

CONTENTS

Introduction

Chapter 1	Dynamics of Antioxidation by Phenolic Antioxidants : Physiochemical Issues	v
Chapter 2	Antioxidant Defenses in Biological Systems : An Overview	9
Chapter 3	Antioxidants from Traditional Chinese Herbs	24
Chapter 4	The Role of Xanthine Oxidase in Disease	33

Herbal Sources and Foods

Chapter 5	Antioxidant Defenses of TJ-960, A Japanese Herbal Medicine, Against Free Radical-Induced Neuronal Cell Damage	45
Chapter 6	Aging and Herbal Antioxidants	54
Chapter 7	The Antioxidative and Antitumor Effects of Phenylpropanoid Glycosides from Pedicularis	64
Chapter 8	The Antioxidant and Antistress Activities of the Extract Of Fructus Momordicae	71
Chapter 9	Antioxidizing and Radioprotective Mechanisms Of Hydroxycinnamic Acid Derivatives : Pulse Radiolysis And ESR Studies	82
Chapter 10	Extracts of Some Indian Plants with Potent Antioxidant Properties	90
Chapter 11	Anti-inflammatory Antioxidants from Medicinal Gingers : New Complex Curcuminoids from Zingiber Cassumunar	99
Chapter 12	Effects of Bio-Normalizer (A Natural Japanese Food Supplement) on Oxygen Radical and Tumor Necrosis Factor Production by Monocytes and Macrophages	109

Identification and Characterization of Antioxidants

Chapter 13	Chemical Studies of Natural Antioxidants from Traditional Chinese Medicines	117
Chapter 14	Studies of Antioxidant Activity by Measuring Chemiluminescence Kinetics	125

Chapter 15	An In Vitro System for Evaluation of Oxidative Stress and Effects of Antioxidants	145
Chapter 16	Antioxidant Function of Carnosine, a Natural Histidine-Containing Dipeptide	155

Application of Antioxidants

Chapter 17	Effect of Vitamin E Status on Red Blood Cell Procoagulant Activity in α -Thalassemia/Hb E Disease	162
Chapter 18	Protective Effect of Vitamine E and Zinc on Experimental Hepatitis	167
Chapter 19	Cardiovascular Effects of Ginsenosides and Their Nitric Oxide-Mediated Antioxidant Action	179
Chapter 20	Influence of Allium Sativum Linne on Oxidative Stress Status : A Clinical Investigation	188
Chapter 21	Antioxidant Synergism and Mutual Protection of β -Carotene and Vitamin E in the Inhibition of Radical Initiated Peroxidation of Linoleic Acid in Micelles	196
Chapter 22	Inhibition of Preretinal Proliferation by Ginkgo biloba Extract EGb 761 and Superoxide dismutase in a Experimental Model Of Tractional Retinal Detachment	210

Thiol Antioxidants

Chapter 23	Cell regulation by Thiol Antioxidants from Glutathione to Lipoate to Anethole Dithiolethione	223
Chapter 24	Anethole Dithiolethione : Research Overview and Perspectives	236
Chapter 25	Mechanisms of Chemoprotection by 1, 2-Dithiole-3-Thiones	243
Chapter 26	Effect of Anethole Dithiolethione in the Treatment of Dry Mouth in Sjogren's Syndrome and Sialadenosis	251
Chapter 27	Randomized Controlled Trial of Anethole Dithiolethione in the Treatment of Antipsychotic-Induced Xerostomia	254

Metallothionein

Chapter 28	Can Metallothionein Be Used as a Potential Antioxidant Medicine?	261
Chapter 29	Metallothionein Protection of Cerebral Cortex Cells Against Hypoxic Damage	272
Chapter 30	Effects of Antagonism and Cytoprotective Effects of Metallothionein	278
Chapter 31	Thymine Radiation Damage and Its Modification by Metallothionein	286

Cell Regulation and Transcellular Signalling

Chapter 32	Effect of Vitamin E Treatment on the Development of Atherosclerosis	294
Chapter 33	Signal Transduction and Oncogene Expression Mediated by Reactive Oxygen Species	303
Chapter 34	Fibroblast Prolyl Hydroxylase Modulated by Signalling Pathways Involving Poly ADP-Ribosylation	320
Chapter 35	Elevation of Macrophage SeGSHPx Gene Expression and Prevention From Its Formation of Foam Cell	339
Chapter 36	Modulation of the β -Receptor-Adenylyl Cyclase System by Oxygen Radicals : Relationship to the Vitamin E Concentration	352

