

# CONTENTS

Chapter	Introduction	
Chapter	Organophosphorous Compounds .....	...
	I. Introduction .....	...
	II. Properties .....	...
	A. Chemical Structure .....	...
	III. Uses 3	
	IV. Metabolism .....	.....
	A. Biotransformation .....	.....
	B. Biochemical Oxidation .....	.....
	C. Hydrolysis .....	.....
	V. Toxicity: Mechanism of Action .....	.....
	VI. Exposure: Dose-Effect Relationship .....	.....
	A. Occupational Exposure .....	.....
	VII. Effects on Humans .....	... 1
	A. Acute OP Intoxication .....	... 1
	B. Chronic Intoxications .....	... 1
	C. Neurotoxic Effects .....	... 1
	D. Delayed Neuropathy .....	... 1
	E. Electromyographic Studies .....	... 1
	F. Central Nervous System .....	... 1
	G. Behavior Changes .....	... 1
	H. EEG Studies .....	... 1
	I. Eye and Vision .....	... 1
	J. Long-Term Effects .....	... 1
	K. Effect of Individual Compounds on Human .....	... 1
	L. Biological Monitoring of OP Exposure .....	... 2
	1. Exposure Tests as an Early Indication of .....	.....
	Health Impairments .....	... 2
	M. Determination of OP Exposure Indicators .....	... 2
	1. Cholinesterase Activity .....	... 2
	2. OP Metabolites in Urine .....	... 2
	3. Alkylphosphates in Urine (AP) .....	... 2
	4. OP in Human Blood .....	... 2
	5. EMG .....	... 2
	6. NTE .....	... 2
	N. Other Tests .....	... 2
	O. Treatment of Organophosphate Intoxication .....	... 2
	VIII. Prevention .....	... 2
	IX. Conclusion .....	... 2
	References .....	... 2
Chapter	Carbamates .....	... 43
	I. Introduction .....	... 43
	II. Properties .....	... 43
	III. Uses .....	... 43
	IV. Metabolism .....	... 43

V. Toxicity: Mechanism of Action .....	44
VI. Exposure: Dose-Effect Relationship .....	46
VII. Effects on Humans .....	47
A. Acute Intoxications .....	47
B. Volunteer Studies .....	47
C. Occupational Short- and Long-Term Exposure .....	48
1. Short-Term Exposure .....	48
2. Long-Term Exposure .....	50
D. Biological and Health Indicators of Exposure ..	51
E. Methods Available for ChEA Determination ...	52
F. Treatment of Carbamate Intoxications .....	53
VIII. Prevention .....	53
IX. Conclusion .....	55
References .....	55
 Chapter 4 Organochlorine Compounds .....	 59
I. Introduction .....	59
II. Properties .....	59
III. Uses .....	59
IV. Metabolism .....	59
V. Toxicity: Mechanism of Action .....	60
A. Mechanism of Action .....	60
1. Interaction Between Organochlorine Compounds, Drugs, and Hormones .....	63
B. Reported Protein-OCP Binding .....	65
VI. Exposure: Dose-Effect Relationship .....	65
A. OCP Levels in Human Tissues .....	66
1. Organochlorine Pesticide Content in Fat Tissue .....	66
2. OCP Content in Different Tissues, Blood, and Urine .....	70
B. OCP and Pregnancy .....	70
C. Human Pathology and Organochlorine Compounds .....	74
D. Levels of OCP in Workers vs. General Population and Evaluation of their Significance .....	75
VII. Effects on Humans .....	77
A. Acute Intoxications with OCPs .....	77
B. Chronic Effects of OCP .....	78
1. Effects of Individual Compounds .....	82
2. Cyclodiene Compounds .....	86
3. Treatment .....	89
4. Prevention .....	90
VIII. Conclusion .....	90
References .....	92
 Chapter 5 Synthetic Pyrethroids .....	 101
I. Introduction .....	101
II. Properties .....	101
III. Uses .....	101
IV. Metabolism .....	101
V. Toxicity: Mechanism of Action .....	102
VI. Exposure: Dose-Effect Relationship .....	104

