

CONTENTS

Chapter 1.

INTRODUCTION			1
1.1 Definition of Toxicology	1		
1.2 Scope of Toxicology	1		
1.2.1 The Major Subdivision of Toxicology	2		
1.2.1.1 Toxicological Aspects of Legal Medicine	2		
1.2.1.2 Toxicological Aspects of Occupational Health	4		
1.2.1.3 Relation of Toxicology to Experimental Pathology ..	5		
1.2.1.4 Clinical and Veterinary Toxicology	5		
1.2.1.5 Evaluation of Safety	5		
1.2.1.6 Environmental Toxicology ..	6		
1.2.2 Training of Toxicologists	8		
1.2.3 Societies Related to Toxicology	8		
1.3 Definition of Pesticides	9		
1.4 Benefits from Pesticides	9		
1.4.1 Health and Comfort	10		
1.4.1.1 Kinds of Diseases Controlled	10		
1.4.1.2 Benefits from Disease Control	10		
1.4.2 Agriculture and Forestry	15		
1.4.2.1 Losses Caused by Pests ..	15		
1.4.2.2 Utilization of Farm Land in the United States of America	16		
1.4.2.3 Crop Production per Unit Area	17		
1.4.2.4 Factors Permitting Maintenance of Food Supply ...	17		
1.4.2.5 Agricultural Benefits from Pesticides	18		
1.4.3 Protection of Stored Products ..	19		
1.5 Production and Use of Pesticides ..	20		
1.5.1 Production of Pesticides	20		
1.5.1.1 Introduction of Pesticides ..	20		
1.5.1.2 USA Production	21		
1.5.1.3 World Production	22		
1.5.1.4 USA Imports and Exports ..	22		
1.5.2 Economic Value of Pesticides ..	23		
1.5.2.1 Cost of Pesticides	23		
1.5.2.2 Wholesale Cost of Imports and Exports	24		
1.5.3 Use of Pesticides	24		
1.5.3.1 Tonnage Used	24		
1.5.3.2 Number of Compounds and Products	24		
1.5.4 Methods of Application	26		
1.6 Pesticide Problems and Their Solutions	27		
1.6.1 Nature of Pesticide Problems ..	27		
1.6.2 Proposed Solutions	27		
1.6.2.1 The Economic Approach ..	28		
1.6.2.2 Empirical Approaches to Pesticide Problems	28		
1.7 Standard References on Pesticides ..	29		
1.7.1 Nomenclature	29		
1.7.2 General Information	31		
1.8 Conventions Used in This Book ...	33		

