I. SOUND WAVES		
1.1	INTRODUCTION	1
1.2	SOUND WAVES	2
1.3	ACOUSTICAL WAVE EQUATION	4
	A. Equation of Continuity.....	4
	B. Equation of Motion.....	5
	C. Compressibility of a Gas.....	5
	D. Condensation.....	6
	E. D'Alembertian Wave Equation.....	7
1.4	PLANE SOUND WAVES	10
	A. Particle Velocity in a Plane Sound Wave.....	11
	B. Pressure in a Plane Sound Wave.....	11
	C. Particle Amplitude in a Plane Sound Wave.....	11
1.5	SPHERICAL SOUND WAVES	12
	A. Pressure in a Spherical Sound Wave.....	13
	B. Particle Velocity in a Spherical Sound Wave.....	13
	C. Phase Angle between the Pressure and Particle Velocity in a Spherical Sound Wave.....	14
	D. Ratio of the Absolute Magnitudes of the Particle Velocity and the Pressure in a Spherical Sound Wave.....	14
1.6	STATIONARY SOUND WAVES	14
1.7	SOUND ENERGY DENSITY	16
1.8	SOUND INTENSITY	17
1.9	DECIBELS (BELS)	17
1.10	DOPPLER EFFECT	18
1.11	REFRACTION AND DIFFRACTION	19
1.12	ACOUSTICAL RECIPROCITY THEOREM	21
1.13	ACOUSTICAL PRINCIPLE OF SIMILARITY	23
1.14	LONGITUDINAL WAVES IN A ROD	23
1.15	TORSIONAL WAVES IN A ROD	25
II. ACOUSTICAL RADIATING SYSTEMS		
2.1	INTRODUCTION	26
2.2	SIMPLE POINT SOURCE	26
	A. Point Source Radiating into an Infinite Medium. Solid Angle of 4π Steradians.....	26

CHAPTER	PAGE
B. Point Source Radiating into a Semi-Infinite Medium. Solid Angle of 2π Steradians.	27
C. Point Source Radiating into a Solid Angle of π Steradians.	27
D. Point Source Radiating into a Solid Angle of $\pi/2$ Steradians.	27
E. Application of the Simple Source.	27
2.3 DOUBLE SOURCE (DOUBLET SOURCE).	28
2.4 SERIES OF POINT SOURCES.	31
2.5 STRAIGHT LINE SOURCE.	32
2.6 TAPERED STRAIGHT LINE SOURCE.	33
2.7 NONUNIFORM STRAIGHT LINE SOURCE.	34
2.8 CURVED LINE SOURCE (ARC OF A CIRCLE).	34
2.9 CIRCULAR RING SOURCE.	37
2.10 PLANE CIRCULAR SURFACE SOURCE.	38
2.11 NONUNIFORM PLANE CIRCULAR SURFACE SOURCE.	39
2.12 PLANE SQUARE SURFACE SOURCE.	39
2.13 PLANE RECTANGULAR SURFACE SOURCE.	40
2.14 HORN SOURCE.	40
A. Exponential Horns.	41
B. Conical Horns.	42
C. Parabolic Horns.	43
2.15 CURVED SURFACE SOURCE.	44
2.16 CONE SURFACE SOURCE	47
III. MECHANICAL VIBRATING SYSTEMS	
3.1 INTRODUCTION	50
3.2 STRINGS	50
3.3 TRANSVERSE VIBRATION OF BARS	52
A. Bar Clamped at One End.	52
B. Bar Free at Both Ends.	54
C. Bar Clamped at Both Ends.	54
D. Bar Supported at Both Ends.	54
E. Bar Clamped at One End and Supported at the Other.	55
F. Bar Supported at One End and Free at the Other.	55
G. Tapered Cantilever Bars.	55
3.4 STRETCHED MEMBRANES.	56
A. Circular Membrane.	56
B. Square Membrane.	58
C. Rectangular Membrane.	58
3.5 CIRCULAR PLATES.	58
A. Circular Clamped Plate.	59
B. Circular Free Plate.	61
C. Circular Plate Supported at the Center.	62
D. Circular Plate Supported at the Outside.	62
3.6 LONGITUDINAL VIBRATION OF BARS	62

