Foreword .....	ix
Preface .....	xi
Introduction .....	xiii

## Part 1. Relating Diet to Disease

1 Epidemiology and Curiosity .....	3
2 Foods, Drugs, and Disease Mechanisms .....	13
3 Essential Fatty Acids .....	21
4 Common Factors in Heart Disease, Heart Attacks, and Strokes .....	31
5 Heart Disease: Atherosclerosis and Serum Lipids .....	33
6 Heart Attack: Coronary Thrombosis .....	47
7 Vasospasm: Cardiac Output and Coronary Flow .....	63
8 Strokes .....	71
9 Hypertension .....	75
10 Immune Responses .....	83
11 Cell Proliferation and Cancer .....	105

## Part 2. Metabolic Differences Among Polyunsaturated Fatty Acids

12 Maps and the Unknown .....	115
13 Acyl-CoA Pathways .....	120
14 Pathways to Prostaglandins .....	139
15 Prostaglandin Formation Following Changes in Diet .....	152
16 Pathways to Leukotrienes .....	155

## Part 3. Choosing Diets

17 Polyunsaturated Acids in Tissues and Foods .....	163
18 Overall Supply of n-3 Fatty Acids .....	171
19 Alternative Diets .....	186

Glossary .....	201
About the Author .....	213
Index .....	215
