

C O N T E N T S

PREFACE	xi
CHAPTER I. LIGHT MICROSCOPY	
1. NATURE OF LIGHT	3
1.1 Historical Notes	3
1.2 The Electromagnetic Spectrum	4
1.3 Wave Nature of Light	6
1.4 Natural and Polarized Light	8
2. PROPAGATION OF LIGHT IN ISOTROPIC MATERIALS	10
2.1 Reflection	11
2.2 Refraction	11
2.3 Dispersion	13
2.4 Total Reflection	14
2.5 Polarization by Reflection and Refraction	15
3. PROPAGATION OF LIGHT IN ANISOTROPIC MATERIALS	17
3.1 Light Rays and Wave Normals	17
3.2 Birefringence or Double Refraction	18
4. THE OPTICAL INDICATRIX	19
4.1 The Isotropic Indicatrix	20
4.2 The Uniaxial Indicatrix	22
4.3 The Biaxial Indicatrix	23
5. OPTICAL LENSES	26
5.1 Lens Imaging	26
5.2 Lens Defects	32
5.3 Lenses in a Light Microscope	33

6.	THE POLARIZING MICROSCOPE	33
6.1	The Illumination System	35
6.2	The Objective Lens	35
6.3	The Ocular	37
6.4	The Rotatable Stage	38
6.5	Polarizers	38
6.6	Accessories	40
6.7	Adjustments, Care, and General Handling	41
7.	SPECIMEN PREPARATION	43
7.1	Powder Mounts	43
7.2	Thin Sections	44
7.3	Polished Specimens	45
8.	CRYSTALS IN PLANE POLARIZED LIGHT	46
8.1	Geometrical Information	46
8.2	Absorption and Pleochroism	47
8.3	Refractive Index Determination	48
9.	CRYSTALS BETWEEN CROSSED NICOLS	52
9.1	Interference Colors	52
9.2	Order of an Interference Color: Compensation	57
9.3	Extinction Angle	58
10.	OPTICAL MEASUREMENTS	59
10.1	Conoscopic Observations	59
10.2	Determination of Optical Characteristics	62
11.	SPECIAL METHODS	63
11.1	The Universal Stage	63
11.2	Reflected Light Microscopy	63
12.	LITERATURE	65
CHAPTER II. X-RAY ANALYSIS		
1.	X RADIATION	67
1.1	Historical Notes	67
2.	X-RAY PRODUCTION	68
2.1	X-Ray Tubes	68
2.2	X-Ray Emission	70

3.	NATURE OF X RADIATION	71
3.1	The Continuous Spectrum	72
3.2	The Characteristic Spectrum	73
3.3	X-Ray Absorption	76
4.	X-RAY DIFFRACTION	79
4.1	Bragg Diffraction	80
4.2	X-Ray Diffractometer	82
4.3	Diffractometer Sample Preparation	83
4.4	Diffractometer Operating Conditions	85
4.5	Use of the Powder Diffraction File	93
4.6	Clay Mineral Analysis	97
4.7	Diffraction Peak Broadening	97
4.8	The Monochromatic X Ray	102
4.9	Debye-Scherrer Camera	103
5.	X-RAY SPECTROMETRY	109
6.	LITERATURE	112

CHAPTER III. ELECTRON BEAM INSTRUMENTATION

1.	ELECTRON WAVES AND LENSES	113
1.1	Historical Notes	114
1.2	De Broglie Waves	115
1.3	Electron Wavelength	115
1.4	Electron Guns	116
1.5	Electron Lenses	123
1.6	Electron Lens Aberrations	125
1.7	Depth of Field and Depth of Focus	129
2.	THE TRANSMISSION ELECTRON MICROSCOPE	130
2.1	Physical Description and Function	131
2.2	Electron Beams and Resolution	137
2.3	Image Formation	141
2.4	Specimen Preparation	154
3.	THE SCANNING ELECTRON MICROSCOPE	159
3.1	Physical Description and Function	160
3.2	Scanning Probe Size and Current	162
3.3	Electron Beam-Specimen Interactions	167
3.4	Backscattered and Secondary Electrons	170
3.5	X Radiation	174
3.6	Auger Electrons and Other Signals	180

3.7	Specimen Preparation	182
3.8	Signals and Resolution	183
4.	THE ELECTRON MICROPROBE	186
4.1	Physical Description and Function	186
4.2	The Crystal Spectrometer	186
4.3	The Proportional Counter	188
5.	LITERATURE	191
	SOURCES FOR ILLUSTRATIONS	193
	INDEX	195
