PART I—DESCRIPTIVE

CHAPTER	PAGE
I. GUAIACOL AND PHENACETINE	1
II. GUAIACOL AND PHENACETINE (<i>continued</i>)	8
III. ANTIPYRETICS	15
IV. PREPARATION OF ANTIPYRINE	33
V. HYPNOTICS	41
VI. LOCAL ANÆSTHETICS	55
VII. ANTISEPTICS	70
VIII. ORGANIC COMPOUNDS OF ARSENIC	82
IX. ORGANIC COMPOUNDS OF MERCURY	108
X. ADRENALINE	117
XI. PHOSPHATIDES	136
XII. NUCLEIC ACIDS	153
XIII. ALKALOIDS	161
XIV. GENERAL REMARKS ON PHARMACEUTICAL PRODUCTS	172

PART II—PRACTICAL

Setting up Apparatus—Recommendations to Beginners	179
PREPARATION of Guaiacol (from <i>o</i> -nitrophenol) ¹	192
„ Phenacetine (from phenol or <i>p</i> -nitrophenol) by three methods)	197
„ Acetanilide (from nitrobenzene)	204
„ Antipyrine (from phenylhydrazine)	206
„ Acetylsalicylic acid (from salicylic acid)	208
„ Stovaine (from chloracetone)	210
„ Ethyl aminobenzoate (from <i>p</i> -nitrotoluene)	219
„ Quietol (from chloracetone)	221
„ Acetophenone (Friedel and Crafts's Method)	223
„ Bromovalerylurea (from valeric acid)	224
„ Diethylbarbituric acid and of Bromodiethylacety- lurea (from ethyl malonate)	226

¹ The parent compound indicated is in each case the subject of the first preparation of the series.

	PAGE
ADRENALINE :	
Preparation of Adrenaline from the suprarenal glands of the horse	230
Synthesis (from catechol), in part	230
MERCURIALS :	
PREPARATION of "Mercury benzoate"	232
" Mercury diaminodihydroxydiphenyl (from <i>p</i> -nitrophenol)	232
ARSENICALS :	
Preparation of Salvarsan (from arsanilic acid)	235
PREPARATION of Tyramine (from benzyl cyanide)	237
" Calcium glycerophosphate	240
" Lecithin from egg-yolk	241
NUCLEIC ACIDS :	
Preparation from yeast and from calf-thymus	243
ALKALOIDS AND GLUCOSIDES :	
Determination of the Nicotine-content of tobacco	244
Preparation of Atropine from belladonna root	244
Oxidation of Quinine to quitenine	245
Preparation of Diacetylmorphine hydrochloride	246
Preparation of Digitaline from digitalis	246
PREPARATION of Betaine hydrochloride (from chloracetic acid)	248
" Sodium cinnamate (from benzaldehyde)	251
" Allylthiourea (from allyl iodide)	254
" <i>p</i> -Iodoanisole	255
BIBLIOGRAPHY	256
INDEX	259
