

## CONTENTS

Introduction

Section I. Classification, Sampling and Selection of Cigarettes for Analysis

Section 2. Smoking and Collection of Condensate

Section 3. I. Total Particulate Matter and Day Total Particulate Matter

2. Alkaloids (as Nicotine)

3. Condensable Vapour Phase and Dry Condensable Vapour Phase

4. Nicotine

5. Alkaloids by Autoanalysis

Section 4. 1. Neutral Fraction

2. Non-Volatile Whole Smoke Condensate

Section 5. Total Volatile Aliphatic Aldehydes

Section 6. Acrolein

Section 7. Total Steam-Volatile Acids

Section 8. Hydrogen Cyanide

Section 9. Steam-Volatile Phenols

Section 10. Individual Steam-Volatile Phenols

Section 11. Carbon Monoxide

Section 12. Nitric Oxide

Section 13. Acetonitrile

Section 14. pH of the Particulate Matter of Cigarette Smoke

Appendix I. Statistical Notes on Sampling of Cigarettes

Appendix 2. Figures

Appendix 3. Butt Lengths
