

# Contents

*Preface* ..... xi

*Contributor contact details* ..... xiii

**Part I Measuring risks** ..... 1

**1 Risk assessment and risk management of mycotoxins in food** ..... 3

*T. Kuiper-Goodman, Health Canada*

1.1 Introduction to risk assessment of mycotoxins ..... 3

1.2 Hazard identification ..... 5

1.3 Hazard characterization..... 8

1.4 Exposure assessment..... 22

1.5 Risk characterization and evaluation..... 24

1.6 Risk management of mycotoxins ..... 25

1.7 Conclusion..... 26

1.8 References ..... 27

**2 Modelling exposure to mycotoxins.** ..... 32

**D. Arcella and C. Leclercq, National Research Institute for Food and Nutrition, Italy**

2.1 Introduction: quality and availability of data ..... 32

2.2 Deterministic methods for assessing mycotoxin exposure ..... 35

2.3 Probabilistic modelling techniques for assessing mycotoxin exposure..... 37

2.4 Conclusions ..... 46

2.5 References ..... 46

3	Current regulations governing mycotoxin limit. in food . . . . .	49
	<i>H. P. van Egmond and M. A. Jonker, National Institute for Public Health and the Environment, The Netherlands</i>	
3.1	Introduction: regulating mycotoxins in food. . . . .	49
3.2	Factors affecting mycotoxin regulation in the food industry . . . .	50
3.3	Case study: international inquiry into mycotoxin regulations in 2002/2003 . . . . .	55
3.4	Conclusion . . . . .	63
3.5	Sources of further information and advice . . . . .	65
3.6	Acknowledgement . . . . .	66
3.7	References . . . . .	66
4	Sampling for mycotoxins . . . . .	69
	<i>T. B. Whitaker, US Department of Agriculture, Agricultural Research Service</i>	
4.1	Introduction: mycotoxin sampling definition and uncertainty . . . .	69
4.2	Methods of sample selection. . . . .	70
4.3	Reducing random variation in the mycotoxin test procedure . . . .	74
4.4	Designing mycotoxin sampling plans . . . . .	81
4.5	Conclusions. . . . .	84
4.6	References. . . . .	85
5	Mycotoxin analysis: current and emerging <b>technologies</b> . . . . .	88
	<i>P. Patel, Leatherhead Food International Ltd, UK</i>	
5.1	Introduction: controlling and analysing mycotoxins. . . . .	88
5.2	Commercial and alternative techniques for analysing mycotoxins . . . . .	89
5.3	Applying new technologies to the analysis of mycotoxins. . . . .	101
5.4	Conclusions. . . . .	105
5.5	Acknowledgement. . . . .	105
5.6	References. . . . .	106
6	Rapid detection of mycotoxigenic fungi in plants . . . . .	111
	<i>P. Nicholson, John Innes Centre, UK</i>	
6.1	Introduction. . . . .	111
6.2	Agriculturally significant <b>mycotoxins</b> and their associated fungal species . . . . .	112
6.3	<b>Conventional</b> methods for identifying mycotoxigenic fungi in plants . . . . .	115
6.4	Using immunological and nucleic acid hybridization assays to detect mycotoxigenic fungi . . . . .	116
6.5	Polymerase chain reaction (PCR)-based assays for detecting mycotoxigenic fungi . . . . .	118
6.6	Using mycotoxin biosynthetic gene clustering for identifying mycotoxins . . . . .	122