CONTENTS

ix

CHAPTER		PAGE
3.7	TORSIONAL VIBRATION OF BARS	64
3.8	OPEN AND CLOSED PIPES	65

IV. DYNAMICAL ANALOGIES

4.1	INTRODUCTION	67
4.2	DEFINITIONS	69
4.3	ELEMENTS	74
4.4	RESISTANCE	75
	A. Electrical Resistance	75
	B. Mechanical Rectilineal Resistance	75
	C. Mechanical Rotational Resistance	75
	D. Acoustical Resistance	76
4.5	INDUCTANCE, MASS, MOMENT OF INERTIA, INERTANCE	76
	A. Inductance	76
	B. Mass	77
	C. Moment of Inertia	77
	D. Inertance	77
4.6	ELECTRICAL CAPACITANCE, RECTILINEAL COMPLIANCE, ROTATIONAL COMPLIANCE, ACOUSTICAL CAPACITANCE	78
	A. Electrical Capacitance	78
	B. Rectilineal Compliance	79
	C. Rotational Compliance	79
	D. Acoustical Capacitance	79
4.7	REPRESENTATION OF ELECTRICAL, MECHANICAL RECTILINEAL , MECHANICAL ROTATIONAL AND ACOUSTICAL ELEMENTS	80

V. ACOUSTICAL ELEMENTS

5.1	INTRODUCTION	86
5.2	ACOUSTICAL RESISTANCE	86
5.3	ACOUSTICAL IMPEDANCE OF A TUBE OF SMALL DIAMETER	87
5.4	ACOUSTICAL IMPEDANCE OF A NARROW SLIT	87
5.5	ACOUSTICAL RESISTANCE OF SILK CLOTH	88
5.6	INERTANCE	89
5.7	ACOUSTICAL CAPACITANCE	89
5.8	MECHANICAL AND ACOUSTICAL IMPEDANCE LOAD UPON A VIBRATING PISTON	90
5.9	MECHANICAL AND ACOUSTICAL IMPEDANCE LOAD UPON A PULSATING SPHERE	91
5.10	MECHANICAL AND ACOUSTICAL IMPEDANCE LOAD UPON AN OSCILLATING SPHERE	93
5.11	ACOUSTICAL IMPEDANCE OF A CIRCULAR ORIFICE IN A WALL OF INFINITESIMAL THICKNESS	94
5.12	ACOUSTICAL IMPEDANCE OF AN OPEN PIPE WITH LARGE FLANGES	94
5.13	HORNS	94

CHAPTER	PAGE
5.14 FUNDAMENTAL HORN EQUATION.....	95
5.15 INFINITE CYLINDRICAL HORN (INFINITE PIPE).....	96
5.16 INFINITE PARABOLIC HORN.....	96
5.17 INFINITE CONICAL HORN.....	97
5.18 INFINITE EXPONENTIAL HORN.....	98
5.19 INFINITE HYPERBOLIC HORN.....	99
5.20 THROAT ACOUSTICAL IMPEDANCE CHARACTERISTIC OF INFINITE PARABOLIC, CONICAL, EXPONENTIAL, HYPERBOLIC AND CYLINDRICAL HORNS...	100
5.21 FINITE CYLINDRICAL HORN.....	100
5.22 FINITE CONICAL HORN.....	102
5.23 FINITE EXPONENTIAL HORN.....	104
5.24 THROAT ACOUSTICAL IMPEDANCE CHARACTERISTICS OF FINITE EXPONENTIAL HORNS.....	106
5.25 EXPONENTIAL CONNECTORS.....	109
5.26 A HORN CONSISTING OF MANIFOLD EXPONENTIAL SECTIONS.....	111
5.27 CLOSED PIPE WITH A FLANGE.....	112
5.28 SOUND TRANSMISSION IN TUBES.....	113
5.29 TRANSMISSION FROM ONE PIPE TO ANOTHER PIPE OF DIFFERENT CROSS-SECTIONAL AREA.....	114
5.30 TRANSMISSION THROUGH THREE PIPES.....	117
5.31 TRANSMISSION FROM ONE MEDIUM TO ANOTHER MEDIUM.....	119
5.32 TRANSMISSION THROUGH THREE MEDIA.....	119
5.33 TUBES LINED WITH ABSORBING MATERIAL.....	120
5.34 RESPONSE OF A VIBRATING SYSTEM OF ONE DEGREE OF FREEDOM.....	120
VI. DIRECT RADIATOR LOUD SPEAKERS	
6.1 INTRODUCTION.....	123
6.2 SINGLE-COIL, SINGLE-CONE LOUD SPEAKER.....	124
6.3 MULTIPLE, SINGLE-CONE, SINGLE-COIL LOUD SPEAKER.....	136
6.4 SINGLE-COIL, DOUBLE-CONE LOUD SPEAKER.....	139
6.5 DOUBLE-COIL, SINGLE-CONE LOUD SPEAKER.....	140
6.6 DOUBLE-COIL, DOUBLE-CONE LOUD SPEAKER.....	141
6.7 MECHANICAL NETWORKS FOR CONTROLLING THE HIGH FREQUENCY RESPONSE OF A LOUD SPEAKER.....	141
A. Conventional Single Coil Loud Speaker.....	143
B. Loud Speaker with a Compliance Shunting the Cone Mechanical Impedance.....	143
C. Loud Speaker with a Compliance Shunting; a Compliance and Mass in Parallel, Connected in Series with the Cone Mechanical Impedance.....	144
D. Loud Speaker with a "T" Type Filter Connecting the Voice Coil Mass and the Cone Mechanical Impedance.....	144
6.8 LOUD SPEAKER BAFFLES.....	145
A. Irregular Baffle.....	145
B. Large Baffle, Different Resonant Frequencies.....	146

