# Table of Contents

<b>Chapter 1</b> Nutrient and Gene Interactions in Cancer.....	1
<i>Edward Giovannucci</i>	
<b>Chapter 2</b> Candidate Mechanisms for Interactions between Nutrients and Genes.....	19
<i>John C. Mathers</i>	
<b>Chapter 3</b> Biomarkers for Nutrient–Gene Interactions .....	37
<i>Claire E. Robertson and Paolo Vineis</i>	
<b>Chapter 4</b> Interaction between Folate and Methylene-tetrahydrofolate Reductase Gene in Cancer.....	57
<i>Sang-Woon Choi and Simonetta Friso</i>	
<b>Chapter 5</b> Genetic Variability in Folate-Mediated One-Carbon Metabolism and Cancer Risk .....	75
<i>Cornelia M. Ulrich</i>	
<b>Chapter 6</b> S-Adenosylmethionine and Methionine Adenosyltransferase Genes .....	93
<i>José M. Mato, M. Luz Martínez-Chantar, and Shelly C. Lu</i>	
<b>Chapter 7</b> Effects of Carotenoid Supplementation on Signal Transduction Pathways: Significance in Lung Cancer Prevention .....	113
<i>Xiang-Dong Wang and Stacey King</i>	
<b>Chapter 8</b> The Actions of the Vitamin D Receptor in Health and Malignancy; Polymorphic Associations and Gene Regulatory Actions.....	129
<i>Moray J. Campbell and Kay W. Colston</i>	
<b>Chapter 9</b> The Role of Alcohol Dehydrogenase Polymorphism in Alcohol-Associated Carcinogenesis.....	177
<i>Helmut K. Seitz and Felix Stickel</i>	

<b>Chapter 10</b>	<i>Genetic Polymorphism of N-Acetyltransferase Genes as Risk Modifiers of Colorectal Cancer from Consumption of Well-Done Meat.....</i>	189
	<i>La Creis Renee Kidd, Robert C.G. Martin, Jason H. Moore, and David W. Hein</i>	
<b>Chapter 11</b>	<i>Ferritin and Serine Hydroxymethyltransferase.....</i>	213
	<i>Patrick J. Stover</i>	
<b>Chapter 12</b>	<i>Brassica–Gene Interactions and Cancer Risk .....</i>	237
	<i>Jay H. Fowke</i>	
<b>Chapter 13</b>	<i>Conclusions and Future Perspectives .....</i>	269
	<i>Simonetta Friso, Roberto Corrocher, and Sang-Woon Choi</i>	
	<i>Index .....</i>	273