6.7	Combination assays and alternatives to PCR . . . . .	126
6.8	Future trends . . . . .	127
6.9	Sources of further information and advice . . . . .	129
6.10	Acknowledgements . . . . .	129
6.11	References . . . . .	129
<b>Part II</b>	<b>Controlling risks . . . . .</b>	<b>137</b>
<b>7</b>	<b>The use of HACCP in the control of mycotoxins: the case of cereals . . . . .</b>	<b>139</b>
	<i>D. Aldred and N. Magan, Cranfield University, UK and M. Olsen, National Food Administration, Sweden</i>	
7.1	Introduction: hazards and HACCP systems . . . . .	139
7.2	Preparing a HACCP plan . . . . .	140
7.3	Applying HACCP systems to mycotoxin control . . . . .	145
7.4	Mycotoxin risks in wheat . . . . .	148
7.5	Pre-harvest mycotoxin control strategies . . . . .	151
7.6	Mycotoxin control during harvest and post-harvest handling of wheat . . . . .	157
7.7	Mycotoxin control during primary and secondary processing of wheat . . . . .	167
7.8	References . . . . .	171
<b>8</b>	<b>Environmental conditions affecting mycotoxins . . . . .</b>	<b>174</b>
	<i>V. Sanchis, University of Lleida, Spain and N. Magan, Cranfield University, UK</i>	
8.1	Introduction. . . . .	174
8.2	Key environmental conditions affecting production of <i>Alternaria</i> toxins and aflatoxin . . . . .	175
8.3	Key environmental conditions affecting production of <i>Fusarium</i> toxins, ochratoxins and patulin . . . . .	178
8.4	Conclusions . . . . .	185
8.5	References. . . . .	186
<b>9</b>	<b>Control of mycotoxins in storage and techniques for their decontamination . . . . .</b>	<b>190</b>
	<i>R. Shapira, Hebrew University of Jerusalem and N. Paster, The Volcani Center, Israel</i>	
9.1	Introduction: mycotoxin control . . . . .	190
9.2	Fungi in stored grain: occurrence, damage and control . . . . .	191
9.3	Factors affecting mycotoxin production during storage . . . . .	195
9.4	Physical decontamination of mycotoxins: heat, adsorption and irradiation . . . . .	196
9.5	Mycotoxin removal by solvent extraction. . . . .	202
9.6	Chemical decontamination of mycotoxins . . . . .	203

9.7	Biological decontamination of mycotoxins. . . . .	206
9.8	Conclusions. . . . .	211
9.9	References. . . . .	213
<b>10</b>	<b>Control of mycotoxins: secondary processing . . . . .</b>	<b>224</b>
	<i>K. A. Scudamore, KAS Mycotoxins, UK</i>	
10.1	Introduction . . . . .	224
10.2	Factors affecting mycotoxins during food processing . . . . .	225
10.3	Controlling mycotoxins during cereals processing. . . . .	226
10.4	Controlling mycotoxins during oil seed, beverage, dairy and other food processing . . . . .	234
10.5	Future trends . . . . .	237
10.6	Sources of further information and advice . . . . .	238
10.7	References. . . . .	238
<b>11</b>	<b>Risk assessment and management in practice: ochratoxin in grapesandwine . . . . .</b>	<b>244</b>
	<i>P. Battilani and A. Pietri, Università Cattolica del Sacro Cuore and A. Logrieco, Istituto di Scienze delle Produzioni Alimentari, Italy</i>	
11.1	Introduction . . . . .	244
11.2	Sources and concentration of OTA . . . . .	245
11.3	Epidemiology of OTA producing fungi . . . . .	247
11.4	Managing wine production: safety issues . . . . .	252
11.5	Future trends . . . . .	256
11.6	Sources of further information and advice . . . . .	257
11.7	References . . . . .	258
<b>12</b>	<b>Controlling mycotoxins in animal feed . . . . .</b>	<b>262</b>
	<i>H. Pettersson, Swedish University of Agricultural Sciences, Sweden</i>	
12.1	Introduction . . . . .	262
12.2	Production of animal feed . . . . .	262
12.3	The transfer of mycotoxins from feed to animal products . . . . .	274
12.4	Techniques for controlling mycotoxins in animal feed. . . . .	283
12.5	Future trends . . . . .	293
12.6	Sources of further information and advice . . . . .	294
12.7	References . . . . .	294
<b>Part III</b>	<b>Particular mycotoxins. . . . .</b>	<b>305</b>
<b>13</b>	<b>Ochratoxin A . . . . .</b>	<b>307</b>
	<i>J. L. Aish, E. H. Rippon, T. Barlow and S. J. Hattersley, Food Standards Agency, UK</i>	
13.1	Introduction . . . . .	307
13.2	Absorption, distribution, metabolism and excretion of OTA . . . . .	307
13.3	Biochemical effects of OTA . . . . .	311

