

# Contents

CHAPTER	PAGE
I Exposures to Lead; Its Absorption, Transportation, Distribution, and Deposition in the Tissues.....	1
II The Photometric Dithizone Method.....	10
III The "Normal" Occurrence of Lead in the Tissues of the Human Body .....	25
IV The "Normal" Concentration of Lead in the Body Fluids....	27
V Fifty-One Fatal Cases of Suspected Lead Poisoning.....	39
VI Forty-Six Cases of Non-Fatal Lead Poisoning.....	68
VII The Diagnosis of Lead Poisoning.....	72
VIII The Treatment of Lead Poisoning.....	82
IX Summary .....	94

# Tables

TABLE	PAGE
I Required Dithizone and Cell Lengths for the Various Lead Ranges .....	19
II Recovery of Lead.....	24
III Normal Lead Content of Tissues in Four Fetuses and One Nursing Infant .....	28
IV Normal Lead Content of Tissues in Five Children.....	29
V Normal Lead Content of Tissues in Five Youths.....	30
VI Normal Lead Content of Tissues in Five Middle Aged Individuals .....	31
VII Normal Lead Content of Tissues in Five Aged Individuals	33
VIII Normal Concentration of Lead in Urine.....	35
IX Nine Cases of Non-Industrial Chronic Lead Poisoning in Children .....	42
X Twenty-One Cases of Industrial Chronic Lead Poisoning in Adults .....	46
XI Five Cases of Doubtful Chronic Lead Poisoning in Adults....	58
XII Thirteen Cases of Suspected but Unjustified Chronic Lead Poisoning in Adults.....	59
XIII A Summary of Lead Concentrations in Tissues of all Groups .....	62
XIV Five Cases of Non-Fatal Lead Poisoning Encephalopathy in Children .....	63
XV Forty-One Cases of Non-Fatal Lead Poisoning in Adults....	74
