritto, Elisabetta de Magistris, Andrea Missio, Alfredo Paio and Pierfausto Seneci</i>	107
Chapter 8 Direct Deconvolution Techniques for Pool Libraries of Small Organic Molecules <i>Pierfausto Seneci</i>	153
Chapter 9 Encoding Techniques for Pool Libraries of Small Organic Molecules <i>Pierfausto Seneci</i>	193

Chapter 10	Analytical Characterization of Synthetic Organic Libraries <i>Nikolai Sepetov and Olga Issakova</i>	237
Chapter 11	Key Ingredients for Efficient High-Throughput Screening <i>Lucia Carrano and Stefano Donadio</i>	269
Chapter 12	NMR in Combinatorial Chemistry <i>Edith S. Monteagudo and Daniel O. Cicero</i>	285
Chapter 13	Automation in Combinatorial Chemistry <i>Valery V. Antonenko</i>	317
Chapter 14	Computational Aspects of Combinatorial Chemistry <i>Valerie J. Gillet</i>	345
Chapter 15	High Throughput Combinatorial Methods for Heterogeneous Catalysts Design and Development <i>J.M. Domínguez</i>	369
Chapter 16	Biological Libraries <i>Maria Dani</i>	389
Chapter 17	Peptide Display Libraries: Design and Construction <i>Maria Dani</i>	411
Chapter 18	Making and Selecting from Phage Antibody Libraries <i>Andrew Bradbury, Daniele Sblattero, Hennie R. Hoogenboom and Simon Hufton</i>	431
Chapter 19	Biopanning <i>Giovanna Palombo</i>	471
Chapter 20	Globular Oligonucleotide Screening via the SELEX Process: Aptamers as High-Affinity, High-Specificity Compounds for Drug Development and Proteomic Diagnostics <i>Larry Gold</i>	491
Chapter 21	Applications of RNA and DNA Aptamers in Basic Science, Diagnostics and Therapy <i>Henning Ulrich</i>	505
Chapter 22	Combinatorial Proteomic <i>Maria Marino, Luca Beneduce, Daniela Palomba, Antonio Fiordelisi and Giorgio Fassina</i>	523
Chapter 23	A Combinatorial Approach to Gene Expression Analysis: DNA Microarrays <i>Concetta Ambrosino, Luigi Cicatiello, Claudio Scafoglio, Lucia Altucci and Alessandro Weisz</i>	539

Chapter 24	Economics of Combinatorial Chemistry and Combinatorial Technologies	
	<i>Aris Persidis</i>	567
Index		585
