

| | |
|--|-----|
| Chapter I. Historical Aspects | |
| Text | 1 |
| Chapter II. Objective to Laboratory Studies | |
| Text | 3 |
| Chapter III. Tobacco Production and Processing | |
| A. Introduction | 5 |
| B. Characteristics of Tobacco | 5 |
| C. Curing, Aging, and Fermentation of Tobacco | 21 |
| D. Manufactured Products of Tobacco | 39 |
| E. Summary | 44 |
| Chapter IV. Reconstituted Tobacco Sheet | |
| A. Introduction | 47 |
| B. Utilization of Reconstituted Tobacco Sheet | 48 |
| C. Technology of Reconstituted Sheet | 51 |
| D. Tobacco Sheet Smoke | 76 |
| E. General Discussion | 80 |
| Chapter V. Some Characteristics of Tobacco Smoke | |
| A. Physical State of Tobacco Smoke | 85 |
| B. Smoking Machines and Smoking Techniques | 94 |
| C. Tobacco Extracts | 125 |
| D. Combustion and Smoke Temperatures | 127 |
| Chapter VI. Selected Laboratory Methods in Tobacco Carcinogenesis | |
| A. Introduction | 133 |
| B. Biological Testing | 134 |
| C. Chemical Analysis of Tobacco Smoke and Tobacco Smoke Condensate | 157 |
| Chapter VII. Biological Tests for Tumorigenic and Cilia-Toxic Activity | |
| A. Tobacco Smoke Condensate | 181 |
| B. Tobacco Extracts | 198 |
| C. Tobacco Smoke | 202 |
| D. Tobacco Smoke Condensate Fractions | 225 |
| E. Studies of Special Factors | 232 |
| F. Cilia-Toxic Components | 250 |
| Chapter VIII. Certain Constituents of Tobacco Products | |
| A. Particulate Matter | 317 |
| B. Polynuclear Aromatic Hydrocarbons (PAH) | 330 |
| C. Terpenes, Phthalatic, and Certain Esters | 351 |

| | |
|---|-----|
| D. Alkanes and Alkenes in Tobacco and Tobacco Smoke | 365 |
| E. Heterocyclic Nitrogen Compounds | 371 |
| F. Phenolic Compounds and Carboxylic Acids | 381 |
| G. Aldehydes and Ketones | 407 |
| H. Steroids | 419 |
| I. Epoxides, Peroxy Compounds, and Lactones | 423 |
| J. Nitrosamines | 432 |
| K. Vapor Phase of Tobacco | 438 |
| L. Nitrate Content of Tobacco | 453 |
| M. Charged Particles, Organic Radicals, and Radioactivity | 458 |
| N. Pesticides | 470 |
| O. Tobacco Additives | 480 |
| P. Metallic Constituents | 488 |
| Q. Summary | 494 |
| Chapter IX. Reduction of Tumorigenic and Cilia-Toxic Activity | |
| A. Reduction of Total Smoke and Particulate Matter | 505 |
| B. Specific Reduction of Tumorigenic Agents | 516 |
| C. Reducing Effects of Tobacco Smoke on Mucus Transport | 535 |
| D. Summary | 543 |
| Chapter X. Filtration of Tobacco Smoke Particles | |
| A. Introduction | 545 |
| B. The Physical Nature of Cigarette Smoke | 545 |
| C. The Mechanism of Filtration of Cigarette Smoke Particles | 548 |
| D. Testing Efficiency of Filters for Removing Smoke Particles | 554 |
| E. Tobacco Smoke Filters and Filter Materials | 565 |
| F. Amount of TPM Delivered by Commercial Cigarettes | 572 |
| G. Summary and Conclusions | 574 |
| Chapter XI. The Selective Filtration of Tobacco Smoke | |
| A. Introduction | 577 |
| B. The Nature of Cigarette Smoke | 578 |
| C. Filtration of Tobacco Smoke | 571 |
| D. Measurement and Description of Selectivity | 587 |
| E. Experimental Evidence of Selectivity | 593 |
| F. Concluding Discussion | 608 |
| G. Appendix: Summary of Patents Dealing with Selective Filtration (1937-1964) | 609 |
| Chapter XII. Interpretation of Experimental Findings | |
| A. The Carcinogenicity of Tobacco Smoke | 623 |
| B. Cilia Toxicity and Mucus-Coagulating Properties of Tobacco Smoke | 629 |
| C. Indicators for Biological Activities of Tobacco Smoke | 630 |
| D. Assays in Experimental Tobacco Carcinogenesis | 631 |

| | |
|---|-----|
| E. The Possible Mechanism of Tobacco Carcinogenesis | 631 |
| F. Inhalation Studies | 632 |
| G. Future Studies | 635 |
| H. Relation of Data to Human Cancer Problem | 643 |
| References | 649 |
| Appendix: Literature | 687 |
| Author Index | 691 |
| Subject Index | 713 |