	VII. Effects on Human	... 10
	VIII. Prevention	... 10
	IX. Conclusion	... 10
	References	... 10
<b>Chapitre</b>	<b>Organotin Compounds</b>	..... 11
	I. Introduction	..... 11
	II. Properties	..... 11
	III. Uses	..... 11
	IV. Metabolism	..... 11
	V. Toxicity: Mechanism of Action	..... 11
	VI. Exposure: Dose-Effect Relationship	..... 11
	VII. Effects on Humans	..... 11
	A. Dermal Contact	..... 11
	B. Inhalatory Exposure	..... 11
	C. Oral Exposure	..... 11
	VIII. Treatment	..... 11
	IX. Prevention	..... 11
	X. Conclusion	..... 11
	References	..... 11
<b>Chapitre</b>	<b>Organomercurial Compounds</b>	..... 11
	I. Introduction	..... 11
	II. Properties	..... 11
	III. Uses	..... 11
	IV. Metabolism	..... 11
	V. Toxicity: Mechanism of Action	..... 11
	VI. Exposure: Dose-Effect Relationship	..... 11
	VII. Effects on Humans	..... 11
	VIII. Treatment	..... 12
	IX. Prevention	..... 12
	X. Conclusion	..... 12
	References	..... 12
<b>Chapitre</b>	<b>Dithiocarbamate Compounds</b>	..... 12
	I. Introduction	..... 12
	II. Properties	..... 12
	III. Uses	..... 12
	IV. Metabolism	..... 12
	V. Toxicity: Mechanism of action	..... 12
	VI. Exposure: Dose-effect relationship	..... 12
	VII. Effects on humans	..... 12
	VIII. Prevention	..... 12
	IX. Conclusion	..... 12
	References	..... 12
<b>Chapitre</b>	<b>Benzimidazole Compound</b>	..... 1
	I. Introduction	..... 1
	II. Properties	..... 1
	III. Uses	..... 1

IV. Metabolism .....	.. 131
V. Toxicity: Mechanism of Action .....	.. 131
VI. Exposure: Dose-Effect Relationship .....	.. 131
VII. Effects on Humans .....	.. 132
VIII. Prevention .....	.. 133
IX. Conclusion .....	.. 133
References .....	.. 133

Chapter 10 Chlorophenoxy Compounds .....	135
I. Introduction .....	135
II. Properties .....	135
A. Chemical Structure .....	135
B. Physical Properties .....	135
III. Uses .....	135
IV. Metabolism .....	135
V. Toxicity: Mechanism of Action .....	137
VI. Exposure: Dose-Effect Relationship .....	137
VII. Effects on Humans .....	139
A. Acute Inhalation and Dermal Exposure .....	139
B. Acute Oral Intoxication .....	140
C. Short- and Long-Term Occupational Exposure .....	140
1. Irritative and Allergic Effects: Porphyria Cutanea Tarda .....	140
2. Gastrointestinal System .....	141
3. Nervous System .....	141
4. Psychological Effects .....	141
5. Hepatotoxic Effects .....	141
6. Myotoxic Effects .....	141
7. Cardiopathy and Cardiovascular Effects .....	142
8. Endocrine Effects .....	142
9. Hematological and Biochemical Effects .....	142
10. Long-Term Effects .....	142
D. Exposure/Effect Relationship .....	143
VIII. Safe levels .....	143
IX. Conclusion .....	144
References .....	145

Chapter 11 Dipyridiliums .....	147
I. Introduction .....	147
II. Properties .....	147
III. Uses .....	147
IV. Metabolism .....	148
V. Toxicity: Mechanism of Action .....	148
VI. Exposure: Dose-Effect Relationship .....	148
VII. Effects on Humans .....	149
A. Oral Intoxication .....	150
B. Lung Damage .....	150
C. Kidney, Liver, and Gastrointestinal System Damage .....	152
D. Occupational Intoxications .....	153
E. Dermal Absorption .....	153
F. Local Skin and Nail Effect .....	153
G. Paraquat Concentrations in Biological Media .....	154

	H. Treatment of Intoxication .....	.. 155
	I. Recovery after Treatment of Intoxication .....	.. 156
VIII.	Prevention .....	.. 156
	A. Safe Levels .....	.. 156
IX.	Conclusion .....	.. 156
	References .....	.. 157
Chapter 12	Miscellaneous Pesticides .....	159
	References .....	160
Chapter 13	Combined Exposure .....	161
	I. Introduction .....	161
	II. Respiratory System .....	162
	III. Liver and Kidneys .....	163
	IV. Immunotoxicity .....	164
	A. Allergy to Pesticides .....	164
	B. Immunosuppression .....	165
	C. Hematological Changes .....	166
	D. Nervous System .....	166
	E. Vision .....	167
	V. Long-Term Effects .....	168
	VI. Conclusion .....	168
	References .....	170
Chapter 14	Epidemiology of the Acute Pesticide Intoxication .....	173
	Conclusion .....	177
	References .....	179
Chapter 15	Reentry Periods .....	181
	I. Definition of Problem .....	181
	II. Methodology for Establishment of Reentry Intervals .....	182
	III. Studies on Individual Pesticides .....	183
	IV. Reentry Intervals for Some Pesticides .....	184
	V. The Problem of Practical Use of Reentry Intervals ....	184
	VI. Conclusion .....	185
	References .....	186
Index		.... 189