Reactive Oxygen Species, Nitric Oxide, and Antioxidants

Chapter 37	Inactivation of α -1-Proteinase Inhibitor by the Simultaneous Generation of Nitric Oxide and Superoxide	359
Chapter 38	Metabolism of Protein Bound Reactive Species Formed by Radical Damage	367
Chapter 39	Chinonin Can Scavenge NO Free Radicals and Protect The Myocardium Against Ischemia-Reperfusion Injury	378

Green Tea

Chapter 40	Study on Antimutagenicity and Anticarcinogenicity Of Green Tea Epicatechins-Natural Free Radical Scavenger	392
Chapter 41	A study on the Effects of Green Tea Polyphenols On Lipid Free Radicals	397

Ginkgo

Chapter 42	Egb 761 and Reperfusion Injury of the Retina	413
Chapter 43	Mitochondrial Oxidative-Phosphorylation in Vitro And in Situ : Effects of EGb 761	417
Chapter 44	Ginkgo Biloba Extract Protects Ultrastructure of Hypoxic Old Rats Myocardium	424
Chapter 45	Prevention by Ginkgo Biloba Extract of Age-Associated Impairment of Brain Mitochondria	434
Chapter 46	Effects of Ginkgo Biloba Extract (EGb 761) on Free Radical- Induced Damage in the Brain	444
Chapter 47	Inhibitory Effects of Ginkgo Biloba Extract (EGB 761) on Oxygen Free Radicals, Nitric Oxide, and Myocardial Injury in Isolated Ischemic-Reperfusion Hearts	453
Chapter 48	Ginkgo biloba Extract Protects Enzyme Activites in the Hypoxic Rat Myocardium	466
Chapter 49	Antioxidant Properties of Ginkgo biloba Extract EGB 761 and Clinical Implications	472
Chapter 50	EGB 761 Inhibition of Nuetrophil Functions and Adhesion to Endothelium Activated by Oxygen Free Radicals	488
Chapter 51	Scavenging Effects of Ginkgo biloba L. and Hawthorn Leaves on Oxygen Free Radicals and Their Antioxidant Action	499
Chapter 52	Ginkgo biloba Extract Protection of Brain Neurons from Damage Induced by Free Radicals	506
Chemical, Biochemical, and Biophysical Mechanisms		
Chapter 53	Co-Existence of Reactive Oxygen Cycle with Q-Cycle in Respiratory Chain : A Hypothesis for Generation, Partitioning and Functioning of Superoxide in Mitochondria	513
Chapter 54	Mitochondrial Respiratory Chain : A Self-Defense System Against oxygen Toxicity	530

Chapter 55	Scavenging Effects of Baicalin and Its Copper, Zinc Complexes on Superoxide Radicals and Peroxynitrite	540
Chapter 56	Kinetic Study of Free-Radical Scavenging Action of Flavonoids In Aqueous Triton X-100 Micellar Solution	557
Chapter 57	Superoxide Anion Toxicity : A Mechanism Study	569
Chapter 58	Effects of Sodium Tanshinone IIA Sulfonate on Mitochondrial Electron Transport Chain : A Preliminary Study	575

Ischemia/Reperfusion, Inflammation, and Cardiovascular Effects

Chapter 59	Vascular Protective Actions of Natural Antioxidants	584
Chapter 60	Fat-Soluble Vitamins in Cord Blood and Colostrum in Guilin	595
Chapter 61	Carnosine and Free Radical Defense Mechanisms in the Brain	600
Chapter 62	Perilla Oil Has a Protective Effect Against Colon Cancer and Cardiovascular Disease, But Induces a High Degree of Lipid Peroxidation in Rats	615
Chapter 63	Vitamin E Diminished the Ischemia-Induced Myocardial Damage of Spontaneously Hypertensive Rats	623
Chapter 64	Effect of ω 3 Fatty Acids on the Preneoplastic Lesions and Microsomal Drug Metabolizing Enzyme Activities in Hepato-Carcinogenesis	633

Selenium-Containing Antioxidants

Chapter 65	Selenoprotein P as an Indicator of Selenium Status in Chinese Populations	644
Chapter 66	Keshan Disease : An Antioxidant Function Deficient Disease with Oxidative Damage in Myocardial Mitochondria	649
Chapter 67	Phospholipid Hydroperoxide Glutathione Peroxidase, A Selenoenzyme, Protects Against Free Radical Mediated Damage to Hep G2 Cells	661
Chapter 68	Cu, Zn-SOO Damage from Reactive Oxygen Species	665
Chapter 69	Accelerated Lipid Peroxidation in Chronic Lymphedema : Effects of Selenium Supplementation	683
