

CONTENTS

Postprandial Hyperlipidemia and its Relation to Atherogenesis	1
Postprandial Remnants and Their Relations to Atherosclerosis	9
Check at the Eighth Hour of Fasting as a Screening Test of Latent Endogenous Hypertriglyceridemia of Type IV and Combined Hyperlipidemia	17
Diurnal Variations of Blood Lipoproteins in Normal Subjects	29
Dietary Fats, Serum Lipoprotein Composition, and Latent Dyslipoproteinemias	37
Latent Type IV	41
Importance of Different Brands of Agarose for the Appearance of Late Pre- β Bands in Lipoprotein Electrophoresis	45
Significance of Particle Size Variations in Lipoproteins in Hypertriglyceridaemias	51
High Density Lipoprotein Lipids in Healthy Subjects with and without Family History of Coronary Heart Disease	65
Immune Response Against Lipoproteins in Coronary Patients	73
Receptor Independent Low Density Lipoprotein Catabolism	79
Turnover of VLDL- and IDL-ApoB in Controls and Patients with Familial Hypercholesterolaemia	87
In Vitro Apo-B,E Receptor Binding and In Vivo Catabolism of Trypsin-Modified Low Density Lipoproteins	93
Hypo-HDLemia, Extravascular Lipid Deposits and Atherosclerotic Vascular Diseases	101
Structural Approaches for Comparing Serum Low Density Lipoprotein Subclasses in Normal and Hyperlipidemic Individuals	109
Metabolism and Clinical Significance of Lipoprotein(a)	117
Apolipoprotein Disorders	123
Hyperapobetalipoproteinemia: A Model to Stretch and Test the Risk Factor Hypothesis	135
Apolipoproteins A and Latent Atherogenic Dyslipoproteinemia	147
Structure and Function of Apolipoprotein E: Existence of Multiple E2 Alleles in Type III Hyperlipoproteinemia	157
Limitations of the Predictive Value for Coronary Vascular Disease of the Plasma Lipids and Apoproteins AI, B Levels as Measured Before Coronarography in 317 Patients	165
Pattern of Zkonal Separation of HDL in AI Milano Patients	175
Lipoprotein and Apoprotein Values in Coronary Angiography Normocholesterolemic Male Patients	179
Lipoproteins, Apolipoproteins, and Coronary Artery Disease Assessed by Coronary Arteriography	187
Skin and Plasma Apoprotein B, Latent Dyslipoproteinemia and Atherosclerosis	199
Screening Procedure for Dyslipoproteinemia in Newborns	203
Xanthelasma, Latent Dyslipoproteinemia and Atherosclerosis: Contribution of Apo E Polymorphism	213
Apolipoprotein B and Disorders of Lipoprotein Metabolism in Man	225

Abnormal Apo A and Apo B Levels in Patients with Atherosclerotic Vascular Lesions	247
Skin Cholesterol, Dyslipoproteinemia, and Hypolipidemic Drugs	255
Tissue Cultures in Latent Dyslipoproteinemia	269
Noninvasive Evaluation of Atherosclerosis in the Arterial Circulation of the Lower Limbs	273
Type III-Like Hyperlipoproteinemia with Inactive Apolipoprotein E3	283
Familial Deficiency of Apolipoproteins A-I and C-III and Precocious Coronary Artery Disease: Family Study	289
Apolipoprotein E Enriched VLDL and Their Relations to Fat Intake	297
Subject Index	305
