

CONTENTS

I. Toxic Plants	
1. Toxicology of Naturally Occurring Chemicals in Food	1
2. Poisonous Plants	187
3. Alkaloids	227
4. Antinutritional Factors Related to Proteins and Amino Acids	261
5. Glycosides	311
6. Toxic Plants: Laboratory Methods	371
7. Mushrooms: Epidemiology and Medical Management	433
II. Toxic Marine Animals	
8. Fish Toxins	463
9. Other Poisonous Marine Animals	497
III. Potential Environmental Toxicants	
10. Drug Residues in Foods of Animal Origin	529
11. Radioactivity in Food and Water	555
12. Toxicology and Risk Assessment	573
13. Hard Foreign Objects in Food as a Cause of Injury and Disease: A Review	615
14. Food, Filth, and Disease: A Review	627
Index	639
