

CONTENTS

PART I.	
GENERAL CONSIDERAIONS	
CHAPTER I.	
GENERAL INTRODUCTION	
Historical	11
Parasites and Parasitism	13
Habitat of Parasites	14
Life History and Mode of Transmission	14
Morphology and Classification	16
CHAPTER II.	
ETIOLOGY AND PATHOLOGY	
Specificity of Parasitic Affections	25
Organotropism	25
Pathogenicity and Nature of the Lesion	26
Defense of the Host	30
Complications of Parasites in the Body	32
Termination of Parasites from Host	36
CHAPTER III.	
ENVIRONMENTAL CONDITIONS	
Vital Requirements of Parasites	38
Effect of Temperature on Protozoan and metazoan Parasites	39
CHAPTER IV.	
CLINICAL AND LABORATORY DIAGNOSIS	
Clinical Considerations	44
Laboratory Diagnosis	45
CHAPTER V.	
TREATMENT AND PROGNOSIS	
Specific Therapy	57
The Intra-intestinal Thermal Method	65
Transduodenal Medication	68
Prognosis of Parasitic and Tropical Diseases	72
PART II.	
DISEASES CAUSED BY PROTOZOA	
CHAPTER VI.	
DYSENTERIES	
Amebic Dysentery	75

Amebic Abscesses of the Liver	85
Balantidic Dysentery	87

CHAPTER VII.
FLAGELLATE DIARRHEA

General Considerations	91
Giardiasis	91
Trichomoniasis	95
Other Flagellate Affections	97

CHAPTER IX.
TRYPANOSOMIASIS

General Considerations	126
African Sleeping Sickness	126
American Trypanosomiasis	133

CHAPTER X.
LEISHMANIASIS

General Considerations	138
Kala-azar	139
Oriental Sore	144
Espundia	147

CHAPTER XI.
SPIROCHETIASIS AND TREPONEMIASIS

General Considerations	149
Relapsing Fever	149
Infectious Jaundice	155
Rat-bite Fever	159
Seven-day Fever	160
Vincent's Angina	161
Yaws	164
Syphilis	168

PART III.
DISEASES CAUSED BY METAZOA

CHAPTER XII.
NEMATODES

General Considerations	177
Ascariasis	180
Ankylostomiasis	183
Oxyuriasis	191
Trichocephaliasis	196
Trichiniasis	197
Filariasis	203

Dracunculus (Filaria) Medinensis	213
Other Parasitic Nematodes	216

CHAPTER XIII.

TREMATODES

General Considerations	219
Clonorchiasis	222
Paragonimiasis	224
Schistosomiasis	228
Other Parasitic Trematodes	240

CHAPTER XIV.

CESTODES

General Considerations	244
Tania Saginata	247
Tania Solium	250
Hymenolepis (Tania) Nana	252
Diphyllobothrium Latum	254
Tania Echinococcus	257
Other Parasitic Cestodes	262

PART IV.

DISEASES CAUSED BY BACTERIA

CHAPTER XV.

BACTERIAL DISEASES MOST COMMON TO THE TROPICS

General Considerations	265
Cholera	265
Bacillary Dysentery	274
Plague	278
Undulant (Malta) Fever	283
Leprosy	286

PART V.

DISEASES OF UNDETERMINED ETIOLOGY

CHAPTER XVI.

DISEASES DUE TO FILTERABLE VIRUSES METABOLIC DISTURBANCES

Yellow Fever	297
Dengue	302
Phlebotomus Fever	303
Japanese River Fever	304
Typhus Fever	306
Rocky Mountain Fever	308
Trench Fever	311
Oroya Fever and Verruga Peruviana	312

Blackwater Fever	315
Pellagra	318
Beri-beri	324
Sprue	329

PART VI.

CLIMATIC DISEASES ANIMAL POISONS

CHATPER XVII.

HEAT STROKE, POTSONOUS BITES AND STINGS

General Considerations	335
Heat Hyperpyrexia	335
Heat Exhaustion	337
Sun Traumatism	338
Snake Poisons and Snake Bite	339
Poisonous Lizards	347
Poisonous Fish	347
Scorpions	348
Spiders	349
Centipedes	349