CONTENTS

xi

CHAPTER	PAGE
C. Low Resonant Frequency. Different Baffle Sizes.....	146
D. Different Resonant Frequencies and Different Baffle Sizes.....	148
6.9 CABINET LOUD SPEAKERS	148
A. Low Resonant Frequency. Different Cabinet Sizes.....	150
B. Different Resonant Frequencies and Different Cabinet Sizes.....	151
C. Effect of the Depth of the Cabinet.....	151
6.10 BACK ENCLOSED CABINET LOUD SPEAKER	151
6.11 ACOUSTICAL PHASE INVERTER LOUD SPEAKER	154
6.12 ACOUSTICAL LABYRINTH LOUD SPEAKER	155
6.13 COMBINATION HORN AND DIRECT RADIATOR LOUD SPEAKER	156
6.14 FEEDBACK APPLIED TO A LOUD SPEAKER	158
6.15 TRANSIENT RESPONSE	159
6.16 DISTORTION	163
A. Nonlinear Suspension System.....	164
B. Distortion Characteristics of a Nonlinear Suspension System.....	166
C. Response Frequency Characteristics of a Direct Radiator Loud Speaker with a Nonlinear Suspension System	168
D. Distortion Due to Inhomogeneity of the Air Gap Flux.....	169
E. Frequency — Modulation Distortion.....	171
F. Air Nonlinear Distortion	172
6.17 DIAPHRAGMS, SUSPENSIONS, AND VOICE COILS	173
6.18 HIGH FREQUENCY SOUND DISTRIBUTOR	176
6.19 FIELD STRUCTURES	177

VII. HORN LOUD SPEAKERS

7.1 INTRODUCTION	184
7.2 EFFICIENCY	184
A. The Relation between the Voice Coil Mass, the Load Mechanical Resistance and the Initial Efficiency.....	185
B. The Effect of the Mass of the Vibrating System upon the Efficiency	188
C. The Effect of the Air Chamber upon the Efficiency	190
D. The Effect of the Generator Electrical Impedance and the Mechan- ical Impedance at the Throat of the Horn upon the Efficiency.	192
E. The Effect of the Voice Coil Temperature upon the Efficiency....	193
F. The Effect of the Sound Radiation from the Unloaded Side of the Diaphragm upon the Efficiency.....	194
7.3 DISTORTION	196
A. Distortion Due to Air Overload in the Horn.....	196
B. Distortion Due to Variation in Volume of the Air Chamber.....	198
C. Distortion Due to the Diaphragm Suspension System.....	200
D. Distortion Due to a Nonuniform Magnetic Field in the Air Gap..	200
E. Subharmonic Distortion.....	201
F. Power Handling Capacity and the Voice Coil Temperature.....	201
G. Power Handling Capacity and the Amplitude of the Diaphragm..	202

