
Contents

List of Contributors	ix
Preface	xi
Preface to the First Edition	xiii
Chapter 1 Introduction	
IRVIN E. LIENER	
Text	1
References	5
Chapter 2 Protease Inhibitors	
IRVIN E. LIENER AND MADHUSUDAN L. KAKADE	
I. Introduction	7
II. Distribution in the Plant Kingdom	8
III. Physicochemical Properties of Inhibitors from Various Plants	14
IV. Physiological Role in the Plant	38
V. Nutritional Significance of Protease Inhibitors	40
VI. Effect of Processing	51
References	57
Chapter 3 Hemagglutinins (Lectins)	
WERNER G. JAFFÉ	
I. Introduction	73
II. Purification	76
III. General Properties	77
IV. Structure	77
V. Localization	79
VI. Activity and Physiological Function in the Plant	80
VII. Toxicity Symptoms Produced by Lectins	82
VIII. Detoxification	85
	85

X. Lectins of Edible Plants	86
XI. Conclusions	97
References	98
Chapter 4 Glucosinolates	
H. L. TOOKEY, C. H. VANETTEN, AND M. E. DAXENBICHLER	
I. Introduction	103
II. Crucifers of Economic Value	104
III. Glucosinolates and Their Chemistry	105
IV. Toxic Products from Glucosinolates	122
V. Relation of Glucosinolates to Human Goiter	126
VI. Feeding Studies of Seed Meals	128
VII. Outlook	134
References	136
Chapter 5 Cyanogens	
R. D. MONTGOMERY	
I. Dietary Sources of Cyanogen	143
II. Chemistry of Cyanogenetic Glucosides	145
III. Human Metabolism of Inorganic Cyanide	148
IV. Toxicology of Cyanogenetic Plants	151
References	157
Chapter 6 Saponins	
YEHUDITH BIRK AND IRENA PERI	
I. Introduction	161
II. Distribution and Chemical Composition of Alfalfa Saponins	162
III. Biological Activities of Alfalfa Saponins	164
IV. Saponins in Other Foods and Feeds	177
V. Biosynthesis of Saponins in Alfalfa and Soya Plants	178
VI. Methods for Identification and Quantitative Determination of Saponins	178
References	180
Chapter 7 Gossypol	
LEAH C. BERARDI AND LEO A. GOLDBLATT	
I. Introduction	184
II. Gossypol Pigments	185
III. Occurrence in Cottonseed	192
IV. Isolation, Reactions, and Analysis of Gossypol	198
V. Gossypol in Protein Products, Oils, and Soapstock	207
VI. Role of Gossypol in Utilization of Cottonseed Meal	215
VII. Physiological Effects	221
VIII. Utilization	227
IX. Summary	229
References	229

Chapter 8 Lathrogens

G. PADMANABAN	
I. Introduction	239
II. History	241
III. Compounds with Osteolathrogenic Activity	242
IV. Compounds with Neurolathrogenic Activity	244
V. Biosynthesis of Lathrogens	252
VI. Analytical Procedures for Detection and Estimation	254
VII. <i>Lathyrus sativus</i> as Food	257
VIII. Concluding Remarks	260
References	260

Chapter 9 Favism

J. MAGER, M. CHEVION, AND G. GLASER	
I. Favism as an Inborn Error of Metabolism: Epidemiological, Genetic, and Enzymological Aspects of the Disease	266
II. The Selective Toxicity of Fava Beans: Search for the Causative Agent of Favism	277
III. The Mechanism of the Biochemical Lesion Underlying Red Cell Destruction in Drug-Induced Hemolysis and Favism	285
IV. Concluding Remarks	288
References	288

Chapter 10 Allergens

FRANK PERLMAN	
I. Introduction	295
II. Clinical Disorders	296
III. Immunological Aspects	298
IV. Antigens (Food Allergens)	303
V. Detection of Food Allergens	311
VI. Specific Food Allergens	316
VII. Summary	325
References	326

Chapter 11 Naturally Occurring Carcinogens

GERALD N. WOGAN AND WILLIAM F. BUSBY, JR.	
I. Introduction	329
II. Mycotoxins and Other Microbial Products	330
III. Cycasin	350
IV. Pyrrrolizidine Alkaloids	353
V. Bracken Fern	357
VI. Other Plant Carcinogens	359
VII. Summary and Perspectives	363
References	364

Chapter 12 Toxic Factors Induced by Processing

SHMUEL YANNAI

I. Introduction	371
II. Heat Treatment	373
III. Acid and Alkali Treatments	407
IV. Bleaching	410
V. Irradiation	413
VI. Solvent Extraction and Fumigation	414
VII. Contaminants	416
References	418

Chapter 13 Miscellaneous Toxic Factors

IRVIN E. LIENER

I. Introduction	430
II. Estrogenic Factors	430
III. Stimulants and Depressants	432
IV. Hypoglycemic Agents	434
V. Toxic Amino Acids	436
VI. Antivitamin Factors	442
VII. Antienzymes	447
VIII. Metal-Binding Constituents	452
IX. Tannins	453
X. Flatus-Producing Factors	455
XI. Other Plants with Toxic Constituents	457
References	460

Index**469**
