

# Contents

Contributors .....	x
Preface to the third edition .....	xiii
Preface to the second edition .....	xv
Preface to the first edition .....	xvi
Dedication .....	xvii
<b>PART I Incidence of Foodborne Disease .....</b>	<b>1</b>
<b>1 Epidemiology of foodborne diseases .....</b>	<b>3</b>
<i>Philip H. Kass and Hans P. Riemann</i>	
1. Introduction .....	3
2. Historical aspects .....	5
3. Contemporary problems .....	5
4. Epidemiological investigations of foodborne diseases .....	10
Bibliography .....	24
<b>2 Microbial food safety risk assessment .....</b>	<b>27</b>
<i>Anna M. Lammerding and Ewen C. D. Todd</i>	
1. Introduction .....	27
2. Movement away from traditional methods to evaluate the safety of food .....	29
3. Managing risk through risk assessment .....	30
4. Risk assessment for microbial hazards .....	34
5. Conducting a risk assessment .....	35
6. Applications of microbial risk assessment techniques for food safety .	45
7. Summary .....	47
Bibliography .....	49
<b>PART II Foodborne Infections .....</b>	<b>55</b>
<b>3 <i>Salmonella</i> infections .....</b>	<b>57</b>
<i>Kåre Mølbak, John E. Olsen, and Henrik C. Wegener</i>	
1. Historical aspects and contemporary problems .....	57
2. Characteristics of <i>Salmonella</i> .....	67

	3. Nature of the infection in man and animals .....	78
	4. Prevalence of <i>Salmonella</i> in foods and feeds – principles for control ...	88
	5. Foods most often associated with human infections .....	103
	6. Epidemiology of salmonellosis .....	103
	7. Principles of detection of <i>Salmonella</i> .....	109
	Bibliography .....	115
<b>4</b>	<b><i>Clostridium perfringens</i> gastroenteritis</b> .....	<b>137</b>
	<i>R. G. Labbe and V. K. Juneja</i>	
	1. Historical aspects and contemporary problems .....	137
	2. Characteristics of the organism .....	138
	3. Nature of the disease .....	148
	4. Epidemiology .....	152
	5. <i>C. perfringens</i> enterotoxin .....	156
	6. Detection of the organism and enterotoxin .....	157
	Bibliography .....	164
<b>5</b>	<b><i>Vibrio</i> infections</b> .....	<b>185</b>
	<i>Riichi Sakazaki, Charles Kaysner, and Carlos Abeyta, Jr</i>	
	1. <i>Vibrio parahaemolyticus</i> .....	185
	2. <i>Vibrio vulnificus</i> .....	191
	3. <i>Vibrio cholerae</i> .....	193
	Bibliography .....	198
<b>6</b>	<b><i>Escherichia coli</i></b> .....	<b>205</b>
	<i>Pina M. Fratamico and James L. Smith</i>	
	1. Introduction .....	205
	2. Characteristics of <i>Escherichia coli</i> .....	207
	3. Enteroinvasive <i>Escherichia coli</i> (EIEC) .....	208
	4. Diffusely adherent <i>Escherichia coli</i> (DAEC) .....	210
	5. Enteroaggregative <i>Escherichia coli</i> (ESEC) .....	210
	6. Enterotoxigenic <i>Escherichia coli</i> (ETEC) .....	214
	7. Enteropathogenic <i>Escherichia coli</i> (EPEC) .....	222
	8. Enterohemorrhagic <i>Escherichia coli</i> (EHEC) .....	224
	Bibliography .....	239
<b>7</b>	<b><i>Campylobacter jejuni</i> and related pathogens</b> .....	<b>259</b>
	<i>Sean F. Altekruise and Guillermo I. Perez-Perez</i>	
	1. <i>Campylobacter jejuni</i> .....	259
	2. Related organisms .....	270
	3. Summary .....	276
	Bibliography .....	276
<b>8</b>	<b><i>Yersinia</i> infections</b> .....	<b>289</b>
	<i>Truls Nesbakken</i>	
	1. Historical aspects and contemporary problems .....	289
	2. Classification .....	290
	3. Differentiation of <i>Y. enterocolitica</i> from other <i>Yersinia</i> species .....	290

4. Virulence factors . . . . .	292
5. Ability to survive and grow . . . . .	292
6. Nature of the infection in man . . . . .	293
7. Nature of infection or carrier state in animals . . . . .	294
8. Foods most often associated with sporadic cases and outbreaks . . .	296
9. Sporadic cases . . . . .	297
10. Outbreaks . . . . .	299
11. Principles of detection . . . . .	300
Bibliography . . . . .	302
<b>9 <i>Listeria monocytogenes</i> infections . . . . .</b>	<b>313</b>
<i>Franco Pagotto, Nathalie Corneau, and Jeff Farber</i>	
1. Historical aspects and contemporary problems . . . . .	313
2. Characteristics of <i>Listeria</i> . . . . .	314
3. Nature of Infection in man and animals . . . . .	320
4. Prevalence of <i>Listeria</i> in foods, feeds and water . . . . .	320
5. Foods most often associated with human infections . . . . .	327
6. Principles of detection of <i>Listeria</i> . . . . .	328
7. Treatment and prevention of listeriosis . . . . .	330
Bibliography . . . . .	331
<b>10 Infections with other bacteria . . . . .</b>	<b>341</b>
<i>Maha N. Hajmeer and Daniel Y. C. Fung</i>	
1. Introduction . . . . .	341
2. Synopses of individual bacteria . . . . .	342
3. Conclusion . . . . .	362
Bibliography . . . . .	363
<b>11 Infections with viruses and prions . . . . .</b>	<b>367</b>
<i>Dean O. Cliver, Suzanne M. Matsui, and Michael Casteel</i>	
1. Historical aspects and contemporary problems . . . . .	367
2. Hepatitis A Virus (HAV) . . . . .	369
3. Hepatitis E Virus (HEV) . . . . .	379
4. Noroviruses . . . . .	385
5. Rotaviruses . . . . .	393
6. Enteroviruses . . . . .	398
7. Other viruses . . . . .	402
8. Surrogates . . . . .	405
9. Prions . . . . .	409
10. Overview . . . . .	415
Bibliography . . . . .	416
<b>12 Foodborne parasites . . . . .</b>	<b>449</b>
<i>J. P. Dubey, K. D. Murrell, and J. H. Cross</i>	
1. Introduction . . . . .	449
2. Meatborne protozoa and helminths . . . . .	449
3. Fishborne helminths . . . . .	469

