

CONTENTS

Foreword	xv
Preface	xvii
Acknowledgments	xix
Contributors	xxi
1 Overview of Mushroom Cultivation and Utilization as Functional Foods	1
<i>Shu-Ting Chang</i>	
1.1. Introduction	1
1.2. What Are Mushrooms?	3
1.2.1. Definition of a Mushroom	3
1.2.2. Ecological Classification of Mushrooms	4
1.2.3. Identification of Mushrooms	4
1.3. Concept of Mushroom Biology and Applied Mushroom Biology	6
1.3.1. Mushroom Biology	6
1.3.2. Applied Mushroom Biology	7
1.3.3. Impact of Applied Mushroom Biology	9
1.3.3.1. Nongreen Revolution	9
1.3.3.2. Mushroom Bioremediation	11
1.4. Mushroom Cultivation	11
1.4.1. Major Phases of Mushroom Cultivation	12
1.4.2. Cultivation of Several Selected Mushrooms	13
1.4.2.1. Cultivation of <i>it Agaricus</i>	14
1.4.2.2. Cultivation of <i>Lentinula edodes</i>	14
1.4.2.3. Cultivation of <i>Pleurotus sajor-caju</i>	17
1.4.2.4. Cultivation of <i>Volvariella</i>	17
1.4.2.5. Cultivation of <i>Agaricus brasiliensis</i>	18

1.4.2.6. Cultivation of <i>Ganoderma lucidum</i>	19
1.4.3. Utilization of Mushroom Germplasm	20
1.5. World Mushroom Production	21
1.6. Mushroom Biotechnology	23
1.6.1. Nutritional and Medicinal Value of Mushrooms	23
1.6.2. Nutraceuticals and Dietary Supplements	24
1.7. Development of World Mushroom Industry Movements	25
1.7.1. International Movement for Edible Mushrooms	26
1.7.2. International Movement for Medicinal Mushrooms	27
1.7.3. International Movement for Wild Mushrooms	27
1.8. Concluding Remarks	28
References	29
2 Molecular Analysis and Genomic Studies of Shiitake Mushroom <i>Lentinula edodes</i>	35
<i>Hoi-Shan Kwan and Winnie W. Y. Chum</i>	
2.1. Introduction	35
2.2. Isolation of Genes	36
2.2.1. Growth	36
2.2.1.1. Substrate-Utilizing Genes	36
2.2.2. Development	37
2.2.2.1. Mating-Type Genes	38
2.2.2.2. Genes Differentially Expressed in Dikaryotic Mycelium	38
2.2.2.3. Genes for Initial Fruiting Bodies/Primordium Formation	38
2.2.2.4. Genes for Mature Fruiting Bodies Formation	44
2.2.3. Physiological Processes in <i>Lentinula edodes</i>	47
2.2.3.1. Signal Transduction	47
2.2.3.2. Energy Production	47
2.2.3.3. Structural Proteins in Development	48
2.3. Molecular Genetics	48
2.3.1. Generation of Markers	49
2.3.2. Typing/Fingerprinting	50
2.3.3. Genetic Mapping	50

2.4. Functional Genomic Approaches for Gene Expression Analysis	50
2.4.1. Differential Display: RAP-PCR	51
2.4.2. cDNA Representation Difference Analysis	52
2.4.3. SAGE and LongSAGE	52
2.4.3.1. SAGE Profiles: Mycelium to Primordium	53
2.4.3.2. SAGE Profiles: Fruiting Bodies	53
2.4.4. cDNA Microarray	53
2.4.5. Expressed Sequence Tag	54
2.4.6. Yeast Two-Hybrid System	54
2.4.7. Sequencing-by-Synthesis Approach (454 Life Science)	54
2.5. Transcriptional Regulation	55
2.5.1. Transcriptional Factors	55
2.5.2. Promoter Analysis	55
2.6. Transformation	56
2.6.1. Transformation Methods	56
2.6.1.1. PEG-Mediated Transformation	56
2.6.1.2. Restriction Enzyme–Mediated Integration	57
2.6.1.3. Others	58
2.6.2. <i>Lentinula edodes</i> Genes Used in Transformation	58
2.7. Process Analysis	59
2.7.1. Postharvest Studies	59
2.7.2. Stress Responses	59
2.7.2.1. Studies of Temperature Stress in Mushrooms	59
2.7.2.2. Studies of Molecular Chaperones in Fungi	59
2.7.3. Lignocellulose Degradation	60
2.7.4. Meiosis	60
2.8. Conclusion	61
References	61
3 Nutritional Value and Health Benefits of Mushrooms	71
<i>Peter C. K. Cheung</i>	
3.1. Introduction	71
3.2. Wild and Cultivated Edible Mushrooms	72
3.3. Production of Cultivated Mushrooms	72