Chapter 2.		
GENERAL PRINCIPLES: DOSAGE AND OTHER FACTORS		
INFLUENCING TOXICITY		37
2.1 Kinds of Toxicity	37	
2.1.1 Nature of Injury	37	
2.1.2 Duration of Injury	37	
2.1.2.1 Factors in the Chronicity of Injury	37	
2.1.2.2 Reversibility	38	
2.2 Quantitation of Dosage-Response Relationships	39	
2.2.1 The ED 50 or LD 50	39	
2.2.1.1 The 1-Dose ED 50 or LD 50	39	
2.2.1.2 The 90-Dose ED 50 or LD 50	43	
2.2.1.3 Kinds of Phenomena Showing a Cumulative Log-Normal Form in Their Dosage- Response Relationships ..	45	
2.2.2 The Chronicity Index	45	
2.2.3 Time Relationships	46	
2.2.3.1 The ET 50 or LT 50	47	
2.2.3.2 The Logtime-Logdosage Curve	48	
2.2.4 Problem of Measuring Effect of Dispersed Toxicants	52	
2.2.4.1 The EC 50 and LC 50	53	
2.2.5 Measurement of Graded Re- sponses	53	
2.2.6 Dosage at the Tissue Level ...	53	
2.2.7 Statistical Considerations	53	
2.2.7.1 Number of Subjects	53	
2.2.7.2 Randomization of Sub- jects	55	
2.2.7.3 Selection of Dosage Lev- els	55	
2.2.7.4 Effects of Small Dosages ..	55	
2.2.7.5 The Geometric Mean	62	
2.2.7.6 Reproducibility of Results.	63	
2.2.7.7 Abnormal Values in Control Groups	64	
2.3 Dosage-Response Relationships in Different Kinds of Toxicity or Change	64	
2.3.1 Toxicity (<i>Sensu Stricto</i>)	64	
2.3.2 Neurotoxicity	64	
2.3.3 Teratogenesis	64	
2.3.4 Carcinogenesis	64	
2.3.5 Mutagenesis	65	
2.3.6 Hypersensitivity and Allergy ..	65	
2.3.7 Metabolism and Storage	65	
2.3.8 Induction of Enzymes	65	
2.4 Factors Influencing Toxicity of Any Kind	67	
2.4.1 Compound	68	
2.4.1.1 Primary Compounds	68	
2.4.1.2 Derived Compounds	69	
2.4.2 Dosage	69	
2.4.3 Schedule of Dosage	69	
2.4.4 Duration of Dosage	70	
2.4.5 Route of Exposure	71	
2.4.6 Interaction of Compounds	72	
2.4.6.1 Kinds of Interaction	72	
2.4.6.2 Mechanisms of Interac- tion	75	
2.4.7 Species and Strain Differ- ences	75	
2.4.7.1 Differences between Para- sites and Hosts	75	
2.4.7.2 Differences between Verte- brates	76	
2.4.8 Individual Differences	78	
2.4.9 Sex and Other Endocrines	80	
2.4.9.1 Sex	80	
2.4.9.2 Other Endocrines	81	
2.4.10 Age	81	
2.4.11 Nutrition	82	
2.4.11.1 General Nutritional Con- dition	82	
2.4.11.2 Effects of Protein	82	
2.4.11.3 Miscellaneous Nutritional Effects	83	
2.4.12 Isolation and Crowding	84	
2.4.12.1 Effects of Isolation and Aggregation	84	
2.4.12.2 Effect of Crowding	85	
2.4.13 Other Social or Psychological Factors	85	
2.4.14 Disease	85	
2.4.15 Temperature	87	
2.4.16 Pressure and Altitude	88	
2.4.17 Light and Other Radiation ...	88	
2.4.17.1 Direct Biological Effects of Radiation	89	
2.4.17.2 Photosensitization	89	
2.4.18 Circadian and Other Rhythms.	91	
2.4.18.1 Circadian Rhythms in Mammals	96	
2.4.19 Other Factors Influencing Toxicity	97	
2.4.19.1 Seasonal Differences	97	
2.4.19.2 Relative Humidity	97	
2.4.19.3 Aquatic Factors	97	
2.4.20 Discussion of Factors Influ- encing Toxicity	98	

Chapter 3.**GENERAL PRINCIPLES: METABOLISM 107**

3.1 Qualitative Aspects of Metabolism	107	3.2.2.3 Gastrointestinal Absorption	135
3.1.1 Possibility of "External Metabolism"	107	3.2.2.4 Respiratory Absorption	136
3.1.2 Biotransformation	107	3.2.2.5 Dermal Absorption	140
3.1.2.1 Known Reactions	107	3.2.2.6 Absorption by Other Routes	150
3.1.2.2 Enzymatic Basis of Biotransformation	108	3.2.3 Dynamics of Distribution and Storage	150
3.1.2.3 Relation of Enzymes to Toxicity	117	3.2.3.1 Distribution after a Single Dose	151
3.1.3 Species, Strain, Individual, and Genetic Factors in Metabolism	118	3.2.3.2 Storage in Relation to Repeated Intake	154
3.1.3.1 Species Differences in Metabolism	118	3.2.3.3 Factors Other than Dosage and Time that Affect Storage	161
3.1.3.2 Individual and Strain Differences in Metabolism	118	3.2.3.4 Storage in Relation to Toxicity	166
3.1.3.3 Genetic Factors	127	3.2.3.5 Storage in Relation to the Ecosystem	167
3.1.4 Toxicity of Metabolites	129	3.2.4 Excretion	168
3.2 Quantitative Aspects of Metabolism	129	3.2.4.1 Respiratory Excretion	168
3.2.1 Factors Influencing the Transfer and Availability of Chemicals in the Body	129	3.2.4.2 Biliary and Fecal Excretion	168
3.2.1.1 Properties of Membranes	130	3.2.4.3 Urinary Excretion and Its Relation to Other Forms of Excretion	169
3.2.1.2 Ionization	130	3.2.4.4 Excretion in Milk	170
3.2.1.3 Protein Binding	131	3.2.4.5 Factors Changing The Rate of Excretion	170
3.2.1.4 Passive and Specialized Transfer	132	3.2.5 Balance Studies	171
3.2.2 Absorption	133	3.3 Methods of Studying Metabolism	172
3.2.2.1 Indirect Measurement of Absorption	134	3.3.1 Tracers	172
3.2.2.2 Direct Measurement of Absorption	134	3.3.2 New Chemical Techniques	172
		3.3.3 Metabolic Pool Technique	172

