

Contents

Chapter 1	Introduction	1
1.1	Scope and Organization	5
Chapter 2	Non-Newtonian Fluid Behavior	9
2.1	Introduction	9
2.2	Definition of a Newtonian Fluid.....	10
2.3	Non-Newtonian Fluids.....	14
2.3.1	Time-Independent Behavior	15
2.3.1.1	Shear-Thinning or Pseudoplastic Fluids.....	15
2.3.1.2	Visco-Plastic Fluids	22
2.3.1.3	Shear-Thickening Fluids	26
2.3.2	Time-Dependent Behavior	28
2.3.2.1	Thixotropy	29
2.3.2.2	Rheopexy or Negative Thixotropy.....	30
2.3.3	Visco-Elastic Behavior of Fluids	32
2.3.3.1	Normal Stress Effects in Steady Shearing Flows	33
2.3.3.2	Elongational Flow	37
2.3.3.3	Mathematical Models for Visco-Elastic Behavior	40
2.4	Dimensional Considerations in the Fluid Mechanics of Visco-Elastic Fluids.....	42
2.5	Experimental Techniques: Rheometry	45
2.6	Conclusions	46
	Nomenclature	47
Chapter 3	Rigid Particles in Time-Independent Liquids without a Yield Stress	49
3.1	Introduction	49
3.2	Governing Equations for a Sphere	50
3.3	Spherical Particles in Newtonian Fluids	53
3.3.1	Drag Force	54
3.3.2	Free-Fall Velocity	56
3.3.3	Unsteady Motion	57

3.4	Spheres in Shear-Thinning Liquids	59
3.4.1	Drag Force	59
3.4.1.1	Theoretical Developments in Creeping Flow Region	59
3.4.1.2	Experimental Results	76
3.4.1.3	Drag Force at High Reynolds Numbers	85
3.4.2	Free-Fall Velocity	93
3.4.3	Flow Field	94
3.4.4	Unsteady Motion	95
3.4.5	Effect of Imposed Fluid Motion	98
3.5	Spheres in Shear-Thickening Liquids	100
3.6	Drag on Light Spheres Rising in Pseudoplastic Media	101
3.7	Pressure Drop Due to a Settling Sphere	103
3.8	Nonspherical Particles	104
3.8.1	Introduction	104
3.8.2	Drag Force	105
3.8.2.1	Newtonian Fluids	105
3.8.2.2	Shear-Thinning Liquids	109
3.9	Conclusions	120
	Nomenclature	121
Chapter 4	Rigid Particles in Visco-Plastic Liquids	123
4.1	Introduction	123
4.2	Spheres in Visco-Plastic Liquids	129
4.2.1	Static Equilibrium	129
4.2.2	Flow Field	130
4.2.3	Drag Force	136
4.2.3.1	Theoretical Developments	136
4.2.3.2	Experimental Correlations	141
4.2.4	Values of Yield Stress Used in Correlations	147
4.2.5	Time-Dependence of Velocity in Visco-Plastic Fluids	149
4.3	Flow Past a Circular Cylinder	152
4.4	Flow Normal to a Plate	157
4.5	Nonspherical Particles	158
4.6	Conclusions	159
	Nomenclature	159
Chapter 5	Rigid Particles in Visco-Elastic Fluids	161
5.1	Introduction	161
5.2	Flow over a Sphere	162
5.2.1	Theoretical Developments	168