CHAPTER	PAGE
7.4 HORN LOUD SPEAKER SYSTEMS..	203
A. Single Horn, Single Channel System..	203
B. Multiple Horn, Multiple Channel System..	206
C. Compound Horn Loud Speaker..	208
D. Multiple Horn, Single Channel System..	209
E. Folded Horns ..	210
F. Horn Loud Speaker Mechanisms..	211
G. Diaphragms and Voice Coils..	212
H. Field Structures..	212
I. Horn Walls. Vibration-and Absorption..	213
 VIII. MICROPHONES	
8.1 INTRODUCTION	214
8.2 PRESSURE MICROPHONES	214
A. Carbon Microphones..	214
1. Single Button Carbon Microphone..	214
2. Double Button Carbon Microphone..	218
B. Condenser Microphone.....	220
C. Piezoelectric (Crystal) Microphones.....	224
1. Direct Actuated Crystal Microphone.....	224
2. Diaphragm Actuated Crystal Microphone.....	226
D. Moving Conductor Microphones.....	226
1. Moving Coil Microphone (Dynamic Microphone).....	226
2. Inductor Microphone (Straight Line Conductor).....	229
3. Ribbon Microphone.....	229
E. Electronic Microphone.....	233
8.3 VELOCITY MICROPHONES, FIRST ORDER GRADIENT MICROPHONES	237
A. Pressure Gradient Microphone.....	237
B. Velocity Microphone.....	241
8.4 UNIDIRECTIONAL MICROPHONES	253
A. Combination Unidirectional Microphones.....	253
1. The Response of the Unidirectional Microphone as a Function of the Distance and the Frequency.....	255
2. Efficiency of Energy Response to Random Sounds of the Unidirectional Microphone as a Function of the Relative Sensitivities of the Bidirectional and Nondirectional Microphones.....	256
3. Efficiency of Energy Response to Random Sounds of a Unidirectional Microphone as a Function of the Phase Angle Between the Two Units.....	257
4. Distortion of the Directional Pattern in the Unidirectional Microphone.....	260
B. Single Element Unidirectional Microphones.....	260
1. Phase Shifting Unidirectional Microphone.....	260
2. Polydirectional Microphone.....	261

 X. MEASUREMENTS	
10.1 INTRODUCTION.....	340
10.2 CALIBRATION OF MICROPHONES.....	340
A. Response Frequency Characteristic.....	340
1. Pressure Response.....	340
a. Pistonphone.....	341
b. Thermophone.....	342
c. Electrostatic Actuator.....	343
2. Field Response.....	344
a. Rayleigh Disk.....	344
b. Reciprocity.....	345
3. Artificial Voice.....	349

CHAPTER

	4. Artificial Throat.....	349
	B. Directional Characteristic.....	350
	C. Nonlinear Distortion Characteristic.....	351
	D. Phase Distortion Characteristic.....	352
	E. Electrical Impedance Frequency Characteristic.....	352
	F. Transient Response Characteristic.....	353
10.3	TESTING OF LOUD SPEAKERS.....	353
	A. Response Frequency Characteristic.....	353
	1. Pressure Response.....	353
	2. Apparatus for Measuring the Sound Pressure Frequency Relationship of a Sound Source.....	354
	3. Calibration of the Sound Measuring Equipment.....	357
	4. Free Field Sound Room.....	359
	5. Outdoor Response.....	363
	6. Small and Partially Deadened Room.....	364
	7. Arrangement of Loud Speakers for Test.....	364
	8. Living Room Measurements.....	365
	9. Theater Measurements.....	365
	10. Automobile Measurements.....	365
	B. Directional Characteristic.....	366
	C. Nonlinear Distortion Characteristic.....	366
	D. Efficiency Frequency Characteristic.....	370
	1. Direct Determination of Radiated Power.....	370
	2. Indirect Determination of Radiated Power.....	373
	E. Phase Distortion Characteristic.....	374
	F. Electrical Impedance Frequency Characteristic.....	374
	G. Transient Response Characteristic.....	375
	H. Subjective Measurements.....	376
10.4	TESTING OF TELEPHONE RECEIVERS.....	376
	A. Subjective Measurements.....	376
	B. Objective Measurements.....	377
	1. Artificial Ear.....	377
	2. Artificial Mastoid.....	378
10.5	TESTING OF PHONOGRAPHS.....	378
	A. Measurement of the Response of a Phonograph Record by the Optical Method.....	378
	B. Testing of Phonograph Pickups.....	380
	C. Testing of Mechanical Phonographs.....	380
	D. Measurement of Mechanical Noise Produced by a Phonograph Pickup.....	380
10.6	MEASUREMENT OF VOWS.....	381
10.7	MEASUREMENT OF ACOUSTICAL IMPEDANCE.....	381
10.8	MECHANICAL IMPEDANCE BRIDGE.....	384
10.9	MEASUREMENT OF POROSITY.....	387
10.10	MEASUREMENT OF D.C. ACOUSTICAL RESISTANCE (FLOW RESISTANCE)...	388

