

# Contents

About the Series	iii
Preface	v
Contributors	xi
<b>I. INTRODUCTION</b>	
1. Evolution of Modern Sunscreen Chemicals <i>Nadim A. Shaath</i>	3
2. The Need for Photoprotection <i>Nicholas J. Lowe</i>	37
<b>II. PHOTOBIOLOGICAL ASPECTS</b>	
3. Biological Effect of Sunlight <i>John H. Epstein</i>	43
4. Ultraviolet Radiation-Induced Skin Aging <i>Lorraine H. Kligman and Albert M. Kligman</i>	55
5. Intrinsic Photoprotection in Human Skin <i>Madhukar A. Pathak</i>	73
6. Sunscreen Use and Nonmelanoma Skin Cancer <i>Robert S. Stern</i>	85
7. New Trends in Photodosimetry <i>Brian L. Diffey</i>	93

8. Physics of Optics: Terminology and Units <i>M. Shah jahan</i>	109
<b>III. REGULATORY ASPECTS</b>	
9. Regulatory Aspects of Sunscreens in the United States <i>Emalee G. Murphy</i>	127
10. Regulatory Aspects of Sunscreens in Europe <i>Angela Janousek</i>	137
11. The Sunscreen Industry in the United States: Past, Present and Future <i>Herman E. Jass</i>	149
12. The Sunscreen Industry in Europe: Past, Present, and Future <i>Denis Rebut</i>	167
13. The Sunscreen Industry in Japan: Past, Present, and Future <i>Minoru Fukuda and Masako Naganuma</i>	173
14. The Sunscreen Industry in Australia: Past, Present, and Future <i>Gordon A. Groves</i>	195
<b>IV. SUNSCREEN INGREDIENTS AND FORMULATIONS</b>	
15. The Chemistry of Sunscreens <i>Nadim A. Shaath</i>	211
16. Formulating Sunscreen Products <i>Kenneth Klein</i>	235
17. Antioxidants and Carotenoids as Potential Photoprotectants <i>Homer S. Black</i>	267
18. Tanning Accelerators <i>James M. Wilmott, Michele C. Duggan, and Alexander P. Znaiden</i>	279
19. <b>5-Methoxypsoralen-Containing</b> Sunscreens <i>Antony R. Young</i>	299

20.	Contact Sensitization and <b>Photocontact</b> Sensitization of Sunscreening Agents <i>Sydney H. Dromgoole and Howard I. Maibach</i>	313
21.	Sunscreens and Hair <i>Serglo Nacht</i>	341
V. BIOLOGICAL EVALUATION OF SUNSCREEN PRODUCTS		
22.	Intrinsic and Extrinsic Photoprotection Against UVB and UVA Radiation <i>Leonard C. Harber, Vincent A. DeLeo, and Janet H. Prystowsky</i>	359
23.	Sun Protection Factors: Comparative Techniques and Selection of <b>Ultraviolet</b> Sources <i>Nicholas J. Lowe</i>	379
24.	In Vitro Models for UVB and UVA Photoprotection <i>Curtis A. Cole and Rory L. Van Fossen</i>	395
25.	Substantivity and Water Resistance of Sunscreens <i>Kays Kaidbey</i>	405
26.	UVA Animal Models for Photoprotection and Sunscreens <i>Gordon A. Groves</i>	411
27.	Multifactoral Influences on Sun Protection Factors <i>Martin Stockdale and David Roberts</i>	421
28.	Sunscreens: Effects of Amounts of Application of Sun Protection Factors <i>Annette Gottlieb, Teresa D. Bourget, and Nicholas J. Lowe</i>	441
29.	Animal Models for Sunscreens and Photoprotection <i>Curtis A. Cole</i>	447
30.	UVA Photoprotection <i>Nicholas J. Lowe</i>	459
31.	UVA Protection Factors <i>Joseph W. Stanfield, Stewart B. Siskin, and Lincoln Krochmal</i>	469
VI. CHEMICAL EVALUATION OF SUNSCREEN PRODUCTS		
32.	Quality Control of Sunscreens <i>Nadim A. Shaath</i>	483

33. <b>Modern</b> Analytical Techniques in the Sunscreen Industry <i>Nadim A. Shaath, Peter M. Griffin, and Gideon I. Andemlcael</i>	505
34. Interpretation and Evaluation: Spectroscopic Data of Sunscreens <i>Nadim A. Shaath, Peter M. Griffin, Gideon I. Andemlcael) and Louise E. Agrapldis-Paloympis</i>	537
Index	609