3 4	Toxic effects of OTA .....	312
13.5	Distribution, levels and the detection of OTA in food .....	321
13.6	Conclusions and future trends .....	328
13.7	Sources of further information .....	329
13.8	References .....	329
<b>14</b>	<b>Patulin</b> .....	<b>339</b>
	<i>G. J. A. Speijers, Centre for Substances and Risk Assessment, The Netherlands</i>	
14.1	Introduction .....	339
14.2	Absorption, distribution, metabolism, excretion and biochemical processes of patulin .....	340
14.3	Acute, short- and long-term toxicity of patulin .....	340
14.4	Genotoxicity, cytotoxicity, immunotoxicity and neurotoxicity of patulin .....	343
14.5	Regulation, detection and control of patulin in food .....	348
14.6	Conclusions .....	349
14.7	References .....	350
<b>15</b>	<b>Zearalenone</b> .....	<b>353</b>
	<i>A. J. Alldrick, Campden and Chorleywood Food Research Association, UK and M. Hajšelová, Independent Cereals Technology Consultant, UK</i>	
15.1	Introduction: chemical composition .....	353
15.2	Production of zearalenone in crops .....	355
15.3	Metabolism and experimental toxicology of zearalenone .....	356
15.4	Health impacts of zearalenone .....	358
15.5	The impact of food processing on zearalenone .....	360
15.6	Conclusions .....	361
15.7	Acknowledgements .....	361
15.8	References .....	362
<b>16</b>	<b>Fumonisins</b> .....	<b>367</b>
	<i>L. Jackson and J. Jabionski, Food and Drug Administration, USA</i>	
16.1	Introduction .....	367
16.2	Chemical and physical properties of fumonisins .....	368
16.3	Factors affecting fumonisin production by <i>Fusarium</i> spp. ....	370
16.4	Toxicological effects of fumonisins .....	372
16.5	Fumonisin levels in foods: data collection and regulation .....	377
16.6	Methods of detecting and measuring fumonisins in animal feed and food .....	380
16.7	Control of fumonisin levels in food and feed .....	385
16.8	Future trends .....	390
16.9	References .....	391

<b>17 Othermycotoxins.</b>	406
<i>P. M. Scott, Health Canada</i>	
17.1 Introduction	406
17.2 <i>Alternaria</i> toxins: chemical structure, toxicity, sources in foods and associated human health risks	406
17.3 <i>Fusarium</i> toxins: chemical structure, toxicity, sources in foods and associated human health risks	409
17.4 <i>Aspergillus</i> toxins: chemical structure, toxicity, sources in foods and associated human health risks	416
17.5 <i>Penicillium</i> toxins: chemical structure, toxicity, sources in foods and associated human health risks	419
17.6 0-Nitropropionic acid from <i>Arthriniium</i> species: chemical structure, toxicity, sources in foods and associated human health risks	426
17.7 Future trends	426
17.8 References	427
<b>Part IV Appendix</b>	441
<b>18 Control of mycotoxins: raw material production.</b>	443
<i>P. Jennings, Central Science Laboratory, UK, J. Köhl, Research Institute for Plant Protection, The Netherlands and N. Gosrnan, John Innes Centre, UK</i>	
18.1 Introduction	443
18.2 Resistance breeding.	444
18.3 Fungicides	447
18.4 Biological control	450
18.5 Cultural practices: crop rotation, soil preparation, weed control	452
18.6 References	455
<i>Index</i>	461