Chapter 4.**GENERAL PRINCIPLES: NATURE OF INJURIES AND TESTS FOR THEM 182**

4.1 Mode of Action	182	4.2.3 Respiratory System	194
4.1.1 Nonspecific Actions	183	4.2.3.1 Lungs	194
4.1.1.1 Corrosive Action	183	4.2.4 Gastrointestinal System and Intermediary Metabolism	195
4.1.1.2 Ferguson's Principle	183	4.2.4.1 Liver	195
4.1.2 Specific Action	184	4.2.5 Urinary System	195
4.1.2.1 Enzymes	184	4.2.5.1 Kidneys	195
4.1.2.2 Critical Molecules	185	4.2.6 Muscles, Supportive Tissues, and Skin	196
4.1.2.3 Membranes	186	4.2.6.1 Mesothelial Layers	196
4.2 Effects on Cells and Tissues	187	4.2.7 Nervous System and Sense Organs	196
4.2.1 Cells	187	4.2.7.1 Central Nervous System	196
4.2.1.1 Spindle Poisoning	187	4.2.7.2 Peripheral Nervous System	197
4.2.1.2 Mutagenesis	188	4.2.7.3 Eye	197
4.2.1.3 Carcinogenesis	190		
4.2.2 Cardiovascular System	194		
4.2.2.1 Blood and Lymph Vessels	194		

4.2.8 Endocrine Glands	197	4.3.3.3 Toxicological Aspects of Tests of Mutagenesis	206
4.2.8.1 Pancreas	197	4.3.4 Tests of Carcinogenesis	207
4.2.8.2 Thyroid	197	4.3.5 Tests of Effects Specific to Certain Organs or Systems	207
4.2.9 Reproductive System	197	4.3.5.1 Pharmacological Tests ...	207
4.2.9.1 Testis	197	4.3.5.2 Tests of Respiratory Toxicity	208
4.2.10 Embryo and Fetus	197	4.3.5.3 Tests of Dermal Toxicity, Irritation, and Sensitization	208
4.2.10.1 Teratogenesis	197	4.3.5.4 Tests of Irritation of the Eye	214
4.2.10.2 Teratogenesis in Man ...	201	4.3.5.5 Tests of Behavior	214
4.3 Some Techniques for Measuring Different Kinds of Injury	201	4.3.5.6 Tests of Reproduction ...	215
4.3.1 Biochemical and Biophysical Investigations	203	4.3.5.7 Techniques for Study of Teratogenesis	217
4.3.2 Toxicological Studies on Iso- lated Cells	203	4.3.5.8 Tests of Oral Toxicity ...	217
4.3.3 Tests of Mutagenesis	204		
4.3.3.1 Background of Tests of Mutagenesis	204		
4.3.3.2 Outline of Tests	204		
Chapter 5. STUDIES IN MAN	225		
5.1 Cases	226	5.5 Measurement of Exposure Under Practical Conditions	249
5.2 Medical Use	226	5.5.1 Measurement of Respiratory Exposure	249
5.3 Use Experience	226	5.5.1.1 Estimation of Respiratory Exposure from Air Concen- tration	250
5.4 Volunteers	228	5.5.1.2 Estimation of Respiratory Exposure from Trapping Toxicant in Inhaled Air ...	251
5.4.1 Introduction	228	5.5.2 Measurement of Dermal Ex- posure	252
5.4.1.1 Kinds of Studies	228	5.5.2.1 Estimation of Dermal Ex- posure from Air Concen- tration	252
5.4.2 Legal Considerations	235	5.5.2.2 Estimation of Dermal Ex- posure from Absorbent Samplers	253
5.4.2.1 Codes of Practice	235	5.5.2.3 Estimation of Dermal Ex- posure from Washing	253
5.4.2.2 Regulation of Clinical Re- search and Investigations ..	236	5.5.2.4 Conventions for Measuring Dermal Exposure	254
5.4.2.3 A Law Permitting Tests in Man	236	5.5.3 Measurement of Oral Ex- posure	255
5.4.2.4 Legal and Other Require- ments for Tests in Man ...	237	5.5.4 Problems of Measuring Con- tributions from Different Routes of Exposure	256
5.4.2.5 Court Action	238	5.5.4.1 Smyth Technique	256
5.4.2.6 Consent	239	5.5.4.2 Differential Protection Technique	256
5.4.3 Design of Studies	240		
5.4.3.1 Selection of Parameters ..	240		
5.4.3.2 Selection of Dosage	241		
5.4.3.3 Choice of Volunteers ...	241		
5.4.3.4 Studies of Workers	243		
5.4.3.5 Protocol and Conduct of the Study	243		
5.4.3.6 Protection of the Volun- teer	246		
5.4.3.7 Protection of the Investi- gator	247		
5.4.4 Motivation of Volunteers	248		
5.4.5 Conclusion	248		
Chapter 6. RECOGNIZED AND POSSIBLE EXPOSURE TO PESTICIDES	265		
6.1 Residues in Food	265	6.1.1.2 Factors Influencing Resi- dues in Animal Products ..	267
6.1.1 Residues in Animal Products ..	266	6.1.2 Residues in Vegetable Prod-	
6.1.1.1 Observed Residues	266		

