

CONTENTS

Chapter 1		
Collection and Withdrawal of Body Fluids and Infusion Techniques		
I.	Introduction	1
II.	Collection and Withdrawal of Body Fluids	2
III.	Infusion Techniques	32
	References	40
Chapter 2		
Anesthesia and Sedation		
I.	Introduction	44
II.	Aims of an Ideal General Anesthetic	44
III.	Objectives and Purposes of Different Types of Anesthesia	45
IV.	Basic Principles	45
V.	Methods of Preanesthesia	62
VI.	Methods of Anesthesia	73
VII.	The Use of Postoperative Analgesics and Sedatives	81
VIII.	Emergency Measures for Experimental Animals Undergoing Procedures Requiring an Anesthetic Agent	82
IX.	Preparation of Anesthesia of Individual Experimental Animals	85
X.	Concluding Comments	100
	References	101
Chapter 3		
Care of Animals During Surgical Experiments		
I.	Introduction	103
II.	Preoperative Care	104
III.	Care During Operation	119
IV.	Postoperative Care	138
	References	148
Chapter 4		
Radiography		
I.	Introduction	151
II.	Principles of Radiographic Interpretation	152
III.	Principles of Radiographic Technique	154
IV.	Radiation Safety	162
V.	Conclusion	163
	References	163
	Additional Bibliography	164

Chapter 5

Methods of Euthanasia and Disposal of Laboratory Animals

I.	Introduction	167
II.	Factors Involved in Euthanasia	171
III.	Reasons for Euthanasia	173
IV.	Procedures	174
V.	Disposal	191
VI.	Source Material	194
	References	195

Chapter 6

Methods of Parasitic Infections: Outline of General Principles

I.	Introduction	197
II.	Cautions in the Choice of a Parasite and Animal Host	200
III.	Factors Which Influence the Course of Infection with a Parasite	201
	References	211

Chapter 7

Methods in Germfree Animal Research

I.	Introduction	215
II.	Germfree Animal Equipment	218
III.	Securing and Maintaining Germfree Animals	226
IV.	The Germfree Animal on Experiment	251
V.	Some Information Derived from Germfree Animal Studies	257
VI.	Outlook for the Future	266
	References	267

Chapter 8

Aerosol Challenge of Animals

I.	Introduction	274
II.	Basic Aerosol Terminology	276
III.	Aerosol Test Facilities and Systems	279
IV.	Generation of Experimental Aerosols	285
V.	Sampling Biological Aerosols	290
VI.	Aerosol Challenge of Animals	296
VII.	Maintenance of Aerosol-Challenged Animals	308
VIII.	Diagnostic Procedures for Aerosol-Challenged Animals	322
IX.	Laboratory Design Principles	330
X.	Safety Management in Infectious Disease laboratories	334
	References	336

Chapter 9

Principles in Drug Administration

I.	Introduction	343
----	--------------	-----

II.	Preparation of Animal	346
III.	Preparation of Drug	349
IV.	Gastrointestinal Routes	351
V.	Parenteral Routes	352
VI.	Inhalation Route	354
VII.	Topical Route	356
VIII.	Choice of Animal Species	357
IX.	Experimental Design and Statistical Evaluation	358
X.	Conclusion	358
	References	359
	Supplementary Bibliography	359
	AUTHOR INDEX	361
	SUBJECT INDEX	372
