2.3 Eating habits	22
2.4 The eating disorders	24
2.5 Conclusion	34
3 Food and alternative medicine	35
3.1 Ecology and the protest movement	35
3.2 Food and the counterrevolution	39
3.3 Alternative medical practice and the patient	47
3.4 Conclusion	51
4 Physiology of digestion	52
4.1 Basic functions of the gut	52
4.2 Mucosal immunity	58
4.3 Disorders of intestinal motility	70
4.4 Conclusion	71
5 Mechanisms of food intolerance	73
5.1 Immune responses provoked by food	74
5.2 How much is immunological?	78
5.3 Pseudoallergic mechanisms	81
5.4 Conclusion	85
6 Clinical manifestations	87
6.1 Establishing the diagnosis	87
6.2 Food intolerance in childhood	90
6.3 Reactions in older children and adults	98
6.4 Occupational reactions to food	115
6.5 Conclusion	122

7	Food additives	123
	7.1 What are they?	123
	7.2 How did the use of additives develop?	127
	7.3 Regulations on food additives	128
	7.4 Examples of additives in current use	129
	7.5 Do additives cause unpleasant reactions	131
	7.6 Confirming clinical suspicions	137
	7.7 Do we need them?	139
	7.8 Conclusion	140
8	Cow's milk and some alternatives	142
	8.1 Allergens of cow's milk	143
	8.2 Alternatives to cow's milk	144
	8.3 Cow's milk protein intolerance: prevention, treatment and research	147
	8.4 Alternative approaches to milk processing	148
	8.5 Conclusion	153
9	Gluten sensitivity and coeliac disease	154
	9.1 Coeliac disease and prolamin toxicity	155
	9.2 Nature of gluten sensitivity	157
	9.3 Dietary management	166
	9.4 Conclusion	166
10	The patient's dilemma	168
	10.1 Initiating a diet	169
	10.2 Patient self-help groups	170
	10.3 Maternal problems	172
	10.4 Dietary errors	173
	10.5 The doctor-patient relationship	174
	10.6 Diagnostic tests	175
	10.7 The need for better information	177
	10.8 Conclusion	179
	Glossary	180
	References	187
	Index	204
