

CONTENTS

1.	Introduction	1
2.	The History of Lead Poisoning and Uses of Lead Over the Centuries	3
LEAD EXPOSURE		
3.	Ecosystems	15
4.	Sources, Properties, and Fate of Airborne Lead	53
5.	Environmental Exposure	83
LEAD METABOLISM		
6.	Lead Metabolism	115
7.	Toxicity of Lead	203
8.	Biological Monitoring	215
9.	Cheating Agents and Lead	257
LEAD INTOXICATION		
10.	Clinical Presentation of Human Lead Poisoning	287
11.	The Neurological Toxicity of Lead	297
12.	Lead and the Kidney	339
13.	Lead and the Erythropoietic System	369
14.	Lead and the Cardiovascular System	403
15.	Gastrointestinal and Hepatic Effects of Lead Exposure	419
17.	Lead and the Endocrine System	437
18.	Immunological Aspects of Lead Poisoning	443
19.	Lead Carcinogenicity	449
20.	Prevention	459
21.	Lead Exposure During Fetal Life and Childhood	467
22.	Unusual Sources of Nonoccupational Plumbism	487
	Appendix	499
	Index	505