3.4. Nutritional Composition	73
3.4.1. Conventional Edible Mushrooms	73
3.4.1.1. Moisture	73
3.4.1.2. Protein and Amino Acids	74
3.4.1.3. Fat	75
3.4.1.4. Ash and Minerals	75
3.4.1.5. Vitamins	76
3.4.1.6. Dietary Fiber	77
3.4.1.7. Carbohydrates	78
3.4.1.8. Energy	78
3.4.1.9. Other Components	78
3.5. Newly Cultivated/Nonconventional Mushrooms	79
3.6. Nutritional Evaluation	80
3.6.1. General Aspects	80
3.6.2. Biological Methods for Nutritional Evaluation	80
3.6.3. Mushroom Protein Quality	87
3.7. Health Benefits of Edible Mushrooms	89
3.7.1. General Aspects	89
3.7.2. Antioxidants in Mushrooms	89
3.7.2.1. Bioactive Components and Their Antioxidative Activities	89
3.7.2.2. Characterization of Mushroom Phenolic Antioxidants	91
3.7.2.3. Biosynthesis of Phenolic Compounds from Mushrooms or Fungi	93
3.7.2.4. Hypocholesterolemic Effect of Mushrooms	94
3.7.2.5. Hypoglycemic Effect of Mushrooms	97
3.8. Conclusion	99
References	99
4 Sclerotia: Emerging Functional Food Derived from Mushrooms	111
<i>Ka-Hing Wong and Peter C. K. Cheung</i>	
4.1. Introduction	111
4.2. Concepts of Mushroom Sclerotia	112
4.3. Ontogeny of Sclerotia	112
4.3.1. Morphological Aspects	112
4.3.2. Physiological Aspects	114

4.3.2.1. Translocation	114
4.3.2.2. Exudation	115
4.4. Structure of Sclerotia	115
4.4.1. Rind	115
4.4.2. Cortex	116
4.4.3. Medulla	117
4.5. Cultivation of Mushroom Sclerotia	117
4.5.1. Sclerotia of <i>Pleurotus tuber-regium</i> (Fries) Singer	118
4.5.2. Sclerotia of <i>Polyporus rhinocerus</i> Cooke	119
4.5.3. Sclerotia of <i>Wolfiporia cocos</i> (Schw.) Ryv. Et Gilbn [<i>Poria cocos</i> (Schw.) Wolf]	120
4.6. Biochemical, Nutritional, and Technological Characteristics of Mushroom Sclerotia	121
4.6.1. Biochemical Components of Mushroom Sclerotia	121
4.6.1.1. Cell Walls	121
4.6.1.2. Extracellular Matrix	122
4.6.1.3. Cytoplasmic Reserves	122
4.6.2. Nutritional Evaluation of Mushroom Sclerotia	123
4.6.2.1. Proximate Composition	123
4.6.2.2. Sclerotial Dietary Fiber	124
4.6.3. Physicochemical and Functional Properties of Mushroom Sclerotial DF	126
4.7. Biopharmacological Values of Mushroom Sclerotia of <i>P. tuber-regium</i> , <i>P. rhinocerus</i> , and <i>W. cocos</i>	128
4.7.1. In Vitro Mineral Binding Capacity	128
4.7.2. In Vitro Fermentability	129
4.7.3. In Vivo Ca and Mg Absorption	131
4.7.4. Antitumor and Immunomodulatory Activities	132
4.8. Conclusion	134
References	134
5 Antitumor and Immunomodulatory Activities of Mushroom Polysaccharides	147
<i>Vincent E. C. Ooi</i>	
5.1. Introduction	147
5.2. Antitumor Polysaccharides from Mushrooms (Higher Fungi)	149

5.3.	Mechanisms of Antitumor Action of Mushroom Polysaccharides	153
5.3.1.	Antiproliferation of Cancer Cells and Induction of Apoptosis	153
5.3.2.	Immunomodulation	161
5.3.2.1.	Effects of Mushroom Polysaccharides on Macrophages and Spleen Cells	163
5.3.2.2.	Effects of Mushroom Polysaccharides on NK Cells	167
5.3.2.3.	Effects of Mushroom Polysaccharides on DCs	168
5.3.2.4.	Effects of Mushroom Polysaccharides on Hematopoietic Stem Cells	170
5.3.3.	Antimetastasis	171
5.3.4.	Antiangiogenesis	172
5.4.	Structure and Antitumor Activity Relationship of Polysaccharides	173
5.4.1.	Effect of Molecular Mass	174
5.4.2.	Impact of Branching Configuration	174
5.4.3.	Relationship of Antitumor Activity and Conformation	175
5.4.4.	Improvement of Antitumor Activity by Chemical Modifications	176
5.5.	Conclusions	178
	References	179
6	Regulatory Issues of Mushrooms as Functional Foods and Dietary Supplements: Safety and Efficacy	199
	<i>Solomon P. Wasser and Eden Akavia</i>	
6.1.	Introduction	199
6.2.	Legal and Regulatory Issues of Introducing and Controlling Dietary Supplements from Medicinal Mushrooms in Different Countries	202
6.2.1.	World Health Organization Guidelines	202
6.2.2.	Codex Alimentarius	202
6.2.3.	United States	203
6.2.4.	European Union	208
6.2.5.	Canada	210
6.2.6.	Australia and New Zealand	212
6.2.7.	Japan	213
6.2.8.	Israel	215

6.3. Safety and Diversity of Dietary Supplement Types from Culinary–Medicinal Mushrooms	216
6.4. Submerged Culturing as Best Technique for Obtaining Consistent and Safe Mushroom Products	220
6.5. Experiences of Seven Countries in Consolidating Their Food Safety Systems	220
6.6. Summary	221
References	221
