

CONTENTS

CHAPTER I

	PAGE
GENERAL CONSIDERATIONS	21
The Microscope, 21; Photomicrography, 32; Metric Weights and Measures, 37; Normal Solutions, 38; Per Cent Solutions, 42; Explanation of Hydrogen Ion Concentration, 42.	

CHAPTER II

URINE ANALYSIS	52
Collecting the Specimen, 52; Urine Preservatives, 52; Examination, 53; Sugar in Urine, 56; Albumin, 65; Proteoses in Urine, 72; Indican, 72; Acetone Bodies, 74; Hemoglobin, 80; Detection of Hematoporphyrin in Urine, 81; The Diazo Test of Urine (Ehrlich), 81; Determination of Drugs in Urine, 82; Occult Blood in Urine, 83; Microscopic Examination of Urine, 84; Special Urine Chemistry, 111; Interpretation of Urinary Findings in Various Conditions, 141.	

CHAPTER III

BLOOD CHEMISTRY	148
Manner of Procuring and Handling Blood for Chemical Examinations, 152; Preparation of Glassware for Blood Chemical Analyses, 152; Standardization of Reagents, 153; Description of Colorimeters, 153; The Technic of Blood Chemistry, 163; Blood Sugar, 167; Total Nonprotein Nitrogen, 179; Urea Nitrogen, 184; Creatinine, 202; Creatine, 205; Interpretation of Blood Changes in Nephritis, 209; Chlorides, 212; Fatty Acids, 215; Cholesterol, 219; Calcium, 231; Inorganic Phosphorus, 236; The Determination of the Alkali Reserve of the Blood Plasma (Marriott), 253; Acidosis, 255.	

CHAPTER IV

HEMATOLOGY	277
The Origin of Blood Cells, 277; Nomenclature of Hematology, 289; Hematopoietic Organs and Their Physiology, 293; Normal Composition of the Blood, 300; Technic, 306; Description of Stained Cells, 331; Special Interpretation of the Hemogram, 353; Bone Marrow Studies, 365; Specific Methods of Staining, 385; Blood Typing for Transfusion, 423; Blood Preservation Technic, 436; Blood Findings in Various Diseases, 443; Blood Picture in Various Infectious Diseases, 522; Hematology of Infants and Children, 551; Summary of the Changes in the Blood Picture, 568.	

CHAPTER V

GASTRIC ANALYSIS

Gastric Contents, 575; Method of Obtaining Stomach Contents, 575; Test Meal Examination, 577; Microscopic Examination, 586; Conclusions to Be Drawn From the Examination of Gastric Contents, 588; Physiologic Data on Gastric Secretion, 589; Examination of the Duodenal Contents, 590.

CHAPTER VI

EXAMINATION OF PUNCTURE FLUIDS

General Considerations, 597; Cellular Structure of Effusions, 598; Cerebrospinal Fluid, 601.

597

CHAPTER VII

EXAMINATION OF SPUTUM

Collecting the Specimen, 621; Macroscopic Examination, 621; Microscopic Examination, 623.

621

CHAPTER VIII

SPECIAL TESTS

Liver Functional Tests, 628; Rabies, 639; Laboratory Tests for Pregnancy, 647; Hypersensitiveness, 656; Atopy, 656; Chemical Milk Analysis, 683; Mycological Diagnosis, 685; Autogenous Vaccines, 704; Semen Appraisal, 708; Diseases Due to Changed Nutritional Conditions, 714; Determination of Reduced Ascorbic Acid in Small Amounts of Blood, 720.

628

CHAPTER IX

FECES

General Considerations, 722; Normal Findings, 722; Examination of Stools, 728; Bacteriology of the Stools, 763.