ucts	267	6.2.3 Exposure of Workers	288
6.1.2.1 Observed Residues	267	6.2.3.1 Respiratory and Dermal Exposures of Workers	288
6.1.2.2 Factors Influencing Resi- dues on Plants and Plant Products	269	6.2.3.2 Oral Exposure of Workers .	294
6.1.3 Residues in Water	274	6.3 Residues in soil	294
6.1.3.1 Residues in Potential Drinking Water	274	6.3.1 Observed Residues in Soil	295
6.1.3.2 Residues in Other Water and Sediments	274	6.3.1.1 Residues Following Appli- cation to Crops	295
6.1.4 Removal of Residues from Food and Water	275	6.3.1.2 Residues Following Direct Application to Soil	297
6.1.4.1 Removal of Residues from Food	275	6.3.2 Physical and Chemical Changes of Pesticides in the Soil	298
6.1.4.2 Removal of Residues from Water	276	6.3.2.1 Nature of Changes	298
6.1.5 Residues in Total Diet	276	6.3.2.2 Factors Influencing Resi- dues in Soil	298
6.1.5.1 Regular Diet	276	6.3.2.3 Distribution of Residues in the Mud Walls of Houses ..	303
6.1.5.2 Special Diet	281	6.4 Importance of Residues in Different Media	304
6.2 Residues in air	282	6.4.1 Importance to Man	304
6.2.1 Observed Residues in Commu- nity Air	282	6.4.2 Importance to Other Orga- nisms	305
6.2.2 Drift and Related Matters	283	6.4.2.1 Domestic Animals	305
6.2.2.1 Local Drift	283	6.4.2.2 Wildlife	306
6.2.2.2 Worldwide Drift	284	6.5 Degradation of Poisons in Na- ture	306
6.2.2.3 Factors Influencing Resi- dues in Community Air ...	285		

Chapter 7. RECOGNIZED AND POSSIBLE EFFECTS OF PESTICIDES IN MAN

311

7.1 Incidence of Poisoning	311	7.2.1 Storage of Certain Chlorinated Hydrocarbon Pesticides	340
7.1.1 Poisoning Generally	311	7.2.1.1 Storage in Bone	340
7.1.1.1 Mortality	311	7.2.1.2 Storage in Fat	340
7.1.1.2 Morbidity	313	7.2.1.3 Storage in Blood	346
7.1.2 Poisoning by Pesticides	316	7.2.1.4 Storage in Organs	349
7.1.2.1 Compounds that Have Caused Poisoning	316	7.2.1.5 Storage in the Fetus	349
7.1.2.2 Endemic Mortality	316	7.2.2 Excretion of Certain Chlори- nated Hydrocarbon Pesticides .	349
7.1.2.3 Endemic Morbidity	320	7.2.2.1 Excretion in Milk	349
7.1.2.4 Epidemics of Poisoning by Pesticides	322	7.2.2.2 Excretion in Urine	352
7.1.2.5 Experience of Special Groups	325	7.2.2.3 Excretion in Feces	352
7.1.3 Record of Different Countries .	333	7.2.2.4 Excretion in Expired Air ..	353
7.1.4 Factors in Poisoning	334	7.2.3 Storage and Excretion of Other Pesticides	353
7.1.4.1 Compound	334	7.2.4 Factors Involved in Storage and Excretion	355
7.1.4.2 Dosage	335	7.2.4.1 Identity of Factors	355
7.1.4.3 Route of Exposure	335	7.2.4.2 Evaluation of Factors In- fluencing Storage of Pes- ticides in Man	361
7.1.4.4 Interaction of Compounds .	336	7.3 Other Effects of Pesticides	362
7.1.4.5 Race and Ethnic Group ...	336	7.4 Possible Effects of Pesticides	363
7.1.4.6 Sex	336	7.4.1 Marginal Effects	363
7.1.4.7 Age and Competency	336	7.4.2 Speculative Effects	366
7.1.4.8 Accessibility	337	7.5 Criteria of Safety	367
7.1.4.9 Containers and Labeling ..	338		
7.1.4.10 Occupation	339		

