

## CONTENTS

## Part One Administrative Practices, Laboratory Services and General Procedures

## Chapter

I. General Administration of the laboratory	1
II. General Laboratory Procedures	
A. Glassware Washing and Preparation	29
B. Sterilization	30
C. Disinfection	36
D. Inoculation and Subculture	40
E. Incubation	42
F. Biochemical and Enzyme Tests	44
G. Serological Procedures	45
H. Use of laboratory Animals	55

## Part Two Recommended Methods for the Microbiological Examination of Specimens

## Chapter

III. Streptococcal Infections	59
IV. Pneumococcal Infections	80
V. Diphtheria	86
VI. Whooping Cough	106
VII. Haemophilus Infections	118
VIII. Neisseria Infections Other than Gonococcal	135
IX. Tuberculosis and Other Mycobacterioses	153
X. Staphylococcal Infections	207
XI. Enterobacteriaceae Infections	227
XII. Gonorrhea	281
XIII. Syphilis	300
XIV. Animal Diseases Transmissible to Man	
A. Anthrax	354
B. Brucellosis	364
C. Erysipelothrix Infections	378
D. Leptospirosis	382
E. Pasteurella Infections	422
F. Francisella Infections	468
G. Ratbite Fever	484
XV. Anaerobic Infections	494
XVI. Miscellaneous Infections	
A. Listeria Infections	544

B. Miteae Infections	550
C. Pseudomonas Infections	557
D. Vibrio Infections	565
XVII. Institutionally Acquired Infections	594
XVIII. Mycoplasma Infections	602
XIX. Microbial Sensitivity Tests	626
XX. Mycotic Infections	633