722

CHAPTER X

BACTERIOLOGIC APPLICATIONS TO CLINICAL DIAGNOSIS

General Considerations, 775; Bacteriologic Stains, 781; Staining Procedures, 786; Staining Technic, 788; Culture Methods, 796; Description of Pathogenic Bacteria, 814; General Suggestions for Collecting Material for Bacteriologic Examinations, 837; Points in Identifying Bacteria, 842; Culture Methods, 842; Test for Indol, 850; Peptonization of Milk, 850; Laboratory Methods of Bacteriologic Examination of Various Specimens, 853; Bacteriologic Examinations for Tuberculosis, 862; Tests for Diphtheria, 871; Laboratory Diagnosis of Vincent's Angina, 875; Culturing Acne Bacilli, 875; Bacteriologic Tests for Typhoid and Paratyphoid

775

PAGE

Fever, 875; Rapid Method for Diagnosis of Typhoid and Paratyphoid Fever, 883; Examination of Bile, 883; Bacteriologic Examination of Urine, 884; Bacteriologic Examination of Glassware or China for Sanitary Quality, 884; Examination of Water, 885; Bacterial Count of Milk, 888; Examination for Food Infections, 893; Serologic and Bacteriologic Procedures in the Diagnosis of Enteric Fevers, 899; Bacillary Dysentery, 902; Examination of Canned Food, Dressings, Needles, etc., for Sterility, 904; Examination for Gonorrhoeal Infections, 905; Tests for Meningitis, 913; Tularemia, 916; Undulant Fever, 923; Laboratory Diagnosis of Eye Affections, 926; Cytoplasmic Inclusion Bodies in the Human Throat, 935; Inclusion Bodies in Measles, 937; Laboratory Diagnosis of Pertussis, 939; Bacteriologic Diagnosis of Plague, 939; Diagnosis of Glanders, 940; Detection of the Cholera Vibrio, 941; Bacteriologic Examination for Evidence of Anthrax, 942; Infectious Icterus, 942; Dark-Field Examination for *Treponema Pallidum* (*Spirocheta pallida*), 943; Isolation of Spore-Bearing Anaerobes From Feces, 945; The Testing of Disinfectants, 945; The Bacteriophage, 951; The Culture of Sterile Maggots for Use in the Treatment of Osteomyelitis and Other Suppurative Infections, 956.

CHAPTER XI

SEROLOGY

963

Explanation of Terms Used, 964; The Wassermann Test of Blood, 973; The Wassermann Test of Spinal Fluid, 987; The Kolmer Complement Fixation Test for Syphilis, 988; The Hecht-Gradwohl Complement Fixation Test for Syphilis, 994; The Wassermann and Hecht-Gradwohl Complement Fixation Tests for Gonorrhoea and Tuberculosis, 999; The Weltmann Serocoagulation Reaction for Tuberculosis, 999; The Kahn Precipitation Test for Syphilis, 1001; The Spinal Fluid Kahn Precipitation Test, 1005; The Quantitative Kahn Test of Blood Serum, 1006; Kline Microscopic Slide Precipitation Tests for the Diagnosis of Syphilis, 1007; Microscopic Slide Precipitation Tests for Syphilis with Unheated Serum, 1010; Microscopic Slide Precipitation Tests for Syphilis with Heated Serums, 1011; Microscopic Slide Precipitation Tests for Syphilis with Defibrinated Finger Blood, 1011; Microscopic Slide Precipitation Tests for Syphilis with Spinal Fluid, 1011; The Ide Test for Syphilis, 1012; The Eagle Flocculation Test, 1014; The Hinton Glycerol-Cholesterol Test, 1016.

CHAPTER XII

BASAL METABOLISM

1019

The Collins (Benedict-Roth) Apparatus, 1021; Sanborn Basal Metabolism Test, 1026; Jones Method, 1031; The Jones Double Bellows Motor-Basal, 1034.

CHAPTER XIII

POSTMORTEM EXAMINATIONS

1035

Permission for Performing Autopsies, 1036; Autopsy Equipment, 1037; Considerations in Performing an Autopsy, 1042; Self-Infection of the Autopsy Surgeon, 1043; Observations, 1044; Order of Examination, 1046; Examination of the Exterior of the Body, 1048; Examination of the Interior of the Body, 1052;

Opening the Chest, 1056; Examination of the Heart, 1059; Examination of the Lungs, 1063; Examination of the Organs of the Abdominal Cavity, 1065; Examination of the Kidneys and Adrenals, 1067; Removal of the Organs of the Pelvis, 1068; Liver and Gallbladder, 1069; Duodenum, 1070; Stomach, 1070; Pancreas, 1070; Retroperitoneal Lymph Glands, 1070; Diaphragm, 1070; Vena Cava and Aorta, 1071; Examination of the Skull and Brain, 1071; The Spinal Canal and Cord, 1073; Examination of Newborn Babies, 1074.