5.2.1.1	Drag Force on an Unbounded ($\beta = 0$) Sphere in Creeping Region ($Re \rightarrow 0$)	168
5.2.1.2	Drag Force on a Sphere for $\beta = 0.5$ and $Re \rightarrow 0$: The Benchmark Problem	172
5.2.1.3	Wake Phenomenon	175
5.2.2	Experimental Results	177
5.2.2.1	Shear-Thinning Visco-Elastic Liquids	177
5.2.2.2	Nonshear-Thinning Visco-Elastic Liquids	182
5.2.3	The Time Effect	185
5.2.4	Velocity Overshoot	186
5.2.5	Drag Reducing Fluids	188
5.3	Flow over a Long Circular Cylinder	190
5.4	Interaction between Viscoelasticity, Particle Shape, Multiple Particles, Confining Boundaries, and Imposed Fluid Motion	194
5.5	Conclusions	200
	Nomenclature	201
Chapter 6	Fluid Particles in Non-Newtonian Media	203
6.1	Introduction	203
6.2	Formation of Fluid Particles	205
6.2.1	Bubbles	205
6.2.1.1	Davidson–Schuler Model	205
6.2.1.2	Kumar–Kuloor Model	207
6.2.2	Drops	212
6.2.2.1	Criterion I: Low Viscosity Systems	214
6.2.2.2	Criterion II: High Viscosity Systems	215
6.2.3	Disintegration (or Break Up) of Jets and Sheets	217
6.2.4	Growth or Collapse of Bubbles	218
6.3	Shapes of Bubbles and Drops in Free Rise or Fall	221
6.3.1	Newtonian Continuous Media	221
6.3.2	Non-Newtonian Continuous Media	224
6.4	Terminal Velocity–Volume Behavior in Free Motion	239
6.5	Drag Behavior of Single Particles	246
6.5.1	Theoretical Developments	246
6.5.1.1	Newtonian Fluids	248
6.5.1.2	Shear-Thinning Continuous Phase	251
6.5.1.3	Visco-Elastic Continuous Phase	258
6.5.1.4	Non-Newtonian Drops	259
6.5.2	Experimental Results	260
6.6	Bubble and Drop Ensembles in Free Motion	264
6.7	Coalescence of Bubbles and Drops	267
6.7.1	Bubble Coalescence	268

6.7.2	Drop Coalescence.....	271
6.8	Breakage of Drops	272
6.9	Motion and Deformation of Bubbles and Drops in Confined Flows	273
6.10	Conclusions	275
	Nomenclature.....	276

Chapter 7 Non-Newtonian Fluid Flow in Porous Media and

	Packed Beds	279
7.1	Introduction	279
7.2	Porous Medium	281
7.2.1	Definition of a Porous Medium, its Classification and Examples	281
7.2.2	Description of a Porous Medium	282
7.3	Newtonian Liquids	285
7.3.1	Flow Regimes.....	286
7.3.2	Pressure Loss — Throughput Relationship.....	288
7.3.2.1	Dimensionless Empirical Correlations	290
7.3.2.2	The Conduit or Capillary Models.....	293
7.3.2.3	The Submerged Objects Models or Drag Theories.....	298
7.3.2.4	Use of the Field Equations for Flow through a Porous Medium	304
7.3.2.5	Flow in Periodically Constricted Tubes	304
7.3.2.6	Volume Averaging of the Navier–Stokes Equations	306
7.3.3	Wall Effects	307
7.3.4	Effects of Particle Shape, Particle Roughness, and Size Distribution	312
7.3.5	Fibrous Porous Media	314
7.3.6	Theoretical Treatments	319
7.3.6.1	Flow Parallel to an Array of Rods	319
7.3.6.2	Transverse Flow over an Array of Rods	320
7.3.6.3	Creeping Flow Region	320
7.3.6.4	Inertial Effects	324
7.4	Non-Newtonian Fluids.....	326
7.4.1	Flow Regimes	341
7.4.2	Pressure Loss for Generalized Newtonian Fluids	342
7.4.2.1	The Capillary Model	342
7.4.2.2	Submerged Object Models or Drag Theories	356
7.4.2.3	Volume Averaging of Equations	360
7.4.2.4	Other Methods.....	361

