

CONTENTS

UNIT 1 Evaluation of Hazardous Environmental Agents and Factors	1-7
UNIT 2 Hazardous Environmental Agents and Factors	2-9
UNIT 3 Monitoring and Analytical Instruments Used to Evaluate the Occupational Environment: Generic Descriptions and Related Calibration Aspects	3-14
UNIT 4 Evaluation of Airborne Total Particulate: Integrated Personal and Area Monitoring Using an Air Sampling Pump with a Polyvinyl Chloride Filter Medium	4-15
UNIT 5 Evaluation of Airborne Respirable Particulate: Integrated Personal and Area Monitoring Using an Air Sampling Pump with a Polyvinyl Chloride Filter Medium and Dorr-Oliver Cyclone	5-15
UNIT 6 Evaluation of Airborne Fibers as Asbestos: Integrated Personal and Area Monitoring Using an Air Sampling Pump with a Cellulose Ester Fiber Filter Medium	6-19
UNIT 7 Evaluation of Airborne Metal Dusts and Fumes: Integrated Personal and Area Monitoring Using an Air Sampling Pump with Cellulose Ester Fiber Filter Medium Learning Objectives	7-17
UNIT 8 Evaluation of Airborne Particulate: Instantaneous Area Monitoring Using a Direct- Reading Aerosol Meter	8-4
UNIT 9 Evaluation of Airborne Organic Gases and Vapors: Integrated Personal and Area Monitoring Using an Air Sampling Pump with a Solid Adsorbent Medium	9-17
UNIT 10 Evaluation of Airborne Inorganic and Organic Gases, Vapors, and Mists: Integrated Personal and Area Monitoring Using an Air Sampling Pump with a Liquid Absorbent Medium	10-17
UNIT 11 Evaluation of Airborne Combustible and Oxygen Gases: Instantaneous Area Monitoring Using a Combined Combustible and Oxygen Gas Meter	11-6
UNIT 12 Evaluation of Airborne Inorganic and Organic Gases and Vapors: Instantaneous Area Monitoring Using a Piston or Bellows Air Sampling Pump with a Solid Sorbent Detector Tube Medium	12-9
UNIT 13 Evaluation of Airborne Toxic Gases and Vapors: Instantaneous Area Monitoring Using Organic Gas and Vapor Meters	13-6
UNIT 14 Evaluation of Surface and Source Contaminants: Monitoring Using Wipe and Bulk Sample Techniques	14-7
UNIT 15 Evaluation of Airborne Bioaerosols: Integrated Area Monitoring Using an Air Sampling Pump with an Impactor and Nutrient Agar Medium	15-11
UNIT 16 Evaluation of Airborne Sound Levels: Instantaneous Area Monitoring Using a Sound Level Meter with Octave Band Analyzer	16-5
UNIT 17 Evaluation of Airborne Sound Levels: Integrated Personal Monitoring Using an Audio Dosimeter	17-6
UNIT 18 Evaluation of Personal Hearing Thresholds: Instantaneous Personal Monitoring	

Using an Audiometer	18-7
UNIT 19 Evaluation of Heat Stress: Instantaneous Area Monitoring Using a Wet-Bulb Globe Temperature Assembly and Meter	19-7
UNIT 20 Evaluation of Illumination: Instantaneous Area Monitoring Using an Illumination Meter	20-3
UNIT 21 Evaluation of Airborne Nonionizing Microwave Radiation: Instantaneous Monitoring Using a Microwave Meter	21-3
UNIT 22 Evaluation of Airborne Nonionizing Low Frequency Electromagnetic Radiation: Instantaneous Area Monitoring Using a Combined Electric and Magnetic Field Meter	22-3
UNIT 23 Evaluation of Airborne Ionizing Radiation: Instantaneous Area Monitoring Using an Ionizing Radiation Meter	23-4
UNIT 24 Evaluation of Ergonomic Factors: Conducting Anthropometric and Workstation Measurements	24-7
UNIT 25 Evaluation of Air Pressure, Velocity, and Flow Rate: Instantaneous Monitoring of a Ventilation System Using a Pitot Tube with Manometer and a Velometer	25-11
UNIT 26 Evaluation of Personal Protective Equipment: Selection, Maintenance, and Fit of Dermal and Respiratory Protective Devices	26-8
UNIT Evaluation of Personal Pulmonary Function: Instantaneous Monitoring Using an Integrated Electronic Spirometer	27-3
BIBLIOGRAPHY	B-1
APPENDIX A	
Industrial Hygiene Sampling Strategies and Statistical Analysis	A-1
INDEX	I-1
