

1. The Basics of Artificial Organs	1
2. Synthetic Polymeric Biomaterials	13
3. Artificial Organs and the Immune Reponse	31
4. The Basics of Biomedical Polymers: Interfacial Factors	39
5. Fibrinogen-Glass Interactions: A Synopsis of Recent Research	45
6. Silicones in Artificial Organs	63
7. Characteristics of an Implantable Elastomer: Finger Joint Prosthesis Application	99
8. The Current Status of Prosthetic Heart Valves	111
9. Polymeric Membranes for Artificial Lungs	151
10. Blood Compatibility of Artificial Organs: Transient Leukopenia in Hemodialysis	163
11. Artificial Cells	171
12. Infected Skin Wounds in Rodents: Treatment with a Hydrogel Paste Containing Silver Nitrate	181
13. Skin Regeneration with a Bioreplaceable Polymeric Template	191
