

CONTENTS

1.	Itai-Itai Disease and Follow-Up Studies	1
2.	Clinical Signs, Symptoms, and Prognosis of Cadmium Poisoning	39
3.	Gastrointestinal Absorption of Cadmium	55
4.	Distribution of Cadmium in Human Tissues	69
5.	Teeth as Indicators of Pediatric Cadmium Exposure	537
6.	Metabolism and Toxicity of Cadmium in Animals	553
7.	Model Description of Cadmium Transport in a Mammalian System	583
8.	Metallothionein and Its Interactions with Cadmium	595
9.	Biochemistry of Cadmium in Mammalian Systems: Pancreotoxic and Hepatotoxic Manifestations	617
10.	Renal Effects of Cadmium	643
11.	Cadmium-Induced Fibrosis in Lungs in Organ Cultures: Biochemical and Morphological Studies	691
12.	Cadmium as an Etiological Factor in Hypertension	703
13.	Immunological Effects of Cadmium	719
14.	Cadmium, the placenta, and the Infant	729
15.	Teratogenic and Mutagenic Effects of Cadmium	743
16.	Effects of Cadmium on Growth and Bone Metabolism	757
17.	Pathological Effects of Cadmium Poisoning	783
	Index	841