7.4.3	Visco-Elastic Effects in Porous Media	362
7.4.4	Dilute/Semidilute Drag Reducing Polymer Solutions	368
7.4.5	Wall Effects	372
7.4.6	Effect of Particle Shape and Size Distribution	373
7.4.7	Flow in Fibrous Media	374
	7.4.7.1 Generalized Newtonian fluids	374
	7.4.7.2 Visco-Elastic Fluids	380
7.4.8	Mixing in Packed Beds	381
7.5	Miscellaneous Effects	381
7.5.1	Polymer Retention in Porous Media	382
7.5.2	Slip Effects	384
7.5.3	Flow-Induced Mechanical Degradation of Flexible Molecules in Solutions	386
7.6	Two-Phase Gas/Liquid Flow	388
7.7	Conclusions	391
	Nomenclature	392
Chapter 8 Fluidization and Hindered Settling		395
8.1	Introduction	395
8.2	Two-Phase Fluidization	397
8.2.1	Minimum Fluidization Velocity	397
	8.2.1.1 Definition	397
	8.2.1.2 Prediction of V_{mf}	398
8.2.2	Bed Expansion Behavior	406
	8.2.2.1 Inelastic Non-Newtonian Systems	410
8.2.3	Effect of Visco-Elasticity	421
8.3	Three-Phase Fluidized Beds	423
8.3.1	Introduction	423
8.3.2	Minimum Fluidization Velocity	424
8.3.3	Bed Expansion Behavior	426
8.3.4	Gas Holdup	427
8.4	Sedimentation or Hindered Settling	427
	8.4.1 Non-Newtonian Studies	431
8.5	Conclusions	434
	Nomenclature	435
Chapter 9 Heat and Mass Transfer in Particulate Systems		437
9.1	Introduction	437
9.2	Boundary Layer Flows	449
9.2.1	Plates	450
	9.2.1.1 Forced Convection	450

9.2.1.2	Free Convection	456
9.2.1.3	Mixed Convection	463
9.2.2	Cylinders	465
9.2.2.1	Forced Convection.....	465
9.2.2.2	Free Convection	469
9.2.2.3	Mixed Convection	471
9.2.3	Spheres	473
9.2.3.1	Forced Convection.....	473
9.2.3.2	Free Convection	480
9.2.3.3	Mixed Convection	486
9.3	Visco-Elastic Effects in Boundary Layers	489
9.3.1	Forced Convection.....	489
9.3.2	Free Convection.....	493
9.4	Bubbles	495
9.4.1	Large Peclet Number ($Pe \gg 1$)	496
9.4.2	Small Peclet Number ($Pe \ll 1$)	498
9.5	Drops	499
9.6	Ensembles of Bubbles and Drops	501
9.7	Fixed Beds.....	504
9.8	Liquid-Solid Fluidized Beds	510
9.9	Three-Phase Fluidized Beds	511
9.10	Tube Bundles.....	513
9.11	Conclusions	514
	Nomenclature.....	515
Chapter 10	Wall Effects	521
10.1	Introduction	521
10.2	Definition	522
10.3	Rigid Spheres.....	523
10.3.1	Newtonian Fluids	523
10.3.1.1	Theoretical Treatments.....	523
10.3.1.2	Experimental Results and Correlations	527
10.3.2	Inelastic Non-Newtonian Liquids	535
10.3.2.1	Theoretical and Numerical Treatments	535
10.3.2.2	Experimental Studies	537
10.3.3	Visco-Plastic Liquids	542
10.3.4	Visco-Elastic Liquids.....	544
10.3.4.1	Boger Fluids	545
10.4	Nonspherical Rigid Particles.....	546
10.4.1	Newtonian Liquids.....	546
10.4.2	Inelastic Non-Newtonian Liquids	548
10.5	Drops and Bubbles	549

10.5.1	Newtonian Continuous Phase	550
10.5.1.1	Low Reynolds Number Regime	550
10.5.1.2	High Reynolds Number Regime.....	551
10.5.2	Non-Newtonian Continuous Phase	552
10.6	Conclusions	553
	Nomenclature	554
Chapter 11	Falling Object Rheometry	557
11.1	Introduction	557
11.2	Falling Ball Method	557
11.2.1	Newtonian Fluids	557
11.2.2	Non-Newtonian Fluids	559
11.2.2.1	Zero-Shear Viscosity.....	560
11.2.2.2	Shear-Dependent Viscosity	568
11.2.2.3	Yield Stress	570
11.2.2.4	Characteristic Time for Visco-Elastic Fluids	573
11.3	Rolling Ball Method.....	574
11.3.1	Newtonian Fluids	574
11.3.2	Non-Newtonian Fluids (Shear-Dependent Viscosity)	574
11.3.3	Yield Stress	576
11.4	Rotating Sphere Viscometer	576
11.5	Falling Cylinder Viscometer	578
11.5.1	Newtonian Fluids	578
11.5.2	Non-Newtonian Fluids	581
11.5.1.1	Shear-Dependent Viscosity	581
11.5.1.2	Yield Stress	583
11.6	Conclusions	584
	Nomenclature	584
	References	587
	Author Index	723
	Subject Index	761