CHAPTER XIV

TISSUE CUTTING AND STAINING

Frozen Sections, 1080; Method of Preparation of Frozen Sections at the Operating Table, 1083; The Six-Second Method of Staining Tissues, 1084; Paraffin Sectioning, 1084; Actual Technic for Routine Paraffin Work, 1088; Short Paraffin Method, 1098; E. F. Lane Method for Rapid Fixation of Tissue, 1100; Acetone Dehydration of Tissues, 1100; Butyl Alcohol in Dehydration and Clearing Specimens That Have Been Embedded in Paraffin, 1123.

CHAPTER XV

PREPARATION OF MUSEUM SPECIMENS

Solutions for the Preservation of Specimens, 1125; Museum Jars, 1128; The Sealing of Museum Jars, 1136; The Rusting of Metals, 1140; Laboratory Specimens, 1140; Proper Method of Taking Specimen for Microscopic Examination, 1140.

CHAPTER XVI

TOXICOLOGIC TECHNIC

1141

Weight of the Organs of the Body, 1144; The Spectroscope, 1144; The Detection of Arsenic, 1146; The Detection of Mercury, 1148; Lead Poisoning, 1149; Detection of Cyanide in Tissues, 1156; Detection of Phosphorus, 1160; Detection of Barbital in Tissues, 1160; Detection of Alkaloidal Poisons, 1161; Detection of Morphine in Animal Tissues, 1162; Detection of Strychnine in Animal Tissues, 1164; Detection of Oxalic Acid, 1165; Determination of Methyl Alcohol in Tissues, 1166; Testing of Whiskies for Impurities, 1168; Detection of Methyl Alcohol in Liquors, 1168; Detection of Carbon Monoxide, 1169; Test for Determining Chloroform Content of the Brain Following Anesthesia, 1171; Detection of Chloroform in the Brain, Lungs, and Liver, 1172; The Quantitative Detection of Ethyl Alcohol in Human Tissues, 1174; Detection of Small Amounts of Chloral in the Presence of Chloroform and Formalin Embalming Fluid, 1182; Determination of Death by Drowning, 1183; Detection of Silicon in Lungs, 1186.

CHAPTER XVII

DETECTION OF CRIME BY LABORATORY METHODS

1190

Spectrographic Determinations, 1190; Examination of Hair, 1196; Moulage Process, 1196; Detection of Marijuana (*Cannabis Sativa*, Linn), 1200; Identification of Gunpowder by the Paraffin Powder Nitrate Process, 1204; Procedure in the Handling of Evidence for Firearms Identification, 1207; Detection of Changes

in Writings on Paper, 1212; Fingerprinting Deceased Persons, 1212; Fingerprint Magnification, 1215; Photography in Crime Work, 1217; The Precipitin Test for the Identification of Human Blood, 1218; The Typing of Blood Spots, 1221; Medicolegal Examination of Seminal Stains, 1228.

PAGE

CHAPTER XVIII

PARASITOLOGY AND TROPICAL MEDICINE - - - - - 1232

Importance of Parasitology, 1232; Concentration of Stools, 1237; Helminthology, 1240; Class Nematoda, 1240; Suborder Trichinelloidea, 1286; Filaria, 1297; Platyhelminthes, 1313; Cestodes, 1313; Hymenolepididae, 1354; Dilepididae, 1370; Family Davaineidae, 1377; Family Anoplocephalidae, 1387; Pseudophyllidea, 1392; Trematoda, 1394; Family Troglotremidae, 1429; Family Schistosomatidae, 1433; Amebic Infections, 1443; Flagellates, 1457; Ciliates, 1459; Coccidiosis of Man, 1459; Diseases Due to Spirochetes, 1460; Malaria, 1467; Trypanosomes and Trypanosome Disease, 1478; Leishmaniases, 1484; The Black Widow Spider, 1486; Diseases Caused by Arthropoda, 1502; Dengue Fever, 1506; Granuloma Inguinale, the Fourth Venereal Disease, 1507; Lymphogranuloma Inguinale, the Fifth Venereal Disease, 1511.

CHAPTER XIX

MINIMUM SUPPLIES, EQUIPMENT, AND REAGENTS FOR PATHOLOGIC LABORATORIES - - 1517