10.11 MEASUREMENT OF REVERBERATION TIME.....	390
10.12 MEASUREMENT OF ABSORPTION COEFFICIENT.....	391
10.13 MEASUREMENT OF NOISE.....	392
10.14 MEASUREMENT OF TRANSMISSION COEFFICIENT.....	394
10.15 AUDIOMETRY.....	394
10.16 ARTICULATION MEASUREMENTS.....	395
10.17 TESTING OF HEARING AIDS.....	395
XI. ARCHITECTURAL ACOUSTICS AND THE COLLECTION AND DIS- PERSION OF SOUND	
11.1 INTRODUCTION.....	397
11.2 DISPERSION OF SOUND.....	398
A. Sound Absorption and Reverberation.....	398
B. Mechanism of Sound Absorption by Acoustical Materials.....	401
C. Functional Sound Absorbers.....	405
D. Articulation and Reverberation Time.....	407
E. Sound Motion Picture Reproducing System.....	408
F. Sound Re-enforcing System.....	411
G. Theater Acoustics.....	415
H. Reverberation Time of a Theater for the Reproduction of Sound..	416
I. Power Requirements for Reproducing Systems.....	417
J. Noise at Different Locations.....	419
K. Public Address Systems.....	420
L. Orchestra and Stage Shell.....	424
M. General Announce and Paging Systems.....	425
N. Intercommunicating Systems.....	426
O. Radio Receiver Operating in a Living Room.....	427
P. Radio Receiver Operating in an Automobile.....	428
Q. Absorption of Sound in Passing Through Air.....	429
R. Sound Transmission Through Partitions.....	430
11.3 COLLECTION OF SOUND.....	432
A. Sound Collecting System.....	432
B. Broadcasting Studios.....	436
C. Scoring and Recording Studios.....	440
D. Vocal Studios.....	441
E. Reverberation Time of Broadcasting, Recording and Scoring Studios.....	442
F. Sound Stages for Motion Pictures and Television.....	442
G. Synthetic Reverberation.....	445
H. Volume Limiters, Compressors and Expanders.....	446
11.4 COMPLETE SOUND REPRODUCING SYSTEMS.....	447
A. Telephone.....	447
B. Binaural Sound Reproducing System.....	448
C. Monaural Sound Reproducing System.....	449
D. Auditory Perspective Reproducing System.....	450

E. Sound Motion Picture Reproducing System.....	450
F. Radio Sound Reproducing System.....	452
G. Phonograph Reproducing System.....	454
H. Magnetic Sound Reproducing System.....	455