---

4.	Protozoa and helminths disseminated in fecally contaminated food and water	473
	Bibliography	476
<b>PART III</b>	<b>Foodborne Intoxications</b>	<b>483</b>
<b>13</b>	<b><i>Clostridium botulinum</i></b>	<b>485</b>
	<i>Nina G. Parkinson and Keith A. Ito</i>	
1.	Introduction	485
2.	Historical aspects and contemporary problems	486
3.	Characteristics of <i>Clostridium botulinum</i>	487
4.	Characteristics of the toxin	493
5.	Nature of the intoxication in man and animals	493
6.	Therapeutic use of the toxin	498
7.	Other potential uses of the toxin	498
8.	Animal botulism	499
9.	Distribution of spores in food and the environment	501
10.	Foods associated with botulism	503
11.	Detection of <i>Clostridium botulinum</i>	504
12.	Detection of botulinum toxin	506
	Bibliography	508
<b>14</b>	<b>Staphylococcal intoxications</b>	<b>523</b>
	<i>Merlin S. Bergdoll and Amy C. Lee Wong</i>	
1.	Historical aspects and contemporary problems	523
2.	Characteristics of <i>Staphylococcus aureus</i>	526
3.	The toxins	529
4.	Nature of the intoxication in man and animals	540
5.	Prevalence of <i>S. aureus</i> in foods	543
6.	Foods most often associated with staphylococcal food poisoning	543
7.	Principles of detection of <i>S. aureus</i>	544
8.	Principles of detection of the enterotoxins	545
9.	Summary	551
	Bibliography	552
<b>15</b>	<b><i>Bacillus cereus</i> gastroenteritis</b>	<b>563</b>
	<i>Heidi Schraft and Mansel W. Griffiths</i>	
1.	Introduction	563
2.	Historical aspects and contemporary problems	563
3.	Characteristics of <i>Bacillus cereus</i>	564
4.	Characteristics of <i>Bacillus cereus</i> food poisoning	565
5.	Presence, growth and survival of <i>B. cereus</i> in foods	571
6.	Isolation and identification	573
7.	Outbreaks caused by <i>Bacillus</i> spp. other than <i>B. cereus</i>	576
8.	Treatment and prevention	577
	Bibliography	577

<b>16</b>	<b>Mycotoxins and alimentary mycotoxicoses</b> .....	<b>583</b>
	<i>Fun S. Chu</i>	
	1. Introduction .....	583
	2. Mycotoxins produced by toxigenic fungi .....	584
	3. Natural occurrence and toxic effects of selected mycotoxins .....	585
	4. Intoxication from naturally occurring toxic fungal metabolites .....	600
	5. Modes of action of mycotoxins .....	607
	6. Preventive measures .....	621
	7. Concluding remarks .....	626
	8. Abbreviations .....	627
	Bibliography .....	629
<b>17</b>	<b>Miscellaneous natural intoxicants</b> .....	<b>663</b>
	<i>Eric A. Johnson and Edward J. Schantz</i>	
	1. Introduction .....	663
	2. Bacterial toxins .....	669
	3. Seafood toxins .....	673
	4. Plant toxins .....	690
	5. Other foodborne toxicants .....	699
	6. Laboratory practices, conclusions and perspectives .....	700
	Bibliography .....	701
<b>PART IV</b>	<b>Prevention of Foodborne Disease</b> .....	<b>711</b>
<b>18</b>	<b>Effects of food processing on disease agents</b> .....	<b>713</b>
	<i>Roberto A. Buffo and Richard A. Holley</i>	
	1. Introduction .....	713
	2. High-temperature preservation .....	714
	3. Low-temperature preservation .....	721
	4. Multiple intervention technology .....	724
	5. Fermentation and safety .....	731
	6. Food packing .....	739
	7. Control of microorganisms by chemical antimicrobials .....	746
	8. Control of microorganisms by natural antimicrobials .....	754
	9. Alternative innovative technologies .....	772
	10. Plant hygiene and contamination during food processing .....	791
	11. Predictive microbiology .....	799
	Bibliography .....	802
<b>19</b>	<b>Food safety</b> .....	<b>833</b>
	<i>Ivone Delazari, Hans P. Riemann, and Maha N. Hajmeer</i>	
	1. Overview .....	833
	2. Preharvest food safety .....	833
	3. Postharvest food safety .....	842
	4. Comments and conclusions .....	876
	Bibliography .....	877
	<b>Index</b> .....	<b>885</b>
