

## CONTENTS

## BIOCEMISTRY OF PLATINUM ANTITUMOR DRUGS

1. DNA as a Target for Anticancer Coordination Compounds	3
2. Biological Consequences of Platinum-DNA Crosslinks in Mammalian Cells	27
3. Structural Chemistry of Platinum-DNA Adducts	51
4. Physicochemical and Structural Studies of the In Vitro Interactions between Platinum(II) Compounds and DNA	75
5. Model for the Interaction of cis-Diamminedichloroplatinum(II) with Simian Virus 40 DNA	101

## PLATINUM BINDING TO DNA CONSTITTENTS

6. Platinum-Oligonucleotide Structures and Their Relevance to Platinum-DNA Interaction	125
7. Platinum(II) Complex Formation with Uracil and Thymine	147
8. $^{195}\text{Pt}$ - and $^{15}\text{N}$ -NMR Studies of Antitumor Complexes	171
9. Conformational Properties of Purine and Pyrimidine Complexes of cis-Platinum: Implications for Platinum(II)-DNA Crosslinking Modes	191
10. Platinum Complexes with DNA Bases, Nucleotides, and DNA	209
11. Hydrolytic Equilibria and N7 Versus N1 Binding in Purine Nucleosides of cis-Diamminedichloroplatinum(II): Palladium(II) as a Guide to Platinum(II) Reactions at Equilibrium	231
12. Extended X-Ray Absorption Fine Structure (EXAFS) Spectroscopic Analysis of 6-Mercaptopurine Riboside Complexes of Platinum(II) and Palladium(II)	245

## PLATINUM DRUG DEVELOPMENT AND ANALYSIS

13. Synthesis and Biological Studies of a New Class of Antitumor Platinum Complexes	265
14. Chemical and Biological Activity of Metal Complexes Containing Dimethyl Sulfoxide	279
15. Determination and Location of Platinum Metals in Biological Samples by Neutron Activation and Microprobe Analyses	297

## GOLD ANTIARTHRITIC DRUGS: BIOCEMISTRY AND CHEMISTRY

18. Overview and Current Status of Gold-Containing Antiarthritic Drugs	355
19. Ligand Exchange Reactions of Gold Drugs in Model Systems and in Red Cells	371
20. Gold-Based Antiarthritic Drugs and Metabolites: Extended X-Ray Absorption Fine Structure (EXAFS) Spectroscopy and X-Ray Absorption Near Edge Spectroscopy (XANES)	385
21. Gold Thiolat Complexes In Vitro and In Vivo	401

## POSSIBLE OSMIUM ANTIARTHRITIC DRUGS

22. Osmium Carbohydrate Polymers as Potential Antiarthritic Drugs	421
-------------------------------------------------------------------	-----