Chapter 8.		
DIAGNOSIS AND TREATMENT OF POISONING		379
8.1 Diagnosis	379	
8.1.1 Chemical Epidemiology	379	
8.1.1.1 Retrospective Study	381	
8.1.1.2 Prospective Study	381	
8.1.2 History of Exposure	382	
8.1.3 Clinical Findings	382	
8.1.4 Laboratory Findings	383	
8.1.4.1 Diagnostic Tests	383	
8.1.4.2 Supportive Tests	391	
8.2 Treatment	391	
8.2.1 Removal of Poison	391	
8.2.1.1 Emesis	393	
8.2.1.2 Gastric Aspiration and Lavage	395	
8.2.1.3 Evacuation of the Gut ...	397	
8.2.1.4 Removal of External Poison	398	
8.2.1.5 Removal to Fresh Air	399	
8.2.2 Supportive Treatment	399	
8.2.2.1 Maintenance of Airway and Artificial Respiration	399	
8.2.2.2 Oxygen Therapy	401	
8.2.2.3 Infusions and Transfusions	402	
8.2.2.4 Sedatives	403	
8.2.2.5 Stimulants	404	
8.2.2.6 Antiemetics	405	
8.2.2.7 Steroids	406	
8.2.2.8 Antibiotics	406	
8.2.2.9 Nursing Care	406	
8.2.3 Antidotes	407	
8.2.3.1 Detoxifying or Neutralizing Antidotes	407	
8.2.3.2 Pharmacological Antidotes ..	409	
8.2.3.3 Oximes	410	
8.2.3.4 Chelating Agents	417	
8.2.3.5 Antidotes for Poisoning by Cyanide	421	
8.2.3.6 Oxygen	422	
8.2.3.7 Calcium	423	
8.2.3.8 Vitamin K	423	

Chapter 9.		
PREVENTION OF INJURY BY PESTICIDES		429
9.1 Regulations	429	
9.1.1 Regulation of Labeling	430	
9.1.1.1 Labeling in the United States of America	430	
9.1.1.2 Labeling in Great Britain ..	432	
9.1.1.3 International Proposals for Labeling	433	
9.1.1.4 Graphic Warning Labels ..	433	
9.1.2 Regulation of Transport and Storage	434	
9.1.2.1 Regulation of Transport in the United States of America	434	
9.1.2.2 International Regulation of Transportation	436	
9.1.2.3 Regulation of Storage	436	
9.1.3 Regulation of Use	436	
9.1.3.1 Regulation of Importation or Sale	436	
9.1.3.2 Regulation of Application ..	436	
9.1.3.3 Licensing of Operators ...	437	
9.1.3.4 Regulation of Working Conditions	438	
9.1.3.5 Inspection	438	
9.1.4 Regulation of Residues	439	
9.1.4.1 The Bases for Safety Factors	439	
9.1.4.2 Acceptable Daily Intake ...	442	
9.1.4.3 Tolerances	442	
9.1.4.4 Water Standards	446	
9.1.4.5 Threshold Limit Values or Maximal Allowable Concentrations	446	
9.1.4.6 Other Standards	452	
9.1.4.7 Toxicity Rating or Class ..	453	
9.1.5 Cost of Regulations	453	
9.1.6 Liability	455	
9.2 Choice of Compound and Formulation	455	
9.2.1 Choice of Compound	455	
9.2.2 Choice of Formulation	456	
9.2.2.1 Liquid and Paste Formulations	456	
9.2.2.2 Dry Formulations	457	
9.2.2.3 Protective Additives	458	
9.3 Protective Practices and Devices ..	458	
9.3.1 Protective Practices	458	
9.3.1.1 Avoidance of Exposure ...	458	
9.3.1.2 Removal of Contamination	458	
9.3.1.3 Working in Pairs	459	
9.3.1.4 Storage for Safety	459	
9.3.1.5 Disposal of Empty Containers	460	
9.3.1.6 Disposal of Unwanted Pesticide	461	
9.3.1.7 Environmental Surveillance ..	462	
9.3.1.8 Medical Surveillance	463	
9.3.2 Protective Devices	464	
9.3.2.1 Industrial Protective Equipment	464	
9.3.2.2 Personal Respiratory Pro-		