XII. SPEECH, MUSIC AND HEARING

12.1 INTRODUCTION.....	457
12.2 HEARING MECHANISM.....	457
12.3 VOICE MECHANISM.....	459
12.4 ARTIFICIAL VOICE MECHANISMS.....	463
A. Artificial Larynx.....	463
B. Voder.....	465
C. Vocoder.....	466
12.5 VISIBLE SPEECH.....	466
12.6 RESPONSE FREQUENCY CHARACTERISTICS OF EARS.....	467
12.7 LOUDNESS.....	468
12.8 PITCH.....	468
12.9 MASKING.....	469
12.10 NONLINEARITY OF THE EAR.....	470
12.11 EFFECT OF PHASE RELATIONS AMONG THE HARMONICS.....	472
12.12 MODULATION (VIBRATO).....	472
12.13 MINIMUM PERCEPTIBLE DIFFERENCES.....	473
12.14 TIMBRE (TONE QUALITY).....	474
12.15 DURATION.....	475
12.16 GROWTH AND DECAY.....	475
12.17 AUDITORY LOCALIZATION.....	475
12.18 HEARING ACUITY IN THE UNITED STATES POPULATION.....	476
12.19 THE FREQUENCY AND VOLUME RANGES OF SPEECH AND MUSIC.....	477
12.20 THE EFFECT OF FREQUENCY DISCRIMINATION UPON THE ARTICULATION OF REPRODUCED SPEECH.....	478
12.21 THE EFFECT OF FREQUENCY DISCRIMINATION UPON THE QUALITY OF REPRODUCED MUSIC.....	479
12.22 ABSOLUTE AMPLITUDES AND SPECTRA OF SPEECH, MUSICAL INSTRUMENTS AND ORCHESTRAS.....	480
12.23 NOISE IN REPRODUCING SYSTEMS.....	483
12.24 ROOM NOISE AND THE REPRODUCTION OF SOUND.....	485
12.25 COMBINATION TONES AND NONLINEAR TRANSDUCERS.....	487
12.26 EFFECT OF NONLINEAR DISTORTION UPON THE QUALITY OF REPRODUCED SPEECH AND MUSIC.....	488
12.27 FREQUENCY RANGES OF SOUND REPRODUCING SYSTEMS.....	491
12.28 FREQUENCY RANGE PREFERENCE FOR REPRODUCED SPEECH AND MUSIC..	493
12.29 FREQUENCY RANGE PREFERENCE FOR LIVE SPEECH AND MUSIC.....	495
12.30 MUSICAL SCALE.....	497
12.31 FUNDAMENTAL FREQUENCY RANGES OF VOICES AND MUSICAL INSTRUMENTS	498

XIII. UNDERWATER SOUND

13.1	INTRODUCTION.....	501
13.2	SOUND WAVES IN WATER.....	501
13.3	DIRECT RADIATOR DYNAMIC SUBAQUEOUS LOUD SPEAKER.....	503
13.4	SUBAQUEOUS CONDENSER MICROPHONE.....	505
13.5	HIGH FREQUENCY DIRECT RADIATOR DYNAMIC SUBAQUEOUS LOUD SPEAKER AND MICROPHONE.....	506
13.6	MAGNETIC SUBAQUEOUS LOUD SPEAKER.....	507
13.7	MAGNETROSTRICTION SUBAQUEOUS LOUD SPEAKER.....	509
13.8	MAGNETROSTRICTION SUBAQUEOUS MICROPHONE.....	511
13.9	QUARTZ CRYSTAL SUBAQUEOUS LOUD SPEAKER.....	512
13.10	QUARTZ CRYSTAL SUBAQUEOUS MICROPHONE.....	515
13.11	QUARTZ CRYSTAL SANDWICH LOUD SPEAKER AND MICROPHONE.....	516
13.12	ROCHELLE SALT CRYSTAL SUBAQUEOUS LOUD SPEAKER AND MICROPHONE.....	517
13.13	ECHO DEPTH SOUNDING SONAR.....	518
13.14	ECHO DIRECTION RANGING SONAR.....	519
13.15	COMMUNICATION SONAR.....	520

XIV. ULTRASONICS AND SUPERSONICS

14.1	INTRODUCTION.....	522
14.2	SUPERSONIC AND ULTRASONIC GENERATORS.....	522
14.3	CAVITATION DUE TO SUPERSONICS.....	523
14.4	DISPERSION DUE TO SUPERSONICS.....	523
14.5	EMULSIFICATION DUE TO SUPERSONICS.....	524
14.6	COAGULATION DUE TO SUPERSONICS.....	524
14.7	CHEMICAL EFFECTS OF SUPERSONICS AND ULTRASONICS.....	525
14.8	BIOLOGICAL EFFECTS OF SUPERSONICS.....	525
14.9	THERMAL EFFECTS OF SUPERSONICS.....	526
14.10	SUPERSONICS AS A DETERGENT.....	526
14.11	TELEVISION SYSTEM MODULATION BY ULTRASONICS.....	526
14.12	TESTING OF MATERIALS BY MEANS OF ULTRASONICS.....	527
