

CONTENTS

LIST OF CONTRIBUTORS	ix
FOREWORD	xi
PREFACE	xiii
PART I	EPIDEMIOLOGY
Chapter I.	Epidemiology of Food-Borne Diseases
	<i>Frank L. Bryan</i>
I. Introduction	4
II. Epidemiologic Approaches	10
III. Multiple Causation of Disease	12
IV. Host Causative Factors	18
V. Environmental Causative Factors	25
VI. Patterns of Food-Borne Disease Outbreaks	32
VII. Surveillance of Food-Borne Diseases	35
VIII. Investigation of Outbreaks of Food-Borne Illness ..	41
IX. Implementation of Control and Preventive Measures	65
References	66
PART II	FOOD-BORNE INFECTIONS
Chapter II.	<i>Salmonella</i> Infections
	<i>Frank L. Bryan, Mary Jeanne Fanelli, and Hans Riemann</i>
I. Introduction	74
II. Characteristics of Salmonellae	77
III. Nature of Infection	80
IV. Epidemiology	87
V. Salmonellae in Foods and Feeds	92
VI. Detection of Salmonellae	113
VII. Prevention and Control	117
References	121
Chapter III.	<i>Clostridium perfringens</i> Gastroenteritis
	<i>Betty C. Hobbs</i>
I. Introduction	131
II. Nature of Disease	135

CONTENTS

III. Epidemiology	141
IV. Characteristics of the Agent	149
V. Detection of Organisms and Enterotoxin	157
VI. Preventive Measures	165
References	167
Chapter IV. <i>Vibrio</i> Infections	
<i>Riichi Sakazaki</i>	
<i>Vibrio parahaemolyticus</i>	174
I. History	174
II. Nature of Disease	175
III. Epidemiology	177
IV. Characteristics of Agent ..	179
V. Isolation and Identification ..	185
VI. Prevention and Control ...	189
<i>Vibrio cholerae</i>	189
I. History	189
II. Nature of Disease	190
III. Epidemiology	193
IV. Characteristics of Agent ..	194
V. Isolation and Identification ..	202
VI. Prevention and Control ...	205
References	206
Chapter V. Infections and Intoxications Caused by Other Bacteria	
<i>Frank L. Bryan</i>	
I. Introduction	212
II. Bacteria from Human Sources Transmitted by Water or Contact As Well As by Food	213
III. Bacteria from Human Sources Transmitted by Air but Sometimes by Food	222
IV. Bacteria from Animal Sources Transmitted by Air or Contact but Sometimes by Milk	225
V. Bacteria from Animal Sources Transmitted by Contact or by Air but Sometimes by Meat	235
VI. Fomite-Carried Bacteria	239
VII. Bacteria Not Conclusively Proved To Be Food-Borne	240
VIII. Bacteria Transmitted by Contact with Contaminated Food	274
IX. Bacteria Yet To Be Identified As Food-Borne Pathogens	277
References	280
Chapter VI. Viral Infections	
<i>Dean O. Cliver</i>	
I. Introduction	299
II. Virus Particles and Viral Diseases	301

III. Occurrence and Sources of Viruses in Foods	311
IV. Persistence of Viruses in Foods	321
V. Detection	327
VI. Prevention	336
References	339
Chapter VII. Parasitic Infections	
<i>George R. Healy and Dennis Juranek</i>	
I. Introduction	343
II. Nematodes	344
III. Cestodes	353
IV. Trematodes	362
V. <i>Toxoplasma gondii</i>	372
VI. Protozoa and Helminths Disseminated in Fecally Contaminated Food or Water	376
VII. Summary	381
References	382
PART III INTOXICATIONS OF MICROBIAL ORIGIN	
Chapter VIII. Botulism	
<i>Genji Sakaguchi</i>	
I. Introduction	390
II. Nature of Disease	393
III. Epidemiology	404
IV. Characteristics of Agents	414
V. Detection of Organisms and Toxins	424
VI. Prevention and Control	431
References	433
Chapter IX. Staphylococcal Intoxications	
<i>Merlin S. Bergdoll</i>	
I. Introduction	444
II. Nature of the Disease	447
III. Epidemiology	449
IV. Characteristics of Agents	454
V. Methods for the Isolation and Enumeration of Staphylococci in Foods	480
VI. Detection of the Enterotoxins	481
VII. Bacteriophage Typing	489
VIII. Prevention and Control	490
References	490
Chapter X. <i>Bacillus cereus</i> Gastroenteritis	
<i>R. J. Gilbert</i>	
I. Introduction	495
II. Nature of Illness and Epidemiology	496

CONTENTS

III. Organism	501
IV. Pathogenicity	503
V. Isolation and Identification	508
VI. Preventive Measures	513
References	514
Chapter XI. Food-Borne Mycotoxins and Alimentary Mycotoxicoses	
<i>William F. Busby, Jr., and Gerald N. Wogan</i>	
I. Introduction	519
II. Human Mycotoxicoses	522
III. Mycotoxins Identified in Foods Intended for Human Consumption	533
IV. Mycotoxins Produced by Fungi Isolated from Human Foods	574
V. Mycotoxins Produced by Fungi Isolated from Animal Feeds	593
VI. Mycotoxins Produced by Miscellaneous Mold Cultures	593
VII. Public Health Implications	595
References	598
PART IV CONTROL	
Chapter XII Food Processing and Hygiene	
<i>Constanin Genigeorgis and Hans Riemann</i>	
I. Introduction	613
II. Effect of Processing on Survival and Growth of Food-Borne Disease Agents	615
III. Production of Safe Processed Foods	691
References	701
SUBJECT INDEX	715