tection	464	9.4.1.2 Training of the Public	471
9.3.2.3 Protective Clothing	468	9.4.2 Community Relations	472
9.3.2.4 Other Prophylactic De- vices	469	9.4.2.1 Interdepartmental Com- mittees and Bilateral Agreements	473
9.4 Education and Cooperative Com- munity Relations	470	9.5 Alternative Methods of Pest Con- trol	474
9.4.1 Education	470		
9.4.1.1 Training of Workers	470		

Chapter 10.**EFFECTS ON DOMESTIC ANIMALS** 478

10.1 Incidence of Poisoning.....	478	10.2 Incidence of Storage and Excre- tion	481
10.1.1 Poisoning Generally	478	10.3 Other Possible Effects of Pesti- cides	481
10.1.2 Poisoning by Pesticides	479	10.4 Factors in Poisoning	481
10.1.2.1 Endemic Mortality and Morbidity	479		
10.1.2.2 Epidemics of Poisoning by Pesticides	479		

Chapter 11.**EFFECTS ON WILDLIFE** 483

11.1 Toxicology	483	clines Among Certain Falcons and Fish-Eating Birds	492
11.1.1 Inherent Susceptibility of Wildlife to Pesticides	483	11.2.3.4 Evaluation of Biological Magnification	502
11.1.2 Storage of Pesticides in Wild- life	483	11.2.4 The Nature of Pest Control ..	503
11.1.2.1 Compounds Found in Wildlife	484	11.3 Injury to Wildlife	503
11.1.2.2 Monitoring of Pesticides .	484	11.3.1 Injury in Relation to Kind of Treatment	504
11.1.2.3 Geographical Distribution of Pesticides	484	11.3.1.1 Application to Water ...	504
11.2 Ecological Factors in Pest Con- trol	485	11.3.1.2 Application to Non-Agri- cultural Land	505
11.2.1 Pest and Their Natural Con- trol	485	11.3.1.3 Application to Agricul- tural Land	507
11.2.1.1 The Nature of Pests	485	11.3.1.4 Accidental Contamina- tion	507
11.2.1.2 Natural Control	486	11.3.2 Overall Evaluation of Injury .	508
11.2.2 Biotic Simplification, a Cause of Pest Problems	486	11.4 Control of Wildlife	509
11.2.2.1 Faunal Imbalance	487	11.5 Limitation of Injury to Wildlife ..	510
11.2.2.2 Emergent Pests	487	11.5.1 Ecological Methods	510
11.2.2.3 Evaluation of Biotic Sim- plification as a Cause of Pest Problems	488	11.5.2 Modified Use of Pesticides ..	510
11.2.3 Food Chains	488	11.5.2.1 Choice of Compound	510
11.2.3.1 Secondary Poisoning	488	11.5.2.2 Limitation of Dosage	511
11.2.3.2 Biological Magnification .	489	11.5.2.3 Limitation of Area of Ap- plication	511
11.2.3.3 Bases for Population De- clines	489	11.5.2.4 Timing of Application ..	512
		11.5.3 Alternative Methods	512

Appendix I.

Chemical Names and CAS Registry Numbers of Pesticide Compounds Mentioned in This Volume Arranged by Group	517
--	-----

Appendix II.

Some Units of Measure Used in This Book	534
---	-----

Appendix III.

Conversion Table for the Units of Measure Frequently Used in Connection with the Toxicology of Pesticides 535

Appendix IV.

Approximate Dosages (mg/kg/day) of a Compound for Certain Animals on Diets Containing It at Different Concentrations that Do Not Influence Food Intake 536
