

# Contents

## CHAPTER

- I. HYDROCARBONS . . . . .
- Saturated hydrocarbons, 1. Unsaturated hydrocarbons, 9. Cyclic hydrocarbons,  $C_nH_{2n}$ , 21. Cyclic hydrocarbons,  $C_nH_{2n-2}$ , 24. Cyclic hydrocarbons,  $C_nH_{2n-4}$ , 25. Dicyclic terpene hydrocarbons, 27. Carotenes, 29. Aromatic hydrocarbons, 31. References, 39.
- II. HALOGENATED HYDROCARBONS . . . . . 41
- Fluorine compounds, 46. Chlorine compounds, 47. Bromine and iodine compounds, 54. Halogenated aromatic compounds, 56. References, 60.
- III. HYDROXYL DERIVATIVES OF HYDROCARBONS . . . . . 61
- Alcohols, 61. Polyhydroxy (polyhydric) alcohols, 75. Unsaturated alcohols, 79. Cyclic alcohols, 83. The sterols, 93. Aromatic alcohols, 97. Phenols, 98. Phenolic alcohols, 115. Halogenated hydroxyl compounds, 116. References, 119.
- IV. ETHERS AND ETHER PEROXIDES . . . . . 121
- Ethers, 121. Hydroxy ethers, 128. Aromatic ethers, 129. Ether peroxides, 132. References, 133.
- V. CARBONYL GROUP . . . . . 134
- Aldehydes and ketones, 134. Aldehydes, 140. Aromatic aldehydes, 145. Phenolic aldehydes, 147. Unsaturated aldehydes, 148. Ketones, 150. Aldehydes and ketones in the terpene series, 152. Cyclic ketones, 155. Aromatic ketones, 159. Quinones, 160. Halogenated carbonyl derivatives, 165. Acetals and thioacetals, 168. Carbohydrates, 168. The glycosides or heterosides, 179. Glycosides containing sulfur, 185. Saponins, 190. Tannins, 192. Hormones of the adrenal cortex, 194. The sex hormones, 195. References, 201.
- VI. CARBOXYL GROUP . . . . . 204
- Monobasic carboxylic acids, 204. Polybasic acids, 214. Unsaturated acids, 217. Cyclic acids, 220. Halogenated acids, 223. Hydroxy acids, 226. Aldehydic and ketonic acids, 236. Acid halides, 239. Acid anhydrides, 239. Phthaleins, 242. Esters, 246. Esters of inorganic acids, 247. Esters of aliphatic acids, 252. Iodized fatty esters, 255. Esters of cyclic acids, 255. Esters of dicarboxylic acids, 256. Esters of aromatic acids, 257. Carbonic acid esters, 258. Salicylic acid and its esters, 259. Ethyl acetoacetate and ethyl malonate, 264. Lactones, 265. References, 272.

VII. NATURAL MIXTURES . . . . .	274
Fixed oils and fats, 274. Volatile oils, 282. Gum resins, resins, oleoresins, and balsams, 285. Enzymes, 291. References, 302.	
VIII. AMINES AND AMINE DERIVATIVES . . . . .	305
Amines, 305. Quaternary ammonium salts, 319. Aniline derivatives, 321. Halogenated alkylamines, 323. Alkanolamines, 324. Choline and its derivatives, 326. <i>p</i> -Aminophenol derivatives, 329. Diamines and amino ethers, 332. Other dialkylaminoalkylamines, 342. Esters of dialkylaminoalkanols, 342. Phenylethylamine derivatives, 363. Phenylhydrazine derivatives, 374. Medicinal dyes, 375. Amino aldehydes and ketones, 380. Amino sugars, 382. Amino acids, 382. Aromatic amino acids, 394. Amides, 396. Proteins, 406. Antibiotics, 414. Amidines, 426. References, 430.	
IX. CYANIDES AND NITRO COMPOUNDS . . . . .	434
Cyanides, 434. Nitro compounds, 437. References, 443.	
X. SULFUR COMPOUNDS . . . . .	445
Mercaptans, 446. Thiophenols, 446. Thioethers, 446. Sulfones, 452. Thioaldehydes and thioketones, 453. Thioacids, 454. Thiourea derivatives, 455. Thiocyanates and isothiocyanates, 455. Sulfonic acids, 456. Sulfate esters, 460. Aromatic aminosulfonic acids, 460. Sulfonamide derivatives, 461. References, 476.	
XI. COMPOUNDS OF PHOSPHORUS, ARSENIC, AND ANTIMONY. . . . .	478
Phosphorus compounds, 478. Arsenic compounds, 480. Alkyl arsenic compounds, 480. Aryl arsenic compounds, 483. Arsenobenzene derivatives, 488. Antimony compounds, 493. References, 494.	
XII. METALLIC DERIVATIVES OF ORGANIC COMPOUNDS . . . . .	496
Organometallic compounds, 496. Grignard reagent, 496. Gold compounds, 498. Silver compounds, 500. Mercury compounds, 502. Bismuth compounds, 508. References, 510.	
XIII. HETEROCYCLES CONTAINING ONE HETEROATOM . . . . .	511
Oxygen heterocycles, 511. Nitrogen heterocycles, 523. Quinoline derivatives, 549. Synthetic antimalarial agents, 558. Ergot alkaloids, 564. Acridine dyes, 567. Isoquinoline, 570. Tropane derivatives, 585. References, 594.	
XIV. HETEROCYCLES CONTAINING TWO OR MORE HETEROATOMS . . . . .	597
Pyrazole derivatives, 597. Imidazole derivatives, 602. Diazines, 610. Pyrimidines, 611. Purines, 625. Pteridines, 629. Thionine dyes, 632. References, 633.	
XV. STEREOISOMERISM . . . . .	635
Relative configuration, 639. Asymmetric synthesis, 660. Physiological activity, 662. Asymmetric carbon atoms in the cycle, 666.	

## CONTENTS

ix

Polycyclic compounds, 672. *cis-trans*-Isomerism about the ethylenic bond, 676.

### XVI. SOME PHYSICOCHEMICAL PROPERTIES OF MEDICINAL PRODUCTS . . . 681

Colloid science, 682. The Meyer and Overton theory of narcosis, 683. Molecular size and surface area, 685. Molecular shape, 686. Oxidation-reduction potential, 688. Hydrogen-ion concentration, 688. Dielectric polarization, 688. Homology, 690. Raman spectrum, 690. Electromotive force, 691. The periodic table, 693. Isotopes and radioactive tracers, 695.

### GENERAL BIBLIOGRAPHY . . . 696

### INDEX . . . 705
