

Table of Contents

Chapter	
1. Emergency Medical Examination	
2. Outlines for History Taking and Physical Examination	
3. Regional Neurologic Diagnostic Aid	29
4. Examination of the Heart, Peripher- and Lungs	42
5. Electrocardiography	64
6. Preparation for X-ray Examination	90
7. Simplified Laboratory Procedures	93
8. Urinalysis and Renal Function Tests	100
9. Hematology	132
10. Chemical Analysis of Blood and Body Fluids	172
11. Liver Function Tests	194
12. Endocrine Function and Tests	204
13. Puncture Fluids Examination	240
14. Cerebrospinal Fluid Examination	245
15. Sputum Examination	254
16. Examination of Secretions of the Gastro- intestinal Tract	257
17. Microbiologic Examination	272
18. Serologic Diagnostic Methods	286
19. Medical Parasitology (by José F. M. Ph.	302
20. Medical Mycology	328
21. Skin Tests	335
22. Epidemiology	343
23. Biologic Products for Prophylaxis and Therapy	354
24. Pathologic Examination	362
25. Radioisotopes	368
26. Diets	371
27. Vitamins	381
28. Fluid and Electrolyte Balance	389
29. Oxygen, Carbon Dioxide, and Helium Therapy	399
30. Surgery	
31. Poisons and Toxins	
32. Drugs and Hormones
